

Indore Institute of
Pharmacy

Indore Institute of Pharmacy

Affiliated to : PGTM (Bhopal) | Approved by : NAAC (New Delhi) & PCI (New Delhi)
Regd. Under : MHRD Act.

2.6.1. Programme and course outcomes for all Programmes offered by the institution are stated and displayed on the website and communicated to teachers and students.

The institution has well-defined Program Outcomes (POs), Program Specific Outcomes (PSOs) and Course Outcomes (COs). The POs and PEO are indicative of the program outcomes [pharmacy knowledge, planning abilities, problem analysis, modern tool usage, leadership skills, professional identity, pharmaceutical ethics, communication, pharmacist and the society, environment and sustainability, and lifelong learning] and the COs are framed using guideline of affiliating university, PCI, New Delhi.

Dissemination of CO, PO, and PSOs

- The Course outcomes for the specific course are mapped with POs and are communicated and explained by faculty to students when the respective course starts.
- It is uploaded on the College website for information to viewers.
- POs are displayed in the central area, library and institutional website
- PSOs are displayed in central area, Departmental notice boards, library, and institute website.
- CO, PO and PSOs are discussed in the student induction program
- CO, PO, and PSOs are discussed in the faculty meetings regarding their attainment status and the planning for the next academic year.
- CO, PO, and PSOs are attached in the course file.

INDORE INSTITUTE OF PHARMACY, INDORE

VISION

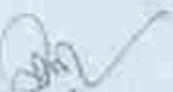

To produce competent pharmacy professionals and value-based future leaders by offering quality education that incorporates training in Holistic Work-Life Management

MISSION

1. To provide quality education and training to a budding pharmacist who can withstand a transforming healthcare system.
2. To bridge the gap between academia and creative professionals for industry 4.2 or 5.0.
3. Horing the students' future with the approach to creating emotional quotient with intelligence quotient for holistic development with the aim of Know thyself and be thyself willing to evolve.

D. Pharmacy PEO

To enable diploma holders practice as chemist, druggist and industry professionals

To make diploma holders proficient in core technical skills who reflect commitment, ethics and social responsibility

To inculcate lifelong learning habits and entrepreneurship for a successful and productive career.

Principal
Indore Institute of Pharmacy
INDORE (M.P.)

13. Pharn

PSO 1—Diploma holder shall possess basic and applied knowledge of pharmacy practice and will cater to the ever-evolving healthcare industry thereby serving the nation.

PSO II – Diploma holders shall possess holistic development which will focus on more than cognitive development, as it incorporates mind, body, spirit, behaviour, and social interaction which develops the entrepreneurship skills among students.

PSO-III: To strengthen the professional and ethical attitude, effective communication skills, teamwork skills and an ability to relate pharmaceutical sciences issues to broader social context.

Program Outcomes (D. Pharm.)

- PO1. Pharmacy Knowledge:** Possess knowledge and comprehension of the core and basic aspects hospital pharmacy, drug manufacturing and chemist as a profession.
- PO2. Modern tool usage:** Understand the importance and need to use modern pharmacy-related tools and resources with an understanding of the limitations.
- PO3. Leadership skills:** Assume participatory roles as responsible citizens or leadership roles when appropriate to facilitate improvement in health and wellbeing and serve society.
- PO4. Professional Identity:** Know the role and responsibility of a pharmacist in society as an educator and health care professional.
- PO5. Pharmaceutical Ethics:** Honour personal values and apply ethical principles in pharmacy profession which reflects in behavior and decision making.
- PO6. Communication:** Communicate effectively with the pharmacy community and with society at large, via different modes of communication to reflect professional competence.
- PO7. The Pharmacist and society:** Implement the acquired knowledge and information to assess societal, health, safety and legal issues that are relevant to the professional pharmacy practice.
- PO8. Environment and sustainability:** Understand the impact of the professional pharmacy solutions in societal and environmental contexts, and acknowledge the need for sustainable development.
- PO9. Life-long learning:** Recognize the need for, and inculcate the ability to engage in independent and life-long learning.

Course Outcome**

		D Pharm I PCT
Course code/ Course name	Course Outcome	
ER20- 11T Pharma ceutics - Theory	CO1 1T.1	Describe about the different dosage forms and their formulation aspects
	CO1 1T.2	Explain the advantages, disadvantages, and quality control tests of different dosage forms
	CO1 1T.3	Discuss the importance of quality assurance and good manufacturing practices.
ER20- 11P Pharma ceutics - Practica l 1	CO1 1P.1	Calculate the working formula from the given master formula
	CO1 1P.2	Formulate the dosage form and dispense in an appropriate container
	CO1 1P.3	Design the label with the necessary product and patient information
	CO1 1P.4	Perform the basic quality control tests for the common dosage forms
ER20- 12T Pharma ceutical Chemis try - Theory	CO1 2T.1	Describe the chemical class, structure and chemical name of the commonly used drugs and pharmaceuticals of both organic and inorganic nature
	CO1 2T.2	Discuss the pharmacological uses, dosage regimen, stability issues and storage conditions of all such chemical substances commonly used as drugs
	CO1 2T.3	Describe the quantitative and qualitative analysis, impurity testing of the chemical substances given in the official monographs
	CO1 2T.4	Identify the dosage form & the brand names of the drugs and pharmaceuticals popular in the marketplace
ER20- 12P Pharma ceutical Chemis try - Practica l 1	CO1 2P.1	Perform the limit tests for various inorganic elements and report
	CO1 2P.2	Prepare standard solutions using the principles of volumetric analysis
	CO1 2P.3	Test the purity of the selected inorganic and organic compounds against the monograph standards
	CO1 2P.4	Synthesize the selected chemical substances as per the standard synthetic scheme
	CO1 2P.5	Perform qualitative tests to systematically identify the unknown chemical substances
ER20- 13T Pharma ceutics - Theory	CO1 3T.1	Identify the important common crude drugs of natural origin
	CO1 3T.2	Describe the uses of herbs in nutraceuticals and cosmeceuticals
	CO1 3T.3	Discuss the principles of alternative system of medicines
	CO1 3T.4	Describe the importance of quality control of drugs of natural origin
ER20- 13P	CO1 3P	Identify the given crude drugs based on the morphological characteristics

Indore Institute of Pharmacy, Indore

Course Outcome

Pharma cognos x - Practica l	CO1 3P	Take a transverse section of the given crude drugs
	CO1 3P	Describe the anatomical characteristics of the given crude drug under microscopical conditions
	CO1 3P	Carry out the physical and chemical tests to evaluate the given crude drugs
ER20- 14T Human Anatom y & Physiol ogy - Theory	CO1 4T.1	Describe the various organ systems of the human body
	CO1 4T.2	Discuss the anatomical features of the important human organs and tissues
	CO1 4T.3	Explain the homeostatic mechanisms regulating the normal physiology in the human system
	CO1 4T.4	Discuss the significance of various vital physiological parameters of the human body
ER20- 14P Human Anatom y & Physiol ogy - Practica l	CO1 4P.1	Perform the haematological tests in human subjects and interpret the results
	CO1 4P.2	Record, monitor and document the vital physiological parameters of human subjects and interpret the results
	CO1 4P.3	Describe the anatomical features of the important human tissues under the microscopical conditions
	CO1 4P.4	Discuss the significance of various anatomical and physiological characteristics of the human body
ER20- 15T Social Pharma cy - Theory	CO1 5T.1	Discuss about roles of pharmacists in the various national health programs
	CO1 5T.2	Describe various sources of health hazards and disease preventive measures
	CO1 5T.3	Discuss the healthcare issues associated with food and nutritional substances
	CO1 5T.4	Describe the general roles and responsibilities of pharmacists in public health
ER20- 15P Social Pharma cy - Practica l	CO1 5P.1	Describe the roles and responsibilities of pharmacists in various National health programs
	CO1 5P.2	Design promotional materials for public health awareness
	CO1 5P.3	Design promotional materials for public health awareness
	CO1 5P.4	Describe various health hazards including microbial sources
	CO1 5P.5	Advice on preventive measures for various diseases
	CO1 5P.6	Provide first aid for various emergency conditions

Course Outcome**

D Pharm II PCI

Course code/ Course name	Course Outcome			
ER20-21T Pharmacology - Theory	CO21T.1	Describe the basic concepts of pharmacokinetics and pharmacodynamics		
	CO21T.2	Enlist the various classes and drugs of choices for any given disease condition		
	CO21T.3	Advise the dosage regimen, route of administration and contraindications for a given drug		
	CO21T.4	Describe the common adverse drug reactions		
ER20-21P Pharmacology - Practical	CO21P.1	Study and report the local anaesthetic, mydriatic and miotic effects of the given drug on the rabbit eye		
	CO21P.2	Choose appropriate animal experiment model to study the effects given drugs acting on the central nervous system and submit the report		
	CO21P.3	Perform the effects of given tissues (simulated) on isolated organs / tissues and interpret the results		
	CO21P.4	Interpret the dose dependent responses of drugs in various animal experiment models		
ER20-22T Community Pharmacy & Management - Theory	CO22T.1	Describe the establishment, legal requirements, and effective administration of a community pharmacy		
	CO22T.2	Professionally handle prescriptions and dispense medications		
	CO22T.3	Counsel patients about the disease, prescription and/or non-prescription medicines		
	CO22T.4	Perform basic health screening on patients and interpret the reports in the community pharmacy settings		
ER20-22P Community Pharmacy & Management - Practical	CO22P.1	Handle and fill prescriptions in a professional manner		
	CO22P.2	Counsel patients on various diseases and minor ailments		
	CO22P.3	Counsel patients on prescription and/or non-prescription medicines		
	CO22P.4	Design and prepare patient information leaflets		
	CO22P.5	Perform basic health screening tests		
ER20-23T Biochemistry & Clinical Pathology - Theory	CO23T.1	Describe the functions of biomolecules		
	CO23T.2	Discuss the various functions of enzymes in the human system		
	CO23T.3	Explain the metabolic pathways of biomolecules in both physiological and pathological conditions		
	CO23T.4	Describe the principles of organ function tests and their clinical significances		
	CO23T.5	Determine the biomolecules / metabolites in the given biological samples both qualitatively and quantitatively		

Principal
 Indore Institute of Pharmacy,
 INDORE (M.P.)

Indore Institute of Pharmacy, Indore Course Outcome

	CO23T.6	Describe the clinical pathology of blood and urine
ER20-23P Biochemistry & Clinical Pathology – Practical	CO23P.1	Qualitatively determine the biomolecules / metabolites in the given biological samples
	CO23P.2	Determine the normal and abnormal constituents in blood and urine samples and interpret the results of such testing
	CO24T.1	Help assessing the subjective and objective parameters of patients in common disease conditions
ER20-24T Pharmacotherapeutics – Theory	CO24T.2	Assist other healthcare providers to analyse drug related problems and provide therapeutic interventions
	CO24T.3	Participate in planning the rational medicine therapy for common diseases
	CO24T.4	Design and deliver discharge counselling for patients
	CO24P.1	Write SOAP (Subjective, Objective, Assessment and Plan) notes for the given clinical cases of selected common diseases
ER20-24P Pharmacotherapeutics – Practical	CO24P.2	Counsel the patient about the disease conditions, uses of drugs, methods of handling and administration of drugs, life-style modifications and monitoring parameters
	CO25T.1	Explain about the basic concepts of hospital pharmacy administration
	CO25T.2	Manage the supply chain and distribution of medicines within the hospital settings
	CO25T.3	Assist the other healthcare providers in monitoring drug therapy and address drug related problems
	CO25T.4	Interpret common lab investigation reports for optimizing drug therapy
ER20-25P Hospital & Clinical Pharmacy – Practical	CO25P.1	Professionally handle and answer the drug information queries
	CO25P.2	Interpret the common laboratory reports
	CO25P.3	Report suspected adverse drug reactions using standard procedures
	CO25P.4	Understand the uses and methods of handling various medical/surgical instruments and devices
	CO25P.5	Interpret and report the drug-drug interactions in common diseases for optimizing the drug therapy
ER20-26T Pharmacy Law & Ethics	CO26T.1	Describe the history and evolution of pharmacy law in India
	CO26T.2	Interpret the acts and rules regulating the profession and practice of pharmacy in India
	CO26T.3	Discuss the various codes of ethics related to practice standards in pharmacy
	CO26T.4	Interpret the fundamentals of patent laws from the perspectives of pharmacy

