Criterion 1 - Curricular Aspects

1.1 Curricular Planning and Implementation

1.1.1 The Institution ensures effective curriculum planning and delivery through a well-planned and documented process.

Indore Institute of Pharmacy (IIP) is committed to providing quality education in the field of pharmacy through a well-structured and efficient approach to curriculum planning and delivery. The institution places a strong emphasis on ensuring that all educational content is both comprehensive and relevant to the dynamic needs of the healthcare and pharmaceutical industries. This is achieved through a documented and systematic process that includes Academic Calendar, issued by the affiliating university- RGPV. Institutional Academic Calendar is prepared by the Academic Committee and approved by IQAC. It incorporates activity schedules including academic, extracurricular activities which is in line with the requirements of curriculum. The planning process at IIP involves close collaboration between Principal, HODs and academic staff, considering individual preference, and allotting academic load distribution. to ensure the course content meets the highest standards. The academic time table is prepared before commencement of semester. Periodic meeting of Academic Committee is held to review status of syllabus, student attendance, and conduct of activities planned. Internal assessments are taken to ensure effective delivery of curriculum, completion of syllabus and to evaluate on the basis of course and program outcomes (CO/ PO). At the end of the session, attendance register and course file is submitted to academic department by the subject in- charge.

Delivery of the curriculum is accomplished through a variety of pedagogical methods, including lectures, seminars, practical sessions, and workshops. The use of modern teaching aids and technologies enhances the learning experience, making it more interactive and engaging. Regular assessments, feedback mechanisms, and periodic reviews of the curriculum help maintain its quality and relevance.

By adhering to a structured and documented process, IIP ensures that its graduates are well-prepared to meet the challenges of the pharmaceutical industry. The institution's focus on continuous improvement in curriculum planning and delivery plays a pivotal role in producing competent professionals who can contribute meaningfully to the healthcare sector.

1.1.1 The Institution ensures effective curriculum planning and delivery through a well-planned and documented process.

Indore Institute of Pharmacy (IIP) offers a Diploma, Undergraduate, and Post Graduate program in Pharmacy with a diverse range of opportunities. The programs are designed for those who wish to enter the Healthcare Industry as licensed Pharmacists. Indore Institute of Pharmacy, Indore was established in the year 2004, starting the course of Diploma in Pharmacy. Bachelor of Pharmacy course was introduced in the year 2006 and the Master's course in Pharmaceutics and Pharmaceutical Quality Assurance was introduced in 2012. IIP also introduced Doctor of Pharmacy (Pharm. D) recently i.e session July- Dec 2024. All the courses are approved by All India Council of Technical Education (AICTE), New Delhi; and Pharmacy Council India, New Delhi. The college is affiliated to Rajiv Gandhi Proudyogiki Vishwavidyalaya, Bhopal (M.P.). IIP has bagged and coveted NAAC 'A' Accreditation in its first cycle itself in 2023.

VISION AND MISSION OF IIP

Vision: To produce competent pharmacy professionals and value-based future leaders by offering quality education that incorporates training in Holistic Work-Life Management.

Mission:

1. To provide quality education and training to a budding pharmacist who can withstand a transforming healthcare system.
2. To bridge the gap between academia and creative professionals for industry 4.2 or 5.0.
3. Honing the students' future with the approach to creating emotional quotient with intelligence quotient for holistic development with the aim of Know thyself and be thyself willing to evolve.

PLANNING OF CURRICULUM DELIVERY

At the beginning of each semester, the IQAC (Internal Quality Assurance Cell) prepares the academic calendar based on the schedule provided by RGPV University. This calendar includes various curricular activities and key dates such as:

- Session Commencement date
- Details of holidays
- Dates for Sessional Examinations
- Internal assessments
- Last-working day
- Tentative dates for university practical exams and end-semester exams

Once the calendar is approved by the principal, it is uploaded to the college website, displayed on notice boards, and communicated to students WhatsApp group.

1. Session is commenced according to the Academic Calendar.
2. Subject distribution through in-house academic cell.
3. Lesson plan is made by the concerned teacher before the session starts.
4. Planned and approved theory and practical classes are delivered.
5. Special attention is given to slow learners.
6. Tutorial classes are taken for absentees and slow learners.
7. All examinations, notices, and internals marks, are announced timely.

For Integrity and transparency:

- Marks displayed on notice board.
 - Evaluated answer sheets physically offered to students to check their answer sheets evaluated by faculty for any discrepancy to maintain the transparency for evaluation pattern under the satisfaction of students.
 - Final marks uploaded on the portal.
8. The subjects are taught and evaluated on the basis of course outcome and program outcome.

