

## 2.5.1. Mechanism of internal assessment is transparent.

### Transparency of internal assessment

The college has a transparent and robust evaluation process in terms of frequency and mode. To ensure transparency in internal assessment, the system of internal assessment is communicated with the students well in time. The basic schemes and eligibility criteria's for the evaluation process is made known to students through university ordinances, notice boards, and class counseling.

The examination timetable is displayed on the notice board at least two weeks before the internal examination, the same is circulated amongst teachers. Students can discuss issues regarding academic and test performance with the concerned teacher at the time of discussion with the subject in charges.

Students are shown the answer books of internal examination and they're seen and satisfied remarks are noted after solving grievances of students if any. If the students are not satisfied it is discussed with the concerned subject in charge and rectified. Further, any grievance of the student is sorted out by the Examination Committee and Principal.

The examination in charge along with the committee member plays a proactive role and solves the problem of the student by working as a link between the student and the university.

**Principal**  
Indore Institute of Pharmacy,  
INDORE (M.P.)

#### 4. Medium of instruction and examinations:

Medium of instruction and examination shall be in English.

Working days in each semester shall consist of not less than 100 working days. The odd semesters shall be conducted from the month of June/July to November/December and the even semesters shall be conducted from the month of December/January to June / July in every calendar year.

#### 5. Attendance and progress:

A candidate is required to put in at least 80 % attendance in individual courses considering theory and practical separately. The candidate shall complete the prescribed course satisfactorily to be eligible to appear for the respective examinations.

#### 6. Program/Course credit structure:

As per the philosophy of Credit Based Semester System, certain quantum of academic work viz. theory classes, practical classes, seminars, assignments, etc. are measured in terms of credits. On satisfactory completion of the courses, a candidate earns credits. The amount of credit associated with a course is dependent upon the number of hours of instruction per week in that course. Similarly, the credit associated with any of the other academic, co/extra-curricular activities is dependent upon the quantum of work expected to be put in for each of these activities per week/per activity.

##### 6.1 Credit assignment:

6.1.1 Theory and Laboratory courses are broadly classified as Theory and Practical. Theory courses consist of lecture (L) and Practical (P) courses consist of hours spent in the laboratory. Credits (C) for a course is dependent on the number of hours of instruction per week in that course, and is obtained by using a multiplier of one (1) for lecture and a multiplier of half (1/2) for practical (laboratory) hours. Thus, for example, a theory course having four lectures per week throughout the semester carries a credit of 4. Similarly, a practical having four laboratory hours per week throughout semester carries a credit of 2.

6.1.2 The contact hours of seminars, assignments and research work shall be treated as that of practical courses for the purpose of calculating credits. i.e., the contact hours shall be multiplied by 1/2. Similarly, the contact hours of journal club, research work presentations and discussions with the supervisor shall be considered as theory course and multiplied by 1.

#### 7. Minimum credit requirements:

The minimum credit points required for the award of M. Pharm. degree is 95. However, based on the credit points earned by the students under the head of co-curricular activities, a student shall earn a maximum of 100 credit points. These credits are divided into Theory courses, Practical, Seminars, Assignments, Research work, Discussions with the supervisor, Journal club and Co-Curricular activities over the duration of four semesters. The credits are distributed semester-wise. Courses generally progress in sequence, building competencies and their positioning indicates certain academic maturity on the part of the learners. Learners are expected to follow the semester-wise schedule of courses given in the syllabus.

## 8. Examinations/Assessments

### 15. The Semester grade point average (SGPA):

The performance of a student in a semester is indicated by a number called 'Semester Grade Point Average' (SGPA). The SGPA is the weighted average of the grade points obtained in all the courses by the student during the semester. For example, if a student takes five courses (Theory/Practical) in a semester with credits C<sub>1</sub>, C<sub>2</sub>, C<sub>3</sub> and C<sub>4</sub> and the student's grade points in these courses are G<sub>1</sub>, G<sub>2</sub>, G<sub>3</sub> and G<sub>4</sub>, respectively, and then students' SGPA is equal to:

$$SGPA = \frac{C_1 G_1 + C_2 G_2 + C_3 G_3 + C_4 G_4}{C_1 + C_2 + C_3 + C_4}$$

The SGPA is calculated to two decimal points. It should be noted that, the SGPA for any semester shall take into consideration the F and ABS grade awarded in that semester. For example, if a learner has a F or ABS grade in course 4, the SGPA shall then be computed as:

$$SGPA = \frac{C_1 G_1 + C_2 G_2 + C_3 G_3 + C_4 * ZERO}{C_1 + C_2 + C_3 + C_4}$$

### 16. Cumulative Grade Point Average (CGPA):

The CGPA is calculated with the SGPA of all the IV semesters to two decimal points and is indicated in final grade report card/final transcript showing the grades of all IV semesters and their courses. The CGPA shall reflect the failed status in case of F grade(s), till the course(s) is/are passed. When the course(s) is/are passed by obtaining a pass grade on subsequent examination(s) the CGPA shall only reflect the new grade and not the fail grades earned earlier. The CGPA is calculated as:

$$CGPA = C_1 S_1 + C_2 S_2 + C_3 S_3 + C_4 S_4$$

Q1. (A) Illustrate the principle and different types of detectors used in UV-Visible Spectroscopy.

Ans :- Principle of UV-Visible spectroscopy is Beer's-Lambert law ->

This law states that,

For a given sample path length and concentration of a unit sample is directly proportional to the absorbance of light.

$$A = \epsilon LC$$

Where, A = Amount of light for particular wavelength by sol<sup>n</sup>.

$\epsilon$  = Molar Extinction Coefficient.

L = Distance travelled by light through sol<sup>n</sup>.  
C = Concentration of the solution.