Indore Institute of Pharmacy, Indore
Course Outcome

D Pharm I		
Course code/ Course name	Course Outcome	
101 Pharmaceutics- I	C101.1	Outline the history of pharmacy practice and pharmacopeias.
	C101.2	Explain the size reduction method and various equipment.
	C101.3	Summarize the Metrology system of weights and measures.
	C101.4	Explain the ayurvedic preparation of medicines.
	C101.5	Explain the distillation and sterilization methods.
	C101.6	Study of immunological products
	C101.7	Explain the tablet and capsule manufacturing and evaluation methods with packaging.
102 Pharmaceutical Chemistry I	C102.1	Outlines of medicinal and pharmaceutical importance of inorganic compounds.
	C102.2	Relate the importance of various inorganic compounds.
	C102.3	Outline the classification, properties, and mechanism of action of various inorganic pharmaceutical compounds
	C102.4	Discuss Electrolytes used for replacement therapy.
	C102.5	Discuss the various radio-isotopes and their pharmaceutical applications.
103 Pharmacognosy	C103.1	Summarize general introduction of pharmacognosy, classification of crude drugs, and quality control of drugs of natural origin.
	C103.2	Explain the history and scope of pharmacognosy including indigenous systems of medicine.
	C103.3	Explain the cultivation, collection, processing, and storage of drugs of natural origin.
	C103.4	Discuss the identification of fibers used in sutures and surgical dressings.
104 Biochemistry and Clinical Pathology	C104.1	Discuss the brief introduction to biochemistry.
	C104.2	Illustrate the brief chemistry and role of protein, lipid, and carbohydrates.
	C104.3	Explain the pathology of blood and urine.
105 Human Anatomy and Physiology	C105.1	Explain Structure of cell, function of its components.
	C105.2	Explain nervous system organization
	C105.3	Illustrate the anatomy, regulation, and disorders of the Digestive system and energetics.
	C105.4	Make use of knowledge related to the anatomy of the Respiratory system and urinary system
	C105.5	Relate the inter-linked classification, mechanism, and functions of the endocrine system
	C105.6	Explain the anatomy, physiology, and functions of the reproductive system and aspects of genetics.
106 Health Education and	C106.1	Illustrate the concept of health.
	C106.2	Awareness of Environment and health

D Pharm II

Course code/ Course name	Course Outcome	
201 Pharmaceutics-II	C201.1	Describe the flow of materials in a manufacturing unit by studying the plant layout design.
	C201.2	To be aware of alternative system of medicines, the factors which influence the design of pharmaceutical dosage forms
	C201.3	They come to know how to analyse and compare the difference between various dosages and routes of administrations.
	C201.4	Study of various types of incompatibilities
	C201.5	Explain the Disposal of Medication
202 Pharmaceutical Chemistry II	C202.1	Write the structure, name of the organic compound
	C202.2	Knowledge about the various drugs with chemical name, structure, method of Preparation and uses,
	C202.3	Write the reaction, name the reaction and orientation of reactions
	C202.4	Account for reactivity/stability of compounds.
	C202.5	Identify/confirm the unknown organic compound
203 Pharmacology & Toxicology	C203.1	Infer principle concept of pharmacology
	C203.2	Relate and develop fundamental of pharmacokinetics and pharmacodynamics
	C203.3	Explain the pharmacology of drugs acting on peripheral nervous system
	C203.4	Make use of pharmacology to study drug activity on CNS
	C203.5	Apply basic knowledge of pharmacology in prevention and treatment of various disease
204 Hospital and Clinical Pharmacy	C204.1	Explain the hospital Pharmacy
	C204.2	Illustrate the concept of drug distribution system in hospital pharmacy
	C204.3	Introduction to clinical pharmacy practice—definition, scope.
	C204.4	Understand the pathophysiology of various diseases like diabetes etc
	C204.5	Introduction about drug clinical toxicity
205 Drug Store and Business Management	C205.1	Explain the knowledge about commerce.
	C205.2	Illustrate the knowledge of industry and commerce.
	C205.3	Discuss the Drug house management

ER20-21P Pharmacology - Practical	CO21 P1	Study and report the local anaesthetic, mydriatic and miotic effects of the given drug on the rabbit eye						1 2	
	CO21 P2	Choose appropriate animal experiment model to study the effects of the given drugs acting on the central nervous system and submit the report						1 2	
	CO21 P3	Perform the effects of given tissues (simulated) on isolated organs / tissues and interpret the results						1 2	
	CO21 P4	Interpret the dose dependent responses of drugs in various animal experiment modes						1 2	
ER20-22T Community Pharmacy	CO22 T1	Describe the establishment, legal requirements, and effective administration of a community pharmacy						1 2	
	CO22 T2	Professionally handle prescriptions and dispense medications						1 2	

Indore Institute of Pharmacy, Indore
Course Outcome

	Management - Theory	CO22 T.1							
		C022 T.3	Counsel patients about the disease, prescription and/or non-prescription medicines	3	2	1	3	2	1
	ER20-22P Community Pharmacy & Management - Practical	C022 P.1	Perform basic health screening on patients and interpret the reports in the community pharmacy settings	3	2	1	2	1	2
		C022 P.2	Handle and fill prescriptions in a professional manner	3	2	1	1	2	2
	ER20-22T Biochemistry & Clinical Pathology - Theory	C022 P.3	Counsel patients on various diseases and minor ailments	3	2	1	2	1	2
		C022 P.4	Counsel patients on prescription and/or non-prescription medicines	3	2	1	2	1	2
	ER20-22T Biochemistry & Clinical Pathology - Practical	C022 P.5	Design and prepare patient information leaflets	3	2	1	1	2	2
		C022 T.1	Perform basic health screening tests	3	2	1	1	2	2
	ER20-22T Biochemistry & Clinical Pathology - Theory	C022 T.2	Describe the functions of biomolecules	3	2	1		2	2
		C022 T.3	Discuss the various functions of enzymes in the human system	3	2	1		2	2
	ER20-22T Biochemistry & Clinical Pathology - Practical	C022 T.4	Explain the metabolic pathways of biomolecules in both physiological and pathological conditions	3	2	1		2	2
		C022 T.5	Describe the principles of organ function tests and their clinical significances	3	2	1		2	2
	ER20-22P Biochemistry	C022 T.6	Determine the biomolecules / metabolites in the given biological samples, both qualitatively and quantitatively	3	2	1		2	2
		C022 P.1	Describe the clinical pathology of blood and urine	3	2	1		2	2
	ER20-22P Microbiology	C022 P.2	Qualitatively determine the biomolecules / metabolites in the given microbial samples	3	2	1		2	2

B. Pharm.

PSO I - Pharmacy graduates will possess basic and applied knowledge of pharmaceutical and allied sciences helping them to become competent industry-ready professionals adapting to the needs of different pharmaceutical areas.

PSO II - Pharmacy graduates shall possess interpersonal skills as leader in team in appreciation of professional ethics and societal responsibilities with the attitude of life-long learning and motto of 'know thyself' and will to evolve.

PSO III: To prepare graduate of the program to learn and adapt in a globe of constantly developing trend.

Program Outcomes for Bachelor of Pharmacy

PO1. Pharmacy Knowledge: Possess knowledge and comprehension of the core and applied domains of pharmaceutical sciences, including biomedical sciences, administrative and manufacturing practices with special emphasis on developing soft skills.

PO2. Planning Abilities: inculcate the ability to arrange the events and meet deadlines as per demand of profession.

PO3. Problem analysis: Inculcate the aptitude and scientific approach to identify the issues during daily practice and address it there and then.

PO4. Modern tool usage: Harness the capability in implementing pharmacy-related instruments, equipment including computing tools with an understanding of the limitations.

PO5. Leadership skills: earn the quality of an entrepreneur, team-leader, and professional for serving the society.

PO6. Professional Identity: Understand and inculcate habits to earn, preserve and encourage the value of variety of professional roles of a pharmacist in society.

PO7. Pharmaceutical Ethics: Learn to use and apply personal values in professional and social contexts. Apply ethical principles while making decisions and take responsibility for the outcomes associated with the decisions.

PO8. Communication: Develop oral and written communication skills in tune with the professional role of a pharmacist.

PO9. The Pharmacist and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety and legal issues and the consequent responsibilities relevant to the professional pharmacy practice.

PO10. Environment and sustainability: Acknowledge the need of developing sustainable development in the field of pharmacy.

PO11. Life-long learning: Recognize and understand that learning is the attitude and a lifelong process to keep pace with the latest advancements in the field and society.

**Indore Institute of Pharmacy, Indore
Course Outcome**

B. Pharmacy I Year / I Sem

Course code/ Course name	Course outcomes	
(BP-101T) Human Anatomy and Physiology - I	C101.1	Recall the basics of life processes, structural organization, haemostatic mechanism cellular-level understanding of living beings, and understand the tissue level organization of human being
	C101.2	Explain the gross morphology, structure, and functions of the human integumentary and skeletal system
	C101.3	Summarize the gross morphology, structure, and functions of body fluids and the Lymphatic system.
	C101.4	Explain the morphology, structure, and functions of the peripheral nervous system and sense organs
	C101.5	Summarize the gross morphology, structure, and functions of CVS.
(BP-102T) Pharmaceutical Analysis	C102.1	Outline the basic concepts and techniques of pharmaceutical analysis
	C102.2	Illustrate the principles and applications of acid-base titrations
	C102.3	Development of analytical skills based on quantitative estimation
	C102.4	Explain the fundamentals of redox titration
	C102.5	Application of various volumetric and electrochemical methods
(BP-103T) Pharmaceutics - I	C103.1	Outline the history of pharmacy practice and pharmacopoeias
	C103.2	Explain Solid dosage forms
	C103.3	Summarize monophasic and biphasic systems.
	C103.4	Explain and classify the concept of suppositories and pharmaceutical incompatibilities
	C103.5	Summarize the concept of semisolid dosage forms.
(BP-104T) Pharmaceutical Inorganic Chemistry	C104.1	Outline medicinal and pharmaceutical importance of inorganic compounds
	C104.2	Explain the sources of impurities and methods to determine the impurities in inorganic drugs and pharmaceuticals
	C104.3	Relate the importance of inorganic gastrointestinal agents
	C104.4	Outline the classification and mechanism of action of various inorganic pharmaceuticals

**Indore Institute of Pharmacy, Indore
Course Outcome**

	C104.5	Discuss the various radioisotopes and their pharmaceutical applications
(BP-105T) Communication Skills	C.105.1	Developing all dimensions of personality in terms of communication skills to express, understand and convey the thoughts impressively in a given situation
	C.105.2	Construct an understanding of verbal and nonverbal communication and various styles.
	C.105.3	Develop better listening skills and written communication.
	C.105.4	Develop interview skills and the art of presentation.
	C.105.5	Build the ability for group discussion and leadership skills
(BP-106T) Remedial biology	C.106.1	Classify the diversity of the living systems and five kingdoms of life with the morphology of flowering plants like root, stem, and leaf.
	C.106.2	Know various concepts of body fluids and circulation, digestion and absorption, and breathing and respiration.
	C.106.3	Relate basic components of anatomy & physiology of the human body concerning human reproduction, excretion, neural control, and chemical coordination.
	C.106.4	Define basic concepts of plant nutrients and photosynthesis
	C.106.5	Describe plant respiration, growth, and development of plant and cell structure and tissue
(BP-106T) Remedial mathematics	C.106M.1	Know the introduction of partial fraction, logarithm, function and limits, and continuity.
	C.106M.2	Solve the different types of problems by applying matrices and determinants.
	C.106M.3	Appreciate and understand the principles and solve the problem related to calculus.
	C.106M.4	Summarize the principle and application of analytical Geometry.
	C.106M.5	Explain the principle of geometry, differential equation, and Laplace transform
(BP-107P) Human Anatomy & Physiology (Practical)	C.107.1	Model physiological processes discussed in theory classes through experiments on normal human beings.
	C.107.2	Study microscopic demonstration of the cells & tissues
	C.107.3	Identify various systems using charts, models & specimens
	C.107.4	Analyze human blood sample
(BP-108P) Pharmaceutical Analysis (Practical)	C.108.1	Learn the art of performing limit tests of some common impurities
	C.108.2	Demonstrate the art of preparation and standardization of primary and secondary standards

Indore Institute of Pharmacy, Indore
Course Outcome

	C.108.3	Perform and learn the technique of assay
	C.108.4	Determine Normality using various electro-analytical methods
(BP-100P) Pharmaceutics I (Practical)	C.109.1	Make use of different techniques leaned on theory to prepare and dispense various dosage forms
	C.109.2	Formulation of official liquid dosage forms
	C.109.3	Formulation and dispensing of solid dosage form
	C.109.4	Formulation and dispensing of semi-solid dosage form
(BP-110P) Pharmaceutical Inorganic Chemistry (Practical)	C.110.1	Analyze qualitative determination of impurities via Limit Test
	C.110.2	Learn to identify different Inorganic compounds
	C.110.3	Determine the purity of Bentonite, Aluminium Hydroxide Gel, etc.
	C.110.4	Elaborate preparation and use of Boric Acid, Potash Alum, and Ferrous Sulphate
(BP-111P) Communication Skills (Practical)	C.111.1	Identify and learn socializing and etiquette
	C.111.2	Adapting the correct use of pronunciation (Consonantal and vowel sounds)
	C.111.3	Develop the use of narration and figures of speech
	C.111.4	Improve writing skills and e-mail etiquette
	C.111.5	Take part in mock personal interview sessions
	C.111.6	Illustrate presentations
(BP-112P) Remedial Biology (Practical)	C.112.1	Demonstrate the basic concepts of experimental biology
	C.112.2	Discuss the anatomy of the frog through computer-assisted techniques
	C.112.3	Model physiological processes discussed in theory classes through experiments on normal human beings,
	C.112.4	Identification and microscopic study of plant parts