OBJECTIVES & OUTCOMES

2 = 2x219 Experimental Indirect

C 502.1	Analyze various Preformulation parameters for different dosage forms (solid, liquid, etc.) including their physical and chemical properties.
C502.2	Explain formulation considerations (selection of excipients and their role in formulation) and evaluation parameters of tablets, capsules, pellets, and liquid orals.
C502.3	Outline formulation considerations (selection of excipients and their role in formulation) and evaluation parameters of parenteral and ophthalmic
C502.4	Formulate various cosmetics preparations like lipsticks, shampoos, cold creams, vanishing creams, etc.
C502.5	Define, evaluate and perform quality control and stability studies of pharmaceutical aerosols. Explain various pharmaceutical packaging materials, containers, their quality-control tests, and stability aspects

COURSE CONTENTS

Course content:

3 hours/ week
07 Hours

UNIT-I

Preformulation Studies: Introduction to preformulation, goals and objectives, study of physicochemical characteristics of drug substances.

a. Physical properties: Physical form (crystal & amorphous), particle size, shape, flow properties, solubility profile (pKa, pH, partition coefficient), polymorphism

b. Chemical Properties: Hydrolysis, oxidation, reduction, racemisation, polymerization
BCS classification of drugs & its significant

Application of preformulation considerations in the development of solid, liquid oral and parenteral dosage forms and its impact on stability of dosage forms.

UNIT-II

10 Hours

Tablets:

- Introduction, ideal characteristics of tablets, classification of tablets. Excipients, Formulation of tablets, granulation methods, compression and processing problems. Equipments and tablet tooling.
- Tablet coating: Types of coating, coating materials, formulation of coating composition, methods of coating, equipment employed and defects in coating.
- Quality control tests: In process and finished product tests

Liquid orals: Formulation and manufacturing consideration of syrups and elixirs suspensions and emulsions; Filling and packaging; evaluation of liquid orals official in pharmacopoeia

Vision

The vision of the Institute is to produce competent pharmacy professionals and value-based future leaders by offering quality education that incorporates training in Holistic Work-Life Management

Mission

The Mission of the Institute is:

- To provide quality education and training to a budding pharmacist who can withstand a transforming healthcare system.
- To bridge the gap between academia and creative professionals for industry 4.2 or 5.0.
- Honing the students' future with the approach to creating emotional quotient with intelligence quotient for holistic development with the aim of know thyself and be thyself willing to evolve.

B. Pharm.

Program Educational Objectives (PEO)

- To prepare graduates as successful pharmacy professionals
- To make graduates competent in core technical skills who reflect commitment, ethics, and social responsibility
- To inculcate lifelong learning habits for highly productive career

Program Specific Outcomes (PSO)

- **PSO I** –Pharmacy graduates will possess basic and applied knowledge of pharmaceutical and allied sciences helping them to become competent industry-ready professionals adapting to the needs of different pharmaceutical areas.
- **PSO II** –Pharmacy graduates shall possess interpersonal skills as leader in team in appreciation of professional ethics and societal responsibilities with the attitude of life-long learning and motto of know thyself and will to evolve.
- **PSO III:** To prepare graduate of the program to learn and adapt in a globe of constantly developing trends

B.Pharm

Program Outcomes (PO)

PO1. Pharmacy Knowledge: Possess knowledge and comprehension of the core and applied domains of pharmaceutical sciences, including biomedical sciences, administrative and manufacturing practices with special emphasis on developing soft skills.

PO2. Planning Abilities: Inculcate the ability to arrange the events and meet deadlines as per demand of profession.

PO3. Problem analysis: Inculcate the aptitude and scientific approach to identify the issues during daily practice and address it there and then.

PO4. Modern tool usage: Harness the capability in implementing pharmacy-related instruments, equipment including computing tools with an understanding of the limitations.

PO5. Leadership skills: Learn the quality of an entrepreneur, team-leader, and professional for serving the society.

PO6. Professional Identity: Understand and inculcate habits to earn, preserve and encourage the value of variety of professional roles of a pharmacist in society.

PO7. Pharmaceutical Ethics: Learn to use and apply personal values in professional and social contexts. Apply ethical principles while making decisions and take responsibility for the outcomes associated with the decisions.

PO8. Communication: Develop oral and written communication skills in tune with the professional role of a pharmacist.

PO9. The Pharmacist and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety and legal issues and the consequent responsibilities relevant to the professional pharmacy practice.

PO10. Environment and sustainability: Acknowledge the need of developing sustainable development in the field of pharmacy.

PO11. Life-long learning: Recognize and understand that learning is the attitude and a lifelong process to keep pace with the latest advancements in the field and society.

BP 704T: NOVEL DRUG DELIVERY SYSTEMS (Theory)

45 Hours

Scope: This subject is designed to impart basic knowledge on the area of novel drug delivery systems.