B. Pharmacy 1 Year / IISem		
Course code/ Course name	Course Outcome	
(BP-201T) HUMAN ANATOMY AND PHYSIOLOGY	C201.1	Explain nervous system organization
	C201.2	Illustrate the anatomy, regulation, and disorders of the Digestive system and energetics.
	C201.3	Make use of knowledge related to the anatomy of the Respiratory system and Urinary system
	C201.4	Relate the interlinked classification, mechanism, and functions of the endocrine system
	C201.5	Explain the anatomy, physiology, and functions of the reproductive system and aspects of genetics.
(BP-202T) PHARMACEUT ICAL ORGANIC CHEMISTRY -I	C202. 1	Understand the classification and nomenclature of simple organic compounds
	C202. 1.	Explaining the mechanism of various reactions with their orientation
	C202. 3	Determining the reactivity and stability of various organic compounds
	C202. 4	Identification and confirmation of different organic compounds
	C202.5	Evaluating the acidity and basicity of different organic compounds with their uses
(BP203T) BIOCHEMISTR Y	C203.1	Demonstrate and define fundamental principles and nature of biomolecules
	C203.2	Outline and relate various metabolic pathways & their regulation in the body
	C203.3	Understanding the metabolism of nutrient molecules in various physiological and pathological conditions
	C203.4	Understand the genetic organization of the mammalian genome and functions of DNA in the synthesis of RNAs and proteins
	C203.5	Discuss the catalytic role and therapeutic and diagnostic applications of enzymes.
(BP-204T) PATHOPHYSIO LOGY	C204.1	Outline principles of cell injury adaptation and explain the basic mechanism involved in the process of inflammation and repair
	C204.2	The student will be able to understand the pathophysiology of cardiovascular, respiratory, and renal system
	C204.3	Classify and understand salient features related to the pathophysiology of hematological diseases, endocrine, nervous and gastrointestinal system

Principal

Indore - INDORE (M.P.)

Principal
Indore Institute of Pharmacy,
INDORE (M.P.)

Indore Institute of Pharmacy, Indore Course Outcome

	C204.4	Define the etiology and pathophysiological mechanism of diseases like bones and joint disorder with principles of cancer
	C204.5	Understand the important complications of infectious and sexually transmitted diseases
(BP-205T) COMPUTER APPLICATION IN PHARMACY	C.205.1	Demonstrate the fundamentals of computer
	C.205.2	Define the web technologies and types of databases
	C.205.3	Explain the application of computers in pharmacy
	C.205.4	Outline the various applications of databases in pharmacy
	C.206.1	Create the awareness about natural sources and associated problem
(BP-206T) ENVIRONMEN TAL SCIENCES	C.206.2	Construct basic knowledge about different types and functions of ecosystems
	C.206.3	Develop and learn the concept of environmental pollution
	C.206.4	Motivate learners to participate in environmental protection and improvement
	C.206.5	Strive to attain harmony with nature
	C.207.1	Take part in the study of physiological processes by using models and specimens of a few organ systems of the human body
(BP-207P) HUMAN ANATOMY AND PHYSIOLOGY	C.207.2	Illustrate and experiment with human subjects to understand normal body functioning
	C.207.3	Outline family planning devices and pregnancy diagnostic methods
	C.207.4	Relate the histology of vital organs with the help of slides
	C.207.5	Construct blood report by using a cell analyzer
	C.208.1	Take part in preliminary testing and functional group testing of organic compounds
(BP-208P) PHARMACEUT ICAL ORGANIC CHEMISTRY - I	C.208.2	Test for melting point and boiling point of organic compounds
	C.208.3	Create derivatives of organic compounds
	C.208.4	Develop solid derivatives from organic compounds
	C.209.1	Take part in qualitative analysis of biomolecules
(BP-209P) BIOCHEMISTR Y	C.209.2	Test for the presence of abnormal constituents in blood and urine
	C.209.3	Create buffers of various strengths for use in biochemistry practical
	C.209.4	Develop and learn methods for testing enzymatic activity
	C.209.5	Demonstrate and related methods used in polymer

Course Outcome**

B. Pharmacy II Year / III Sem		
Course code/ Course name	Course Outcome	
(BP-301T) PHARMACEUTICAL CHEMISTRY - III (ORGANIC CHEMISTRY- III)	C.301.1	Interpret the structure reactions and substituents of Benzene and its derivative
	C.301.2	Explain the methods of preparation, reactions and the type of isomerism of the Phenol, aromatic amines and aromatic acids.
	C.301.3	Elaborate various reactions and properties of fats and oils
	C.301.4	Explain synthesis and uses of polynuclear hydrocarbons
	C.301.5	Label general methods of preparation and reactions of Cyclo alkanes compounds
(BP-302T) Physical Pharmaceutics I	C.302.1	Outline solubility and its application in pharmaceuticals
	C.302.2	Explain the basic concept of states of matter with its properties and the Physicochemical properties of drug molecules,
	C.302.3	Explain the role of surfactant, surface tension, interfacial tension, and related properties the of the drug during formulation.
	C.302.4	Explain the concept of complexation and protein binding.
	C.302.5	Apply principles of pH, buffers, and isotonic solutions.
(BP-303T) Microbiology	C.303.1	Explain methods of identification, cultivation, and preservation of various microorganisms (Prokaryotes, Eukaryotes, and Bacteria)
	C.303.2	Interpret the importance and implementation of sterilization and aseptic conditions in pharmaceutical processing and industry
	C.303.3	Define fungi and viruses and sterility testing of pharmaceutical products
	C.303.4	Outline the cell culture technology, aseptic area, and methods of standardization,
	C.303.5	Illustrate methods of identification, cultivation, subculturing, and preservation of various microorganisms, growth of animal cells, and application in the pharmaceutical industry.

Indore Institute of Pharmacy, Indore Course Outcome

(BP-304T) Pharmaceutical Engineering	C.304.1	Explain various operations of the flow of fluids, size reduction & size separation.
	C.304.2	Relate the principles and operations involved in heat transfer, Evaporation, and Distillation.
	C.304.3	Explain the concept of drying and mixing with the equipment used.
	C.304.4	Outline the concept of Filtration and centrifugation with the equipment used.
	C.304.5	Explain the concept of material of pharmaceutical plant construction, corrosion, and its prevention.
(BP-305P) Pharmaceutical organic chemistry (practical)	C.305.1	Apply the common laboratory techniques like recrystallization and steam distillation.
	C.305.2	Demonstrate the significance and process of determination of oil values including acid values, saponification values and Iodine value
	C.305.3	Outline the synthesis of basic organic compounds by various reaction mechanisms including nitration, bromination, acetylation
	C.305.4	Outline the synthesis of basic organic compounds by various reaction mechanisms including hydrolysis, oxidation, and some name reactions.
(BP-306P) Physical Pharmaceutics I (practical)	C.306.1	Explain a basic understanding of solubility determination.
	C.306.2	Demonstrate the significance and process of determination of pKa and partition coefficient, and surface tension by various methods.
	C.306.3	Determine the stability of the compounds by various methods
	C.306.4	Determination of HLB number and CMC of surfactants.
(BP-307P) Microbiology (practical)	C.307.1	Demonstrate and choose amongst different types of equipment and processing
	C.307.2	Illustrate the art of sterilization of glassware and preparation and sterilization of media.
	C.307.3	Illustrate the process of culturing, sub-culturing, and multiple streaking methods
	C.307.4	Make use of various staining techniques (simple, grams, and acid-fast staining) and the hanging drop method for determining the motility of microorganisms.

Indore Institute of Pharmacy, Indore

Course Outcome

(BP-308P) Pharmaceutical Engineering (practical)	C.308.1	Determine the radiation constant of different materials used in pharmaceutical manufacturing
	C.308.2	Demonstrate the various factors influencing filtration and evaporation rate
	C.308.3	Explain humidity & drying and construct psychometric chart and drying curve
	C.308.4	Demonstrate the principle and working of ball mill and sieve shaker

Indore Institute of Pharmacy
INDORE (M.P.)

Indore Institute of Pharmacy, Indore Course Outcome

B. Pharmacy III Year / IV Sem Course Outcome	
Course code/ Course name	
(BP-401T) PHARMACEU TICAL ORGANIC CHEMISTRY	C.401.1 Relate the mechanism of stereoisomerism with organic compounds
	C.401.2 Illustrate basic concepts of Geometrical isomerism of various organic compounds
	C.401.3 Classify and study the nomenclature of heterocyclic compounds
	C.401.4 Summarize the methods of preparation and properties of organic compounds
	C.401.5 Recall reactions of synthetic importance
(BP-402T) MEDICINAL CHEMISTRY	C.402.1 Recall the concept of physiochemical properties of drug molecules in relation to drug activity.
	C.402.2 To assess Structural Activity relationship, mechanism of action, classification, and uses of drugs acting on the Autonomic nervous system.
	C.402.3 To classify sympathetic and parasympathetic agents with SAR of selective drugs
	C.402.4 To extend the knowledge of drugs acting on Central Nervous Systems like sedatives, antipsychotics anticonvulsants etc.
	C.402.5 To explain the Structural Activity relationship, mechanism of action, classification, and uses of General Anesthetics
(BP-403T) PHYSICAL PHARMACEU TICS -II	C.403.1 Classify the types of dispersions such as coarse and colloidal and to discuss their importance and properties and explain Suspension and Emulsion with their properties and evaluation parameters.
	C.403.2 Explain rheology, different flow systems, and their importance in pharmaceuticals.
	C.403.3 Examine the role of surfactant, surface tension, interfacial tension, and related properties of the drug during formulation.
	C.403.4 Illustrate the concept of micromeritics
	C.403.5 Demonstrate the role of various physical and chemical factors in drug stability and reaction kinetics

Indore Institute of Pharmacy, Indore
Course Outcome

(BP-404T) PHARMACOLOGY	C.404.1	Infer principle concept of pharmacology
	C.404.2	Relate and develop fundamentals of pharmacokinetics and pharmacodynamics
	C.404.3	Explain the pharmacology of drugs acting on the peripheral nervous system
	C.404.4	Make use of pharmacology to study drug activity in CNS
	C.404.5	Apply basic knowledge of pharmacology in the prevention and treatment of various diseases
(BP-405T) PHARMACOGNOSY and PHYTOCHEMISTRY - I	C405.1	Summarize general introduction of pharmacognosy, classification of crude drugs, and quality control of drugs of natural origin
	C405.2	Explain the cultivation, collection, processing, and storage of drugs of natural origin
	C405.3	Elaborate on the concept of plant tissue culture
	C405.4	Illustrate different systems of medicines and classification of secondary metabolites
	C405.5	Discuss pharmacognostic parameters of primary metabolites, plant products enzymes, proteins, enzymes, and marine drugs
(BP-409P) PHARMACOGNOSY - I	C.409.1	Understand the concept of swelling and foaming index
	C.409.2	Examine the chemical properties of different secondary metabolites
	C.409.3	Estimate different leaf constants
	C.409.4	Appraise the knowledge of quantitative microscopy
	C.409.5	Analyze the crud drugs on basis of physical parameters
(BP-406P) MEDICINAL CHEMISTRY - I	C.407.1	Assess synthesis and characterization of Benzimidazole having antimicrobial property
	C.407.2	Examine the antipyretic property of 1,3-pyrazole with Synthesis and Characterization
	C.407.3	Assess different drugs with Assay
	C.407.4	Estimate partition coefficient of any two drugs

INDORE (M.P.)

Principal
Indore Institute of Pharmacy,
INDORE (M.P.)

Indore Institute of Pharmacy, Indore
Course Outcome

B. Pharmacy III Year / V Sem		
Course code/ Course name	Course Outcome	
Medicinal Chemistry-II (BP 501T)	C 501.1	Summarize the chemistry of antihistaminic, H1 - and H2 antagonists, Gastric Proton pump inhibitors, and antiinflammatorydrugs with respect to their pharmacological activity.
	C501.2	Outline the drug metabolic pathway, adverse effects, and therapeutic value of anti-anginal, diuretics, and antihypertensivedrugs with their structure-activity relationship.
	C501.3	Know the structure-activity relationship of antiarrhythmic, antihyperlipidemic, couguant-anticoagulants and drugs used in congestive heart failure
	C501.4	Summarize the synthesis and effects of drugs acting on the endocrine system
	C501.5	Explain the chemistry andpharmacological properties and metabolism of the antidiabetic and local anesthetic drugs.
Industrial Pharmacy-1 (BPS02T)	C 502.1	Analyze various Preformulation parameters for different dosage forms (solid, liquid, etc.) including their physical and chemical properties.
	C502.2	Explain formulation considerations (selection of excipients and their role in formulation) and evaluation parameters of tablets, capsules, pellets, and liquid orals.
	C502.3	Outline formulation considerations (selection of excipients and their role in formulation) and evaluation parameters of parenteral and ophthalmic
	C502.4	Formulate various cosmetics preparations like lipsticks, shampoo, cold creams, vanishing creams, etc.
	C502.5	Define, evaluate and perform quality control and stability studies of pharmaceutical aerosols. Explain various pharmaceutical packaging materials, containers, their quality-control tests, and stability aspects
Pharmacology- II (BP503T)	C 503.1	Demonstrate the mechanism of drug action and its relevance in the treatment of the cardiovascular system.
	C503.2	Explain the mechanism of drug action and its relevance in the treatment of the cardiovascular and urinary system.

Indore Institute of Pharmacy, Indore

Course Outcome

	C503.3	Illustrate the correlation of pharmacology with related to Autocoids and related drugs.
	C503.4	Relate and Impart the fundamental knowledge of the various aspect of a drug acting on the endocrine system
	C503.5	Outline and emphasize the basic concept of bioassay.
Pharmacognosy and Phytochemistry-II (BPS04T)	C 504.1	Develop the knowledge about secondary metabolites produced in crude drugs. Outline the utilization of radioactive isotopes.
	C504.2	Explain the general introduction, composition, chemistry, therapeutic use, and application of secondary metabolites, Alkaloids, steroids, etc.
	C504.3	Show how to carry out the identification, isolation and analysis of Phytoconstituents
	C504.4	Relate Industrial production, estimation and utilization of Phytoconstituents
	C504.5	Summarize the basics of phytochemistry and herbal drug technology
Pharmaceutical Jurisprudence (BPS05T)	C 505.1	Rephrase and impart the knowledge of the drug and cosmetic act and its rule.
	C505.2	Detail study of the various parameter of the drug and cosmetic act and rules including various schedules, sale of drugs, labeling and packaging of drugs, administration of the act and rules.
	C505.3	Outline Pharmacy act with reference to medicinal and toilet preparation act, Narcotic Drugs and psychotropic substances act.
	C505.4	Summarize the study of salient features of drugs and magic remedies act and its rules, Prevention of cruelty to animal act - 1960 along with National Pharmaceutical pricing authority
	C505.5	Define pharmaceutical legislation, Code of ethics, medical termination of pregnancy act, Right to information act and Introduction to IPR during pharmaceutical practice.
Industrial Pharmacy-I (BPS06P)	C 506.1	Explain the preformulation study of paracetamol/ aspirin or any drug
	C5062	Formulate and evaluate solid dosage form (Paracetamol tablet/ Aspirin Tablet/ film coating tablet or granules/ Tetracyclines capsules)
	C506.3	Formulate liquid dosage form (Glucoside injection, Ascorbic acid injection and eye drop)
	C506.4	Formulate semisolid dosage form (eye ointment, cold cream and vanishing cream)
	C506.5	Evaluation of glass test as per IP

Indore Institute of Pharmacy, Indore
Course Outcome

Pharmacology – II (BP507P)	C507.1	Relate the techniques and mechanism DRC of various drugs.
	C507.2	Demonstrate isolation of different organs from the laboratory animal by simulated experiments.
	C507.3	Demonstrate isolation of different tissues from the laboratory animal by simulated experiments.
	C507.4	Demonstrate various receptor actions using isolated tissue preparation.
Pharmacognosy and Phytochemistry-II (BP508P)	C508.1	Evaluate the plants and phytochemicals from plant tissue culture on the basis of morphology, histology and characteristics.
	C508.2	Demonstrate isolation and detection of active constituents of various plants.
	C508.3	Demonstrate identification, isolation and analysis of Phytoconstituents
	C508.4	Demonstrate separation and detection of phytoconstituents with the help of TLC and paper chromatography
	C508.5	Analyze the crude drug by chemical test

Course code/ Course name	Course Outcome	
(BP-601T) Medicinal Chemistry -III	C601.1	Outline the fundamentals of medicinal chemistry, SAR and synthesis of classical antibiotics like β -lactam antibiotics, aminoglycosides and tetracyclines
	C601.2	Classify, and outline the medicinal chemistry, SAR and synthesis of antibiotics, chemotherapeutic agents like macrolides, anti-malarial and prodrugs.
	C601.3	Elaborate the medicinal chemistry, SAR and synthesis of antiviral, antitubercular drugs and urinary tract anti-infectives.
	C601.4	Explain the medicinal chemistry, SAR and synthesis of antifungal drugs, anthelmintics, antiprotozoal and sulphonamide class of drugs.
	C601.5	Explain the concepts of drug design, QSAR and combinatorial chemistry.
Pharmacology III (BP-602T)	C602.1	Explain the pharmacology of drugs acting on the Respiratory and Gastrointestinal system
	C602.2	Explain the mechanism of drug action and its relevance in the treatment of different infectious diseases and cancer
	C602.3	Describe the chemotherapy of antitubercular agents, antifungal, antiviral, anthelmintics and antimicrobial agents.
	C602.4	Describe the chemotherapy for UTI, STD and immunopharmacology
	C602.5	Comprehend the principles of toxicology and treatment of various types of poisoning and the concept of immunopharmacology and chronopharmacology.
Herbal Drug Technology (BP- 603T)	C603.1	Impart knowledge of herbs as raw materials, Biodynamic agriculture and the Indian System of Medicine

Principals
Indore Institute of Pharmacy
INDORE (M.P.)

Indore Institute of Pharmacy, Indore Course Outcome

	C603.2	Outline the general market, scope, and types of products available in neutraceuticals and herb-drug-food interactions.
	C603.3	Explain the sources of and description of herbal cosmetics, herbal excipients and herbal formulations.
	C603.4	Analyze and developed Good manufacturing practices (GMP), patenting and regulatory aspects of herbal drugs.
	C603.5	Outline of plant-based industries and institutions involved in work on medicinal and aromatic plants in India along with schedule-T of drugs and cosmetics act.
	C604.1	Explain the concepts of biopharmaceutics and their applications in pharmaceutical development.
Biopharmaceutics and Pharmacokinetics (BP-604T)	C604.2	Describe the kinetics of elimination. Explain the concept of bioavailability and Bioequivalence
	C604.3	Learn the use of plasma-level time data to calculate secondary pharmacokinetic parameters
	C604.4	Explain the concept of multicompartment models.
	C604.5	Appraise non-linear pharmacokinetics with examples of drugs.
	C605.1	Elaborate on the importance of enzymes biotechnology, Biosensors, Protein Engg, use of microbes in pharmaceutical industries
Pharmaceutical Biotechnology (BP-605T)	C605.2	Learn the use of genetic engineering techniques for the production of pharmaceuticals
	C605.3	outline the concept of Humoral Immunity and cellular immunity
	C605.4	Learn and outline the basic principles of immunology and how it is used for the production of vaccines and blood preservation techniques
	C605.5	Appraise the use of fermentation technology in the pharmaceutical industries
	C606.1	Outline the cGMP, TQM, QbD, ISO and NABL accreditation aspects of the pharmaceutical industries

Indore Institute of Pharmacy
INDORE (M.P.)

Principal
Indore Institute of Pharmacy,
INDORE (M.P.)

**Indore Institute of Pharmacy, Indore
Course Outcome**

60613 Medicinal Chemistry -III (Practical) (BP- 607P)	C606.2	Explain the important aspects of organization and personnel, premises and equipment and raw material.
	C606.3	Learn and outline the basic principles guidelines issued by various regulatory agencies on quality control and GLP
	C606.4	Appreciate the importance of documentation in the pharmaceutical industry.
	C606.5	Appraise calibration and validation techniques
Medicinal Chemistry -III (Practical) (BP- 607P)	C607.1	Design and build drugs along with their intermediates
	C607.2	Perform and understand the assay methods of some important antibiotics
	C607.3	Perform the synthesis of important intermediates and drugs using microwave irradiation methods
	C607.4	Learn how to use the computer programs to draw chemical structures
	C607.5	Learn, apply and appraise Lipinski's rule of five using computer-assisted methods
Pharmacology (Practical) (BP- 608P)	C608.1	Outline the concept of dose calculation in pharmacology experiments
	C608.2	Demonstrate the action of drugs on the respiratory and gastrointestinal tract using software
	C608.3	Determine acute toxicity of drugs by given data
	C608.4	Illustrate calculation of Pharmacokinetic parameters
	C608.5	Learn the application of biostatistics methods in experimental pharmacology
Herbal Drug Technology (Practical) (BP- 609P)	C609.1	Perform preliminary phytochemical screening of crude drugs
	C609.2	Evaluate the excipients of natural origin
	C609.3	Perform monograph analysis of some pharmacopoeial drugs
	C609.4	Prepare and standardize formulations containing crude drug extracts
	C609.5	Analyze crude drugs for secondary metabolite content

B. Pharmacy III Year / VII Sem		
Course code/ Course name	Course Outcome	
(PY 7011) Instrumental methods of analysis	C.701.1	Extend knowledge of the introduction, instrumentation and applications of UV Visible Spectroscopy and Fluorimetry.
	C.701.2	Discuss the basic fundamental aspects of quantitative & qualitative analysis of drugs using various analytical instruments like IR Spectroscopy, Flame Photometry, atomic absorption Spectroscopy and Nepheloturbidometry.
	C.701.3	Illustrate the principle and methodology of chromatographic separation by various techniques like Adsorption and partition column chromatography, T.L.C., Paper chromatography and Electrophoresis with their applications.
	C.701.4	Demonstrate the principle, instrumentation and analysis of compounds using GC and H.P.L.C.
	C.701.5	Explain the mechanism, instrumentation and applications of separation techniques i.e., ion exchange chromatography, Gel chromatography and affinity chromatography.
(PY 7021) Industrial Pharmacy II	C.702.1	Define the process of pilot plant scale-up of techniques
	C.702.2	Outline the process of technology transfer from lab scale to commercial batch.
	C.702.3	Interpret regulatory affairs and regulatory requirements for the approval process of drug products.
	C.702.4	Define quality management and certifications for quality like QbD, OOS, ISO, GLP etc.
	C.702.5	Develop concepts of different Laws and Acts that regulate the pharmaceutical industry as per Indian Regulatory Requirements like CDSCO, COPP etc.
(PY 7031) Pharmacy Practice	C.703.1	Outline the organization, layout, and roles of the hospital and hospital pharmacy and community pharmacy. Analyzing the adverse drug reactions and managing them.
	C.703.2	Construct the concepts of drug distribution in hospitals and plan the hospital formulary. Inset the need for TDM and summarizing drug therapy of patient through medication chart review and community pharmacy management.

Principal
Indore Institute of Pharmacy,
INDORE (M.P.)

Principal
Indore Institute of Pharmacy,
INDORE (M.P.)

**Indore Institute of Pharmacy, Indore
Course Outcome**

	C.703.3	Construction of Pharmacy and Therapeutics Committee, interpretation of the sources of drug information services and prescription orders. Need for patient counseling and importance of training and education program in hospital, Prescribed medication order and communication skills.
	C.703.4	Plan of budget preparation and its implementation, in clinical pharmacy, Identifying the OTC sales and Rational use of drugs.
	C.703.5	Explain the drug store management and inventory control, Interpretation of laboratory results of specific diseases and summarizing the investigational use of drugs.
(PY 704T) Novel Drug Delivery System	C.704.1	Relate the principles and rationale of drug delivery with the current and future approaches to controlled drug delivery and drug targeting using Polymers
	C.704.2	Summarize microencapsulation and fabrication of mucosal and implantable drug delivery system
	C.704.3	Demonstrate development of site-specific drug delivery like nasopulmonary, transdermal drug delivery systems, GRDDS
	C.704.4	Illustrate the targeted drug delivery system using liposomes, nanoparticles etc.
	C.704.5	Distinguish site-specific drug delivery like ocular and intrauterine drug delivery systems.
(PY 705P) Instrumental methods of analysis (Practical)	C.705.1	Determination of absorption maxima of various organic compounds
	C.705.2	Perform assay and simultaneous estimation by UV spectroscopy
	C.705.3	Separation of compounds by Paper chromatography and TLC
	C.705.4	Demonstrate the analysis of compounds using spectroscopic methods
	C.705.5	Demonstration of instrumentation of HPLC & Gas Chromatography