Objectives: Upon completion of the course student shall be able

1. To understand various approaches for development of novel drug delivery systems.
2. To understand the criteria for selection of drugs and polymers for the development of Novel drug delivery systems, their formulation and evaluation

Course content:

Unit-I

10 Hours

Controlled drug delivery systems: Introduction, terminology/definitions and rationale, advantages, disadvantages, selection of drug candidates. Approaches to design controlled release formulations based on diffusion, dissolution and ion exchange principles. Physicochemical and biological properties of drugs relevant to controlled release formulations

Polymers: Introduction, classification, properties, advantages and application of polymers in formulation of controlled release drug delivery systems.

Unit-II

10 Hours

Microencapsulation: Definition, advantages and disadvantages, microspheres /microcapsules, microparticles, methods of microencapsulation, applications

Mucosal Drug Delivery system: Introduction, Principles of bioadhesion / mucoadhesion, concepts, advantages and disadvantages, transmucosal permeability and formulation considerations of buccal delivery systems

Implantable Drug Delivery Systems: Introduction, advantages and disadvantages, concept of implants and osmotic pump

Unit-III

10 Hours

Transdermal Drug Delivery Systems: Introduction, Permeation through skin, factors affecting permeation, permeation enhancers, basic components of TDDS, formulation approaches

Gastroretentive drug delivery systems: Introduction, advantages, disadvantages, approaches for GRDDS – Floating, high density systems, inflatable and gastroadhesive systems and their applications

Nasopulmonary drug delivery system: Introduction to Nasal and Pulmonary routes of drug delivery, Formulation of Inhalers (dry powder and metered dose), nasal sprays, nebulizers

**Indore Institute of
Pharmacy**

Affiliated to - BGV(Bhopal) | Approved by - AICTE(New Delhi) & PCI(New Delhi)
Registrar - Under UGC 2(F)

Unit-IV

08 Hours

Targeted drug Delivery: Concepts and approaches advantages and disadvantages, introduction to liposomes, niosomes, nanoparticles, monoclonal antibodies and their applications

Unit-V

07 Hours

Ocular Drug Delivery Systems: Introduction, intra ocular barriers and methods to overcome –Preliminary study, ocular formulations and ocuserts

Intrauterine Drug Delivery Systems: Introduction, advantages and disadvantages, development of intra uterine devices (IUDs) and applications

B. Pharm VII Sem

BP-704 T Novel Drug Delivery Systems

Time: 1Hrs.

Max. Marks: 15

NOTE: Attempt all 3 questions.

S.No.	Questions	CO	Blooms Taxonomy	PO	Marks
1	Define polymer. Classify with examples. Give the pharmaceutical application of biodegradable polymers. OR Explain the concept of controlled drug delivery system and approaches to design them support with examples.	CO1	1, 2, 5	1,2,3,4, 5,8,11	6
2	What is microencapsulation? Discuss the techniques for microencapsulation and describe in detail solvent evaporation and coacervation phase separation technique. OR Demonstrate in detail principles of bio adhesion and formulation considerations of buccal delivery systems. OR Discuss the various approaches used in development of implantable drug delivery systems. Explain in detail osmotic pumps.	CO2	1, 2, 6,	1,2,3,4, 5,8,11	6
3	What are basic components of transdermal drug delivery systems (TDDS)? OR Discuss the various approaches of tdds	CO3	1, 6	1,2,3,4, 5,8,11	3

- Note:** i) Attempt any five questions.
ii) All questions carry equal marks.

1. Define microencapsulation. Discuss in detail coacervation phase separation method of microencapsulation. Give pharmaceutical applications of microencapsulation?
<https://www.rgpvonline.com>
2. Explain advantage, disadvantage of transdermal drug delivery system. Write a note on components of transdermal drug delivery system. Discuss various formulation approaches of transdermal drug delivery system?
3. Classify control drug delivery systems. Discuss in detail activation modulated drug delivery systems.
4. Discuss the various approaches used in development of implantable drug delivery systems. Explain advantage and disadvantage of implantable drug delivery systems.
<https://www.rgpvonline.com>
5. a) What is drug targeting? Discuss its need, rationale and concept giving suitable examples?
b) Write a note on liposomes.

1. What is microencapsulation? Enumerate the techniques for microencapsulation and describe in detail solvent evaporation and coacervation phase separation technique.
2. Describe the various approaches for Gastroretentive Drug Delivery Systems (GRDDS). Give the applications of GRDDS.
3. Classify controlled drug delivery systems and discuss the physico-chemical and physiological factors that are considered critical in designing of oral controlled drug delivery system.
4. What are the basic components of Transdermal Drug Delivery Systems (TDDS)? Discuss the various approaches of TDDS.
5. Write exhaustive notes on targeted drug delivery.
6. Classify polymers. Discuss the properties, advantages and application of polymers in formulation of controlled release drug delivery systems.