Course Outcome-Program Outcome

	C.106.4	Define basic concepts of plant nutrients and photosynthesis.	3	1	2	1	-	-	1	2	-	-	2
	C.106.5	Describe plasmolysis, growth, and development of plant and cell structure and tissue.	3	1	2	1	-	-	1	2	-	-	2
(BP-106) Remedial mathematics	C.106M.1	Know the introduction of partial fraction, logarithm, function, and limits, and continuity.	3	1	2	1	-	-	1	2	-	-	2
	C.106M.2	Solve the different types of problems by applying matrices and determinants.	3	1	2	1	-	-	1	2	-	-	2
	C.106M.3	Appreciate and understand the principles and solve the problem related to calculus.	3	1	2	1	-	-	1	2	-	-	2
	C.106M.4	Summarize the principle and application of analytical Geometry.	3	1	2	1	-	-	1	2	-	-	2
	C.106M.5	Explain the principle of geometry, differential equation, and Laplace transform.	3	1	2	1	-	-	1	2	-	-	2
(BP-107) Human Anatomy & Physiology (Practical)	C.107.1	Model physiological processes discussed in theory classes through experiments on normal human beings.	3	1	2	1	-	-	1	2	-	-	2
	C.107.2	Study microscopic demonstration of the cells & tissues.	3	1	2	1	-	-	1	2	-	-	2
	C.107.3	Identify various systems using charts, models & specimens.	3	1	2	1	-	-	1	2	-	-	2
	C.107.4	Analyze human blood sample.	3	1	2	1	-	-	1	2	-	-	2
(BP-108P) Pharmaceutical	C.108.1	Learn the art of performing limit tests of some common impurities.	3	1	2	1	-	-	1	2	-	-	2

Indore Institute of Pharmacy, Indore
Course Outcome-Program Outcome

Analysis (Practical)	C.I08.2	Demonstrate the art of preparation and standardization of primary and secondary standards	3	2	1	-	3	2	1	1	+	+	2
	C.I08.3	Perform and learn the technique of assay	3	2	1	-	1	2	1	1	+	+	2
	C.I08.4	Determine Normality using various electro-analytical methods	3	2	1	-	3	1	1	1	-	-	1
(BP-109P) Pharmaceutics I (Practical)	C.I09.1	Understand the basics of different dosage forms and pharmaceutics	3	3	1	-	1	2	2	2	+	2	1
	C.I09.2	Formulation and dispensing of liquid dosage forms	3	3	1	-	1	2	2	1	+	2	2
	C.I09.3	Formulation and dispensing of solid dosage form	3	3	1	-	1	2	2	2	-	1	2
	C.I09.4	Formulation and dispensing of semi-solid dosage form	3	3	1	-	1	2	2	2	-	2	2
(BP-110P) Pharmaceutical Inorganic Chemistry (Practical)	C.I10.1	Analyze qualitative determination of impurities via Limit Test	3	2	1	-	1	2	1	2	+	+	2
	C.I10.2	Learn to identify different inorganic compounds	3	2	1	-	1	2	1	1	-	-	2
	C.I10.3	Determine the purity of Bentonite, Aluminium Hydroxide Gel, etc.	3	2	1	-	1	2	1	2	-	-	2
	C.I10.4	Elaborate preparation and use of Boric Acid, Potash Alum, and Ferrus Sulfate	3	2	1	-	1	2	1	1	+	+	2
(BP-111P) Communication Skills (Practical)	C.I11.1	Identify and learn socializing and etiquette	3	2	1	-	1	1	1	2	+	+	2
	C.I11.2	Adapting the correct use of pronunciation (Consonant and vowel sounds)	3	2	1	-	1	1	1	2	+	+	2
	C.I11.3	Develop the use of humor and figures of speech	3	2	1	-	1	1	1	2	-	-	2

B. Pharmacy II Year / III Sem		PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11	
Course code/ Course name	Course Outcome	1	2	-	-	1	1	-	1	-	-	3	
(BP-301) PHARMACEUTICAL CHEMISTRY-III (ORGANIC CHEMISTRY-II)	C301.1	Interpret the structure reactions and substituents of Benzene and its derivative.	3	2	-	-	1	1	-	1	-	-	3
	C301.2	Explain the methods of preparation, reactions and the type of isomerism of the Phenol, aromatic amines and aromatic acids.	3	2	-	-	1	1	-	2	-	-	3
	C301.3	Elaborate various reactions and properties of fats and oils.	3	2	-	-	1	1	-	2	-	-	3
	C301.4	Explain synthesis and uses of polynuclear hydrocarbons.	3	2	-	-	1	1	-	2	-	-	3
	C301.5	Label general methods of preparation and reactions of Cyclo alkanes compounds.	3	2	-	-	1	1	-	2	-	-	3
(BP-302) Physical Pharmacology	C302.1	Outline solubility and its application in pharmaceuticals.	3	2	3	1	-	1	2	1	2	-	2
	C302.2	Explain the basic concept of states of matter with its properties and the physicochemical properties of drug molecules.	3	2	3	1	-	1	2	1	2	-	2
	C302.3	Explain the role of surfactants, surface tension, interfacial tension, and related properties the of the drug during formulation.	3	2	3	1	-	1	2	1	2	-	2

Indore Institute of Pharmacy, Indore
Course Outcome-Program Outcome

(BP-303T) Microbiology	C302.4	Explain the concept of complexation and protein binding.	3	2	3	1	-	1	2	1	1	-	2
	C302.5	Apply principles of pH, buffers, and isotonic solutions.	3	2	3	1	-	1	2	1	1	-	2
	C303.1	Explain methods of identification, cultivation, and preservation of various microorganisms (Prokaryotes, Eukaryotes and Facteria).	3	2	3	1	-	1	1	1	1	-	3
	C303.2	Interpret the importance and implementation of sterilization and aseptic conditions in pharmaceutical processing and industry.	3	2	3	3	-	1	2	2	1	3	2
	C303.3	Define fungi and viruses and sterility testing of pharmaceutical products.	3	1	1	3	-	1	1	1	2	1	2
	C303.4	Outline the cell culture technology, aseptic area, and methods of standardization.	3	3	3	3	-	2	1	1	2	3	2
(BP-304T) Pharmaceutics Engineering	C304.1	Explain various operations of the flow of fluids, size reduction & size separation.	3	2	1	1	-	1	2	1	2	-	2
	C304.2	Relate the principles and operations involved in heat transfer, Evaporation, and Distillation.	3	2	1	1	-	1	2	1	3	-	2
	C304.3	Explain the concept of drying and mixing with the equipment used.	3	2	1	1	-	1	2	1	2	-	2

Indore Institute of Pharmacy, Indore
Course Outcome-Program Outcome

(BP-303P) Pharmaceutical Isomer chemistry (practical)	C304.4	Outline the concept of Filtration and centrifugation with the equipment used.	3	2	3	1	-	1	1	1	1	-	2
	C304.5	Explain the concept of material of pharmaceutical plant construction, corrosion, and its prevention.	3	2	3	1	-	1	1	1	1	-	2
	C305.1	Apply the common laboratory techniques like recrystallization and steam distillation.	3	2	1	-	2	2	1	2	-	-	3
	C305.2	Demonstrate the significance and process of determination of oil values including acid values, saponification values and iodine value.	3	2	1	-	2	1	1	2	-	-	3
	C305.3	Outline the synthesis of basic organic compounds by various reaction mechanisms including nitration, bromination, acetylation	3	2	1	-	2	1	1	1	-	-	2
	C305.4	Outline the synthesis of basic organic compounds by various reaction mechanisms including hydrolysis, oxidation, and some nucleophilic reactions	3	2	1	-	2	2	1	2	-	-	2
(BP-306P) Physical Pharmaceutics I (practical)	C306.1	Explain a basic understanding of solubility determination.	3	2	3	1	-	1	2	1	2	-	2
	C306.2	Demonstrate the significance and process of determination of pKa and partition coefficient, and surface tension by various methods.	3	2	3	1	-	1	2	1	3	-	2
	C306.3	Determine the stability of the compounds by various methods	3	2	3	1	-	1	2	1	2	-	2

Indore Institute of Pharmacy, Indore
Course Outcome-Program Outcome

CHEMIS TRY-I	C40 5.3	Elaborate on the concept of plant tissue culture	3	1	1	1	1	2	1	1	2
	C40 5.4	Illustrate different systems of medicines and classification of secondary metabolites	3	1	1	1	1	2	1	1	2
	C40 5.5	Discuss pharmacogenetic parameters of primary metabolites, plant products, enzymes, proteins, enzymes, and various drugs	3	1	1	1	1	2	1	1	2
(BP- 4091) PHARM ACOGN OSY-I	C4 09.1	Understand the concept of swelling and foaming index	3	1	1	1	1				3
	C4 09.2	Examine the chemical properties of different secondary metabolites	3	1	1	1	1				3
	C4 09.3	Estimate different leaf constants	3	1	1	1	1				3
	C4 09.4	Appraise the knowledge of quantitative microscopy	3	1	1	1	1				3
	C4 09.5	Analyze the crude drugs on basis of physical parameters	3	1	1	1	1				3
(BP- 406P) MEDIC INAL	C4 07.1	Assess synthesis and characterization of Benzimidazole having antimicrobial property	3	2	2	2	2	1	2	1	2
	C4 07.2	Examine the antipyretic property of 1,3-pyrazole with Synthesis and Characterization	3	2	2	2	2	2	2	1	2
CHEMIS TRY-I	C4 07.3	Assess different drugs with Assay	3	2	2	2	2	1	2	1	2
	C4 07.4	Estimate partition coefficient of any two drugs	3	2	2	2	2	1	2	1	2

(B.P. 407P) PHYSIC AL PHARM ACCUT CS-II	C40 S.1	Summarize general introduction of pharmacognosy, classification of crude drugs, and quality control of drugs of natural origin	3	2	1		1	2	1	1	2	
	C40 S.2	Explain the cultivation, collection, processing, and storage of drugs of natural origin	3	2	1		1	1	2	1	1	2
	C40 S.3	Illustrate the concept of plant tissue culture	3	2	1		1	1	2	1	1	2
	C40 S.4	Illustrate different systems of medicines and classification of secondary metabolites	3	2	1		1	1	2	1	1	2
	C40 S.5	Study of pharmacological parameters of primary metabolites, plant products enzymes, proteins, enzymes, and marine drugs	3	2	1		1	1	2	1	1	2
	C40 S.1	Identify and study common laboratory reagents	3	2	1		1	1	2	1	1	2
	C40 S.2	Analyze commonly used instruments in experimental pharmacology	3	2	1		1	1	2	1	1	2
	C40 S.3	Illustrate the maintenance of laboratory animals	3	2	1		1	1	2	1	1	2
	C40 S.4	Explain common laboratory techniques like blood withdrawal etc	3	2	1		1	1	2	1	1	2
	C40 S.5	Estimate the effect of drugs with different animal models	3	2	1		1	1	2	1	1	2

Course Outcome-Program Outcome

II. Pharmacy III Year / V Sem		PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PO9	PO10	PO11
Course code/ Course name	Course Outcome											
Medicinal Chemistry-II (BP-501T)	C301.1 Summarize the chemistry of anti-tumour, H+, and P2 antagonists, Gastric Protease pump inhibitors, and antimicrobial drugs with respect to their pharmacological activity.	3	2	2	1	1	1	1	1	1	1	2
	C301.2 Outline the drug metabolic pathway, adverse effects, and therapeutic value of anti-microbial, diuretics, and anti-hypertensive drugs with their structure-activity relationship.	3	1	1	2	1	1	2	1	1	1	2
	C301.3 Know the structure-activity relationship of antiarrhythmic, anti-hypertensive, coagulant-anticoagulants and drugs used in congestive heart failure.	3	2	2	2	1	1	2	1	1	1	2
	C301.4 Summarize the synthesis and effects of drugs acting on the endocrine system.	3	1		2	1	1	2	1	1	1	2
	C301.5 Explain the chemistry, pharmacological properties and mechanism of the antidiabetic and local anesthetic drugs.	2	2		1	1	1	2	1	1	1	2
Industrial Pharmacy-I (BPS502T)	C502.1 Analyze various Preformulation parameters for different dosage forms (solid, liquid, etc.) including their physical and chemical properties.	3	2	2	2	1	1	1	1	1	1	2
	C502.2 Explain formulation considerations (selection of excipients and their role in formulation) and evaluate parameters of tablets, capsules, pellets, and liquid oral.	3	1	1	1	2	1	1	1	1	1	2

Indore Institute of Pharmacy, Indore Course Outcome-Program Outcome									
Pharmacology-II (BP5077)	C502. 3	Outline formulation considerations (selection of excipients and their role in formulation) and evaluation parameters of parenteral and ophthalmic	3	1	1	1	2	1	2
			3	1	1	1	2	1	2
			3	1	1	1	2	1	2
	C 503.1	Demonstrate the mechanisms of drug action and its relevance in the treatment of the cardiovascular system.	3	1	1	1	3	3	2
		Explain the mechanism of drug action and its relevance in the treatment of the cardiovascular and urinary system.	3	1	1	1	3	3	2
		Illustrate the correlation of pharmacology with related to Antacids and related drugs.	3	1	1	1	3	3	2
		Relate and impart the fundamental knowledge of the various aspect of a drug acting on the endocrine system.	3	1	1	1	3	3	2
		Outline and emphasize the basic concept of bioassay.	3	1	1	1	3	3	2
Pharmaceutics and Physiotherapy-II (BP5047)	C 504.1	Develop the knowledge about secondary metabolites produced in crude drugs. Outline the utilization of radioactive isotopes.	3	2	2	2	2	1	2
		Explain the general introduction, composition, chemistry, therapeutic use, and application of secondary metabolites. Alkaloids, steroids, etc.	3	2	2	2	2	1	2

Indore Institute of Pharmacy, Indore

Course Outcome-Program Outcome

Pharmaceutical Jurisprudence (BP503T)	C504. 3	How to carry out the identification, isolation and analysis of Phytoconstituents	5	1	2	1	2	1	1	2	1	1
	C504. 4	Rehearse Industrial production, estimation and utilization of Phytoconstituents	5	2	2	2	2	1	2	2	2	2
	C504. 5	Summarize the basics of phytochemistry and herbal drug technology	5	2	2	2	2	1	2	2	2	2
	C505. 1	Reiterate and Impart the knowledge of the drug and cosmetic act and its rule.	5			3	3	1	3		2	
	C505. 2	Detailed study of the various parameter of the drug and cosmetic act and rules including various schedules, sale of drugs, labeling and packaging of drugs, administration of the act and rules.	5			3	3	1	3		2	
	C505. 3	Outline Pharmacy act with reference to medicinal and toilet preparation act, Narcotic Drugs and psychotropic substances act	5			3	3	1	3		2	
	C505. 4	Summarize the study of patient features of drugs and major remedies act and its rules, Prevention of cruelty to animal act - 1960 along with National Pharmaceutical pricing authority	5			3	3	1	3		2	
	C505. 5	Define pharmaceutical legislation, Code of ethics, medical termination of pregnancy act, Right to information act and introduction to IPR during pharmaceutical practice	5			3	3	1	3		2	
	C506. 1	Explain the preformulation study of paracetamol/ aspirin or any drug	3	1	2	2	1	2				3
	C5062	Formulate and evaluate solid dosage form (Paracetamol tablet/ Aspirin Tablet/ film coating tablet or granules / Tetracyclines capsules)	3	2	2	3	1	2	2			3

Courses (BP-604)	C604.	2	Indore Institute of Pharmacy, Indore							
			1	2	3	4	5	6	7	8
Pharmaceutical Biotechnology (BP-605T)	C604.	2	Describe the kinetics of elimination. Explain the concept of bioavailability and Bioequivalence.	3	1	2	1	2	1	1
	C604.	3	Learn the use of plasma-level time data to calculate secondary pharmacokinetic parameters.	3	1	2	1	1	1	2
	C604.	4	Explain the concept of multicompartment models.	3	1	2	2	1	1	1
	C604.	5	Appraise non-linear pharmacokinetics with examples of drugs.	3	2	2	1	2	1	1
Pharmaceutical Biotechnology (BP-605T)	C605.	1	Elaborate on the importance of enzymes biotechnology, Biosensors, Protein Engineering, use of microbes in pharmaceutical industries	3		1	2	1	1	1
	C605.	2	Learn the use of genetic engineering techniques for the production of pharmaceuticals	3	2	2	3	1	2	1
	C605.	3	outline the concept of Humoral Immunity and cellular immunity	3	1	2	3	2	2	1
	C605.	4	Learn and outline the basic principles of immunology and how it is used for the production of vaccines and blood preservation techniques	3	3	2	3	1	2	1
Pharmaceutical Quality Assurance	C605.	5	Appraise the use of fermentation technology in the pharmaceutical industries	3	2	2	3	1	3	2
	C606.	1	Outline the cGMP, TQM, QbD, ISO and NABL accreditation aspects of the pharmaceutical industries	3	2	2		1	2	1

Principal

(BP-6061)	C606. 2	Explain the important aspects of organization and personnel, premises and equipment and raw material.	3	2	2			1	2	1			2
	C606. 3	Learn and outline the basic principles/guidelines issued by various regulatory agencies on quality control and GLP	3	2	2	*		1	2	1			2
	C606. 4	Appreciate the importance of documentation in the pharmaceutical industry.	3	2	2			1	2	1			2
	C606. 5	Appraise calibration and validation techniques	3	2	2			1	2	1			2
	C607. 1	Design and build drugs along with their intermediates	3	2	2			2	1	2	2		2
	C607. 2	Perform and understand the assay methods of some important antibiotics	3	2	2			2	1	2	2		2
	C607. 3	Perform fine synthesis of important intermediates and drugs using microwave irradiation methods	3	2	2	2	2	1	2	2			2
	C607. 4	Learn how to use the computer programs to draw chemical structures	3	2	2	2	2	1	2	2			2
	C607. 5	Learn, apply and appreciate Lipinski's rule of five using computer-assisted methods	3	2	2		2	1	2	2			2
	C608. 1	Outline the concept of dose calculation in pharmacology experiments	3	2	2	1	1		1	2			2
(BP-607P)	C608. 2	Demonstrate the action of drugs on the respiratory and gastrointestinal tract using software	3	2	2	1	1		1	2			2
	C608. 3	Determine acute toxicity of drugs by given data	3	2	2	1	1		1	2			2

		B. Pharmacy III Year / VII Sem		PO 1	PO 2	PO 3	PO 4	PO 5	PO 6	PO 7	PO 8	PO 9	POI 0	POI 1
		Course Outcome												
(PY 701) Instrumental methods of analysis	C701. 1	Extend knowledge of the introduction, instrumentation and applications of UV Visible Spectroscopy and Fluorimetry.		3	2	2	3	2	1		2		1	3
	C701. 2	Discuss the basic fundamental aspects of quantitative & qualitative analysis of drugs using various analytical instruments like IR Spectroscopy, Flame Photometry, atomic absorption Spectroscopy and Nepheloturbidometry.		3	2	2	3	2	1		2	2		3
	C701. 3	Illustrate the principle and methodology of chromatographic separation by various techniques like Adsorption and partition column chromatography, TLC, Paper chromatography and Electrophoresis with their applications.		3	2	3	3	2	1	2	2	1	1	3
	C701. 4	Demonstrate the principle, instrumentation and analysis of compounds using GC and HPLC.		2	2	3	3	2	2	1	2	1	1	3
	C701. 5	Explain the mechanism, instrumentation and applications of separation techniques i.e., Ion exchange chromatography, Gel chromatography and affinity chromatography.		3	3	3		1	1	1	2	1	1	2
(PY 702T) Industrial Pharmacy II	C702. 1	Define the process of pilot plant scale-up of techniques.		3	3	1		1	1	2		2		3
	C702. 2	Outline the process of technology transfer from lab scale to commercial batch.		1	2	1		1	2	2		1		3

Principal
Indore Institute of Pharmacy,
INDORE (M.P.)

Indore Institute of Pharmacy, Indore Course Outcome-Program Outcome										
C.702. 3	Interpret regulatory affairs and regulatory requirements for the approval process of drug products.	1	1	1	2	2	2	1	1	3
C.702. 4	Define quality management and certifications for quality like QbD, QOS, ISO, GLP etc.	2	1	1	2	2	2	1	1	3
C.702. 5	Develop concepts of different Laws and Acts that regulate the pharmaceutical industry as per Indian Regulatory Requirements like CDSCO, CQPP etc.	2	1	1	2	2	2	1	1	3
(PV 0031) Pharmacy Practice	C.703. 1	Outline the organization, layout, and roles of the hospital and hospital pharmacy and community pharmacy. Analyzing the adverse drug reactions and managing them.	1	1	1	2	3	1	2	3
	C.703. 2	Consort the concepts of drug distribution in hospitals and plan the hospital formulary. Under the need for TDM and summarizing drug therapy of patient through medication chart review and community pharmacy management.	2	2	1	2	2	1	2	3
	C.703. 3	Construction of Pharmacy and Therapeutics Committee. Interpretation of the sources of drug information services and prescription orders. Need for patient counseling and importance of training and education program in hospital. Prescribed medication orders and communication skills.	1	1	1	2	3	1	1	3
	C.703. 4	Plan of toolkit preparation and its implementation, clinical pharmacy. Identifying the OTC sides and Rational use of drugs.	1	1	1	2	3	1	2	1
	C.703. 5	Explain the drug store management and inventory control. Interpretation of laboratory results of specific diseases and summarizing the investigational use of drugs.	1	1	1	1	3	1	1	3

M. PHARMACY (P'Ceutics & QA)

Indore Institute of Pharmacy, Indore

M. Pharmacy (PCS & QA) PEO

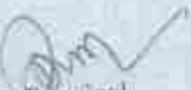

To make post-graduates working as successful and advanced practitioners of Pharmacy profession.

To make them well versed in core technical skills and knowledge with an attitude of service and commitment for social duties.

To develop the urge and inclination for output-oriented research.

Principal
Indore Institute of Pharmacy,
INDORE (M.P.)

Principal
Indore Institute of Pharmacy,

Indore Institute of Pharmacy, Indore

M. Pharm. (QA)

PSO-1—Create a talent pool that can be well versed with the application-based importance of Emerging Quality Building Concepts as per regulatory guidelines to build up the quality in the pharmaceutical product.

PSO-2 To be competent in writing, interpreting and communicating scientifically and effectively for fulfilling the desire of quality assurance department of Pharmaceuticals

PSO-3 Empower and sensitize the quality assurance professionals to serve the pharmaceutical industry, academia and the society.

Principal
Indore Institute of Pharmacy,
INDORE (M.P.)

Principal

Indore Institute of Pharmacy, Indore

M. Pharm (PCS)

PSO-I -Create a talent pool that can perform research on various aspects of dosage form design and development and implement the knowledge in formulating the best suitable dosage form to provide high quality medicines to the society.

PSO-II -Equip the students with strong fundamental concept and high technical competence in novel drug delivery system to serve the need of R&D and Production department of pharmaceutical industry.

PSO-III Able to write, interpret and communicate effectively and scientifically to accomplish the requirements of Research and Development and regulatory department of Pharmaceuticals,

M. Pharm. (Pharmaceutics)

PO1: An ability to independently carry out pharmaceutical research and development work to solve practical problems related to preformulation, formulation design and evaluation, novel drug delivery systems.

PO2: An ability to write and present a research report by conceptualizing research ideas, delivering effective presentations, and its documentation.

PO3: Acquire in-depth knowledge in pharmaceutics with emphasis on preformulation, formulation development and its evaluation, and new drug delivery systems including wider and global perspective, with an ability to discriminate, evaluate, analyze and synthesize existing and new knowledge, and integration of the same for enhancement of knowledge.

M. Pharm. (Pharmaceutical Quality Assurance)

PO1: An ability to independently carry out pharmaceutical quality assurance related research development work to solve practical problems in its professional implementation.

PO2: An ability to write and present a research report by conceptualizing research ideas.

PO3: Acquire in-depth knowledge in pharmaceutical quality assurance with special emphasis on pharmaceutical quality systems, cGMP guidelines, documentation, validation strategy, and various protocols for drug regulations including wider and global perspective, with an ability to discriminate, evaluate, analyze and synthesize existing and new knowledge, and integration of the same for enhancement of knowledge

Course Code/Course name	Course outcomes			
MPY-101- Modern analytical techniques	MQA101.1	Understand the basic knowledge on single and multiple component assay of pharmaceuticals		
	MQA101.2	Developing basic practical skills using instrumentation techniques		
	MQA101.3	Skills in selecting the suitable techniques for analysis of drugs and pharmaceuticals		
	MQA101.4	Basics theoretical knowledge on various instrumental techniques available for analysis of organic substances		
	MQA101.5	Applying the knowledge learnt in developing new procedures and comparing various methods of analysis		
MQA-102T Quality Management System	MQA102.1	Understand the quality parameters and quality attribute in Pharmaceutical industry sectors		
	MQA102.2	Learning the various tools for quality improvement		
	MQA102.3	Knowing the Importance of the quality of medicines in the public.		
	MQA102.4	Regulatory body requirements for the import and export pharmaceutical products		
	MQA102.5	Knowledge of stability testing of drug and drug substances		
MQA103T – Quality Control and Quality Assurance	MQY-103.1	Understand the cGMP aspects in a pharmaceutical industry		
	MQY-103.2	Understand GLP and regulatory Affairs		
	MQY-103.3	Appreciate the importance of documentation		
	MQY-103.4	Understand the responsibilities of QA & QC departments		
	MQY-103.5	Appreciate the importance of documentation		
MQA104T – Product Development and Technology Transfer	MQA-104.1	Understand the new product development process		
	MQA-104.2	Explain information to transfer technology from R&D to actual manufacturing		
	MQA-104.3	Elucidate necessary information to transfer technology of existing products between various manufacturing places		

Principal
Indore Institute of Pharmacy
INDORE (M.P.)

Principal
Indore Institute of Pharmacy,
INDORE (M.P.)

	MQA-104.4	Understand the Quality by design practices of sterile and non sterile dosage forms
	MQA-104.5	Understand the practices of packaging technology
	MQA-104.6	Understand the Regulatory requirements in drug development stages
MQA105P – Pharmaceutical Quality Assurance Practical – I	MQA-105.1	Estimation of process capability
	MQA-105.2	In process and finished product quality control tests for tablets, capsules, parenteral and semisolid dosage forms
	MQA-105.3	Estimation of drug in pharmaceutical by using modern analytical techniques
	MQA-105.4	Development of Stability study protocol for pharmaceuticals
	MQA-105.5	To carry out preformulation study for successful formulation of pharmaceuticals
MQA201T – Hazards and Safety Management	MQA-201.1	Understand, determine and to take control measures to eliminate or minimize the level of the risks
	MQA-201.2	Support the student to recognize the control measures to eliminate or minimize the level of the risks
	MQA-201.3	Ensure safety standards in pharmaceutical industry
	MQA-201.4	Provide comprehensive knowledge on the safety management
	MQA-201.5	Teach the method of Hazard assessment, procedure, methodology for provide safe industrial atmosphere
MQA202T – Pharmaceutical Validation	MQA202.1	Importance of patent and intellectual property rights
	MQA202.2	Knowledge of qualification aspects of various instruments
	MQA202.3	Understanding of clearing validation of equipments employed in the manufacture of pharmaceuticals

Indore Institute of
Pharmacy

Indore Institute of Pharmacy

Affiliated to MHTC (M.P.) Approved by AICTE (New Delhi) & Pharmacy Council
Regd. Under UGC 2012

	MQA202.4	Theoretical and practical basis of validation of analytical method for estimation of drugs
	MQA202.5	Fundamental aspects of qualification of various equipments and instruments
MQA203T – Audits and Regulatory Compliance	MQA203.1	To understand the importance of auditing in pharmaceuticals
	MQA203.2	To understand the methodology of auditing for pharmaceutical industry
	MQA203.3	To prepare the check list for auditing
	MQA203.4	To carry out the audit process
MQA204T – Pharmaceutical Manufacturing Technology	MQA204.1	Knowledge of common practice in the pharmaceutical industry developments, plant layout and production planning
	MQA204.2	Knowledge of principles and practices of aseptic process technology, non-sterile manufacturing technology and packaging technology
	MQA204.3	Explaining principles and implementation of Quality by design (QbD) and process analytical technology (PAT) in pharmaceutical manufacturing
	MQA204.4	Understand the practices of packaging technology
	MQA204.5	Understand the practices of aseptic process technology
MQA205P – Pharmaceutical Quality Assurance Practical II	MQA205.1	Validation of an analytical method for pharmaceuticals
	MQA205.2	Qualification of Pharmaceutical Testing Equipment
	MQA205.3	Design of plant layout: Sterile and non-sterile
	MQA205.4	Case study on application of QbD
	MQA205.5	Identification & estimation of drug in pharmaceuticals & assess the impurities
MRM 301T – Research Methodology and Biostatistics	MRM301.1	Identify the overall process of designing a research study from its inception to its report.
	MRM301.2	Familiar with ethical issues in educational research, including those issues that arise in using quantitative and qualitative research
	MRM301.3	Identify a research problem stated in a study.
	MRM301.4	Why educational research is undertaken and the audiences that profit from research studies.

Grading

Course Code/Course name	Course outcomes				
MPY-101- Modern analytical techniques	MQA101.1	Understand the basic knowledge on single and multiple component assay of pharmaceuticals			
	MQA101.2	Developing basic practical skills using instrumentation techniques			
	MQA101.3	Skills in selecting the suitable techniques for analysis of drugs and pharmaceuticals			
	MQA101.4	Basics theoretical knowledge on various instrumental techniques available for analysis of organic substances			
	MQA101.5	Applying the knowledge learnt in developing new procedures and comparing various methods of analysis			
MQA-201 Regulatory guidelines for pharm. Quality management	MQA201.1	Understand the fundamental aspects of cGMP in pharmaceutical industry			
	MQA201.2	Knowledge of the documentation and its importance in pharmaceutical industry			
	MQA201.3	To be well versed with the key activities in QA and QC.			
	MQA201.4	Knowledge of basics of risk based approach in quality management system			
	MQA201.5	Fundamental aspects of current good laboratory practices and its importance in pharm industry			
MQY-202 Pharm. Manufacturing and quality control	MQY-202.1	Basics of various manufacturing operations and its control in pharmaceutical industry,			
	MQY-202.2	Fundamental of outsourcing of manufacturing and planning operations			
	MQY-202.3	Knowledge of post operational activities and handling product complaint			
	MQY-202.4	Well versed with various manufacturing operations and quality control aspects of sterile dosage form			
	MQY-202.5	Understand the concept of sampling and inspection planning in pharmaceutical industry			
MQA-203 Pharm. Validation	MQA-203.1	Knowledge of fundamental aspect and importance of validation			
	MQA-203.2	Basics concepts for carrying out validation of manufacturing processes			
	MQA-203.3	Well versed with applying the knowledge of validation to instruments and equipments			
	MQA-203.4	Fundamentals aspects of manufacturing facilities validation like HVAC and water system etc.			

Principal

INDORE (M.P.)

Principal
Indore Institute of Pharmacy,
INDORE (M.P.)

	MQA-203.5	Understanding of cleaning validation and analytical method validation
	MQA-203.6	Knowledge of process validation and computer system validation and its regulatory requirements
MQA-204 Quality planning and analysis	MQA-204.1	Understanding of the importance of quality ISO management systems
	MQA-204.2	Well versed with the tools for quality improvement
	MQA-204.3	Basics of approaches used in control of quality and developing quality culture
	MQA-204.4	Knowing the importance of manufacturing planning for quality
	MQA-204.5	Statistical approaches for quality and its importance
	MQA-204.6	Fundamental concepts of quality assurance in pharmaceutical industry
MQA-301 Pharm. Quality system and process validation	MQA-301.1	Knowledge of quality control test for sterile and non-sterile dosage form
	MQA-301.2	Basics of quality assurance in pharmaceutical packaging operations
	MQA-301.3	Well versed with process validation in pharmaceutical industry
	MQA-301.4	Understanding of sterilization process validation
	MQA-301.5	Fundamentals of biological and biotechnological process validation
MQA-302 Pharm. Documentation and regulatory affairs	MQA302.1	Understanding of regulatory requirements of pharmaceutical documentation
	MQA302.2	Basics of documentation for pharmaceutical operations
	MQA302.3	Knowledge of documents for R&D and quality operations
	MQA302.4	Understanding of validation documents for non-sterile formulations
	MQA302.5	Well versed with ICH guidelines for pharmaceutical quality system

Course Outcomes (CO)

New Syllabus effective since 2021-2022

M. Pharm. (PCS) I Year / I Sem	
Course code/ Course name	Course outcomes
MPH 101T Modern Pharmaceutical Analytical Techniques	MPH101.1 Understand the basic knowledge on single and multiple component assay of pharmaceuticals
	MPH101.2 Developing basic practical skills using instrumentation techniques
	MPH101.3 Skills in selecting the suitable techniques for analysis of drugs and pharmaceuticals
	MPH101.4 Basics theoretical knowledge on various instrumental techniques available for analysis of organic substances
	MPH101.5 Applying the knowledge learnt in developing new procedures and comparing various methods of analysis
(MPH 102T) Drug Delivery System	MPH102.1 To understand the various approaches for development of sustained and controlled drug delivery systems
	MPH102.2 Demonstrate development of site-specific drug delivery like buccal patch/tablet, lozenges, osmotic tablets.
	MPH102.3 Explain the design, fabrication and release mechanism of gastroretentive dosage form.
	MPH102.4 Explain the concept of pelletization technology as a modulated drug delivery system.
	MPH102.5 Outline the concept of ocular and transdermal drug delivery system.
MPH 103T Modern Pharmaceutics	MPH103.1 Understand various preformulation concepts
	MPH103.2 Understand the concept of validation w.r.t. pharmaceuticals
	MPH103.3 Outline the concept of eGMP and industrial management
	MPH103.4 Explore the concept of compression and compaction of tablets
	MPH103.5 Study statistical principles and implement them for biopharmaceutical studies
MPH 104T Regulatory Affairs	MPH 104.1 Understand the concept of documentation in Pharmacy Industry
	MPH 104.2 Explore the role of regulatory affairs after drug approval
	MPH 104.3 Understand the process of IND, NDA and ANDA submission
	MPH 104.4 Study the process of clinical trials

MPH 105-P Pharmaceutical Practical-1	MPH105.1	Analysis of Pharmacopoeial compounds and their formulations by UV-Vis spectrophotometer
	MPH105.2	Explore the Experiments based on Gas Chromatography and HPLC
	MPH 105.3	Perform the Preformulation studies of tablet dosage form and to Perform In -vitro dissolution of novel drug delivery systems like controlled release or sustained release marketed formulation
	MPH 105.4	To study Micromeritic properties of powders and granulation.
	MPH105.5	To study the effect of binders on dissolution of a tablet.
M. Pharma I Year / II Sem (PHARMACEUTICS) PCI		
MPH 201T Molecular Pharmaceutics (Nano Technology & Targeted DDS)	MPH201.1T	To relate the concept of targeted Drug Delivery Systems
	MPH201.2T	Development of ability to prepare and evaluate nano particles & liposomes
	MPH201.3T	To summarize the basics of preparation and application of Niosomes, Aquasomes, Phytosomes, Electrosomes
	MPH201.4T	To recall the concepts of Pulmonary Drug Delivery Systems
	MPH201.5T	Better explain the concepts of Nucleic acid based therapeutic delivery system.
MPH 202T Advanced Biopharmaceutics & Pharmacokinetics	MPH202.1T	Development of ability to understand the concept of therapeutic response and toxicity, therapeutic index, therapeutic window, factors affecting plasma concentration.
	MPH202.2T	To summarize the basics of Compartment modeling including one, two and multiple compartment models and determination of various pharmacokinetic parameters.
	MPH202.3T	To relate the concept of Non-linear pharmacokinetics and recognition of non linearity, circadian rhythm and chronopharmacokinetics, other reasons for non-linearity.
	MPH202.4T	Better explain the concepts of physiologic pharmacokinetic model and to define mean time (MRT), statistical moment theory, Mean absorption time (MAT), Mean Dissolution time (MDT).
	MPH202.5T	To recall the concepts of absorption distribution and renal excretion, hepatic clearance and elimination, bioavailability and bioequivalence
MPH203T Computer Aided Drug Delivery	MPH203.1	To understand use of computer in pharmaceutical research and statistical modelling. To understand importance of quality attributes in pharmaceutical industry.

System	MPH203.2	To brief about modelling in drug disposition techniques and transport mechanism
	MPH203.3	Applications of Computers in pharmaceutical product development and factorial design.
	MPH203.4	Attain the knowledge of computer aided clinical methodologies used in biopharmaceutical studies and simulation in ADME
	MPH203.5	Upgradation of the knowledge by studying the use of automation in pharmaceutical industry and applications of artificial intelligence.
	MPH204.1	Understanding of basic of cosmetic products as per Indian regulation.
MPH 204 T Cosmetics and Cosmeceuticals	MPH204.2	Define the biological aspects cosmetic in relation skin and hair structure
	MPH204.3	Attain the knowledge the formulation consideration of skin care preparations?
	MPH204.4	Summarize the cosmeceutical products and sunscreen preparations
	MPH204.5	Applications of the Herbal Cosmetics
	MPH205.1	Estimate general considerations, methods of preparation, characterization and applications of Liposomes, Niosomes, Alginate beads, albumin microspheres and spherules
MPH 205 P Pharmaceutical Practical-II	MPH205.2	Formulate and evaluate Creams, Shampoo and Toothpaste
	MPH 205.3	Perform the Bioavailability studies of Paracetamol in animals
	MPH 205.4	To explore the knowledge of DoE Using Design Expert® Software
	MPH205.5	Protein binding studies of a highly protein bound drug & poorly protein bound drug
	M. Pharm. II year Semester III	
MRM 301 T Research Methodology and Biostatistics	MRMG01.1	Identify the overall process of designing a research study from its inception to its report.
	MRM301.2	Familiar with ethical issues in educational research, including those issues that arise in using quantitative and qualitative research
	MRM301.3	Identify a research problem stated in a study.
	MRM301.4	Why educational research is undertaken and the audiences that profit from research studies?

Old Scheme Course Outcomes

M. Pharma I Year / I Sem		
Course code/ Course name	Course outcomes	
MPY 101 Modern Analytical Technique	MPY101.1	Understand the basic knowledge of single and multiple component assay of pharmaceuticals.
	MPY 101.2	Developing basic practical skills using instrumentation techniques
	MPY 101.3	Skills in selecting the suitable techniques for analysis of drugs and pharmaceuticals
	MPY 101.4	Basics theoretical knowledge on various instrumental techniques available for analysis of organic substances
	MPY 101.5	Applying the knowledge learned in developing new procedures and comparing various methods of analysis
MPY 102 Biotechnology and bioinformatics	MPY102.1	Understand the Structure & Function of DNA, DNA Replication & Repair, Expression of Genetic Information, Function of RNA and translation, Post translational modification
	MPY 102.2	Concept of recombinant DNA technology knowledge of Restriction enzymes, Polymerase Chain reaction, Blotting techniques, DNA sequencing, and Pharmaceutical applications.
	MPY 102.3	Understanding the gene therapy and its pharmaceutical significance.
	MPY 102.4	Study of Manufacturing and storage of vaccines. Application of immunology for the development of new vaccines. Gaining knowledge of monoclonal antibodies & hybridoma technology & its applications.
	MPY 102.5	Study of cell organization and reproduction. Understanding the communication between cell and their environment.
	MPY 102.6	Application of knowledge of cancer and its treatment strategies.
	MPY 102.7	Understanding the molecular mechanism of disease and <i>in vivo</i> transgenic models. Genomic protein targets and recombinant therapeutics. Its application for rational drug design. Gene therapy & DNA/ RNA targeted therapeutics.
	MPY 102.8	Exploration of biological data bases to study Sequence analysis, Protein structure, Genetic and physical mapping and importance in pharmaceutical research.
	MPY 102.9	Learning of handling the biological data by descriptive statistics, Normal distribution, Probability distribution and Sampling plans.

Principal

Indore Institute of Pharmacy,
INDORE (M.P.)

MPY 103 Drug Regulatory Affairs, IPR and Quality assurance Techniques	MPY103.1	Understanding of regulatory requirements of pharmaceutical documentation
	MPY103.2	Basics of documentation for pharmaceutical operations
	MPY103.3	Knowledge of documents for R&D and quality operations
	MPY103.4	Understanding of validation documents for non-sterile formulations
	MPY103.5	Well versed with ICH guidelines for pharmaceutical quality system
MPY 104 Product Development and Formulation	MPY104.1	To obtain knowledge of physical, chemical, and pharmaceutical factors affecting dosage forms .
	MPY104.2	Idea of drug excipient, excipient-excipient interactions affecting formulations
	MPY104.3	Attain knowledge of solubilization and methods to enhance solubility.
	MPY104.4	To study dissolution apparatus dissolution testing of different types of dosage formulation and in-vitro and in-vivo correlation.
	MPY104.5	To update with latest tablet technology and automation in manufacturing process.
	MPY104.6	To get an insight of recent formulation strategies for parenteral and ophthalmic products.
	MPY104.7	Knowledge of pharmaceutical grade polymers and uses in formulation development.
	MPY104.8	To obtain knowledge of nutraceuticals and their usefulness in prevention of diseases.
	MPY104.9	To Obtain knowledge of different types of packages and their quality tests.
	MPY104.10	To understand importance of stability study programs for formulations and ICH guidelines for stability.
	MPY104.11	To explore application of computers in drug development process.
MPY101 Modern Analytical Techniques (Practical)	MPY101P.1	Analysis of Pharmacopoeial compounds and their formulations by UV-Vis spectrophotometer
	MPY101P.2	Explore the Experiments based on Gas Chromatography and HPLC
	MPY101P.3	Explore the instrumentation of HPTLC
MPY 102 Biotechnology & Bioinformatics (Practical)	MPY102P.1	Understand and perform the separation of submucosal material along with its electrophoretic separation
	MPY102P.1	Explore various ELISA techniques
	MPY102P.1	Understand PCR and its applications

MPY 104 Product Development and Formulation (Practical)	MPY104P.1	Perform solubility studies with different types of BCS drug samples
	MPY104P.2	Study the physicochemical properties of different polymers and practically compare them
	MPY104P.3	Explore dissolution technique
	MPY104P.4	Study pharmaceutical packaging materials
M. Pharm. I Year Semester II		
MPY 201 Pcs Biopharmaceutics and Pharmacokinetics (Advanced Pharmaceutics – I)	MPY201.1	Development of ability to understand the concept of therapeutic response and toxicity, therapeutic index, therapeutic window, factors affecting plasma concentration
	MPY 201.2	Summarize the basics of Compartment modeling including one, two and multiple compartment models and determination of various pharmacokinetic parameters.
	MPY 201.3	Relate the concept of Non-linear pharmacokinetics and recognition of non-linearity, circadian rhythm and chronopharmacokinetics, other reasons for non-linearity.
	MPY 201.4	Explain the concepts physiologic pharmacokinetic model and to define mean time (MT) statistical moment theory, Mean absorption time (MAT) Mean Dissolution time (MDT).
	MPY 201.5	Recall the concepts of absorption distribution and renal excretion, hepatic clearance and elimination, bioavailability and bioequivalence
MPY 202 Pcs Novel drug Delivery System- I (Advanced Pharmaceutics – II)	MPY202.1	Obtain knowledge of basics in novel drug delivery systems
	MPY 202.2	Summarize the basic techniques of microencapsulation
	MPY 202.3	Summarize the study of Transdermal Drug Delivery System (TDDS)
	MPY 202.4	Explain the Implants and Inserts
	MPY 202.5	Possess Knowledge of Osmotically Regulated Systems
MPY 203 Pcs Novel drug Delivery System- II (Advanced Pharmaceutics – III)	MPY203.1	Summarize the molecular basis of targeted drug delivery
	MPY 203.2	Development of ability to understand the concept of liposomes, nanoparticles and niosomes in details
	MPY 203.3	Learn basic concept of resealed erythrocytes, dendrimers and multiple emulsions
	MPY 203.4	Explain and understand Aquasomes, Pharmacosomes and Transfersomes
	MPY 203.5	Explore peptides and protein drug delivery
MPY 204 Pcs Pharmaceutical Packaging Technology (Advanced Pharmaceutics – IV)	MPY 204.1	Understand the concept of pharmaceutical packaging and its function.
	MPY 204.2	Learn the importance of documentation
	MPY 204.3	Understand the scope of quality certifications applicable to pharmaceutical industries
	MPY 204.4	Understand the various quality control tests for packaging material.

	MPY 204.5	Understand the procedure of sterilization and stability of packaging material.
MPY 205 Pcs Lab Work	MPY 205.1	Estimate general considerations, methods of preparation, characterization and applications of Liposomes, Niosomes, Resealed Erythrocytes, Nanoparticles, Solid Lipid Nanoparticles; Dendrimers, Multiple emulsions and Submicron emulsion
	MPY 205.2	Formulate and evaluate novel drug delivery systems like sustained release matrix tablets, Mucoadhesive tablets, Microencapsules and Trans dermal patches
	MPY 205.3	Perform the Preformulation studies of tablet dosage form and to Perform In-vitro dissolution of novel drug delivery systems like controlled release or sustained release marketed formulation
	MPY 205.4	Determine the effect of process variables and excipients on tablet dosage form
	MPY 205.5	To conduct testing of packaging containers and closers.

M. Pharma II Year / III Sem (Pharmaceutics)

MPY301PCS Elective I Modulated Release Drug Delivery System	MPY 301.1	Explain the design, fabrication and release mechanism of gastroretentive dosage form.
	MPY 301.2	Demonstrate development of site-specific drug delivery like buccal patch/tablet, lozenges, osmotic tablets,
	MPY 301.3	Illustrate the various novel patented technologies developed for various controlled and sustained/fast release oral drug delivery system like, TIMERx, MASRx, COSRx, TheriForm, etc.
	MPY 301.4	Explain the concept of pelletization technology as a modulated drug delivery system.
	MPY 301.5	Outline the concept of dispersed and colloidal drug delivery system.
MPY 302 PCS Elective II Parenteral, Inhalation & Intranasal Drug Delivery Technology	MPY 302.1	Explain the basic concept of protein and peptide delivery system with formulation considerations?
	MPY 302.2	Demonstrate development of parenteral controlled drug depot systems
	MPY 302.3	Illustrate the various Parenteral implants
	MPY 302.4	Summarize the Inhalation drug delivery systems
	MPY 302.5	Knowing the importance of Intranasal drug delivery systems

M.Pharm (Pharmaceutics)

PROGRAMME EDUCATIONAL OBJECTIVES

- To make post graduates working in research and advanced pharmaceutical pharmaceutical industry.
- To make them well versed in basic knowledge and concepts of pharmaceutical sciences and its applications in pharmaceutical industry.
- To develop the spirit of innovation for progress of pharmaceutical industry.

PROGRAMME SPECIFIC OUTCOMES

PSO 1 - Create a strong ground that can perform research on synthesis, development, formulation, development and implementation of pharmaceutical products including the basic molecular design form to produce high quality pharmaceuticals to the society.

PSO 2 - Equip the students with strong fundamental knowledge and skills required for assessment of pharmaceutical products and quality control of ICH and Indian pharmaceutical standards.

PSO 3 - Create write, interpret and communicate effectively and ethically in meetings, site visits, departmental, institutional and Developmental and regulatory departments of pharmaceutical industry.

M.Pharm (Pharmaceutics)

PROGRAMME OUTCOMES

PO 1 - Make students independently carry out pharmaceutical research and development work in pharmaceutical industry.

PO 2 - Make students capable of carrying out pharmaceutical analysis and quality control work in pharmaceutical industry.

PO 3 - Make students capable of carrying out pharmaceutical product development work in pharmaceutical industry.

PO 4 - Make students capable of carrying out pharmaceutical quality assurance work in pharmaceutical industry.

B.Pharm

PROGRAMME OUTCOMES

PO1: Pharmacy Knowledge: Shows knowledge and comprehension of the basic and applied sciences of pharmaceutical sciences including pharmacology, pharmacokinetics and pharmacodynamics, with ability to apply the same in problem solving.

PO2: Planning Ability: Shows the ability to design the system, such that resources optimally accomplish the objective.

PO3: Problem Analysis: Includes the accurate and efficient analysis of complex problems related to the field of study.

PO4: Modern Tool: Shows the capability of applying modern techniques including computing skills to analyze and solve problems.

PO5: Academic Integrity: Shows the ability of an individual to make decisions and contribute towards the welfare of society.

PO6: Professional Identity: Understand and practice Ethics of profession and promotion of values of social, environmental and professional integrity.

PO7: Pharmaceutical Skills: Learn to use and apply practical skills in pharmaceutical and social contexts, with critical judgment while making decisions and take responsibility for the outcomes, connected with the discipline.

PO8: Communication: Shows the ability to communicate effectively with the students, faculty, and society. Also, capacity to demonstrate the ability to work in teams and to lead groups.

PO9: Environment and Sustainability: Awareness of the impact of pharmaceutical products on the environment, society and health.

PO10: Lifelong Learning: Interest and confidence that investing in the

B.Pharm

PROGRAMME EDUCATIONAL OBJECTIVES

To prepare graduates in the field of pharmaceutical sciences with high quality education, equipped with the latest technological knowledge, skills and attitude, who can easily adapt to the challenges of the modern world.

To develop the ability to think, analyze and problem-solve.

PROGRAMME SPECIFIC OUTCOMES

PSO 1: Pharmacy graduates will possess basic and applied knowledge of pharmaceutical and allied sciences, helping them to become competent, capable professionals adapting to the needs of different pharmaceutical areas.

PSO 2: Pharmacy graduates will possess entrepreneurial ability as leader in business management of pharmaceutical ethics, social responsibility with the students and lifelong learning and research activities.

PSO 3: Independent problem solvers, the programs to learn and adapt in a culture of innovation and excellence.

M.Pharm (Pharmaceutical QA)

PROGRAMME EDUCATIONAL OBJECTIVES

- To produce well qualified, competent and dedicated professionals in pharmaceutical quality assurance.
- To develop and train students in every aspect of pharmaceutical quality assurance and quality management system.
- To provide them with opportunities for growth and development.

PROGRAMME SPECIFIC OUTCOMES

- PSO 1: Students will have the ability to use appropriate analytical, technical and managerial skills to demonstrate their knowledge in pharmaceutical quality assurance.
- PSO 2: Students will be able to demonstrate their ability to work effectively in teams.
- PSO 3: Students will be able to demonstrate their ability to communicate effectively in English language.
- PSO 4: Students will be able to demonstrate their ability to maintain professional ethics and integrity.

M.Pharm (Pharmaceutical QA)

PROGRAMME OUTCOMES

- PO 1: Graduates will be able to demonstrate their ability to use appropriate analytical, technical and managerial skills to demonstrate their knowledge in pharmaceutical quality assurance.
- PO 2: Graduates will be able to demonstrate their ability to work effectively in teams.
- PO 3: Graduates will be able to demonstrate their ability to communicate effectively in English language.
- PO 4: Graduates will be able to demonstrate their ability to maintain professional ethics and integrity.

POO

To prepare students to work as Pharmacy professionals.
To make graduates competitive in their technical skills who exhibit a sense of social and cultural
responsibilities.

To cultivate lifelong learning habit for highly professional career.

PSO

PSO I - Pharmacy graduate will acquire firm and robust knowledge of pharmaceutical and
related sciences helping them to become competent (SOP) study technicians along with
needs of different pharmaceuticals etc.

PSO II - Pharmacy graduate will possess interpersonal skills or traits as team, cooperation
of interteam members and the responsibilities will be capable of handling training and
development and will be active.

PSO III - To prepare graduate of the courses outcome and adapt as a leader of community
developing needs.
