

**Indore Institute of
Pharmacy**

INDORE INSTITUTE OF PHARMACY (IIP) IS ACCREDITED BY NAAC (NORTH ZONE) & AFFILIATED BY PCI
Regd. No. 100/100/2010

Criteria 1.2.3

Indore Institute of Pharmacy (IIP) recognizes the importance of equipping students with both theoretical knowledge and practical skills to excel in the dynamic field of pharmacy. As part of its continuous efforts to enhance students' competencies, IIP organizes comprehensive Skill Improvement Group classes throughout all semesters. These classes are designed to bridge the gap between academic learning and industry requirements, offering hands-on training and real-world applications that prepare students for successful careers in industrial pharmacy.

The Skill Improvement Group classes include the following key areas:

- 1. Good Laboratory Practices (GLP)**
In these sessions, students are introduced to the essential principles and protocols that govern the operation of pharmaceutical laboratories. The focus is on maintaining quality, safety, and consistency in laboratory procedures, ensuring that students understand the significance of adhering to GLP standards in both academic and professional environments. Few sessions conducted by experts from AASRA.
- 2. MS-Excel**
Microsoft Excel is a vital tool for data analysis, reporting, and decision-making in the pharmaceutical industry. IIP offers specialized classes to teach students how to efficiently use MS-Excel for tasks such as data organization, statistical analysis, graph plotting, and generating professional reports, all of which are essential in industrial pharmacy roles.
- 3. Tableting Technology**
The classes on Tableting Technology provide students with an in-depth understanding of tablet formulation, manufacturing processes, and quality control. Students gain hands-on experience with tablet production and learn about the technological innovations used to enhance the efficiency, safety, and quality of pharmaceutical tablets.
- 4. Handling of Sophisticated Instruments**
To keep up with the ever-evolving nature of pharmaceutical technology, IIP offers practical training on the handling and operation of sophisticated instruments used in the pharmaceutical industry. These instruments, essential for research and production, include high-performance liquid chromatographs (HPLC), spectrophotometers, and other analytical equipment. Workshop on handling of sophisticated instrument of HPLC and UV spectrophotometer was conducted for B. Pharm final year and M. Pharm students by AASRA (as per our MOU functioning).
- 5. Research Writing**
As research plays a pivotal role in pharmaceutical advancements, IIP focuses on developing students' skills in scientific writing. The Research Writing classes equip students with the necessary skills to effectively communicate their research findings, prepare academic papers, and publish in peer-reviewed journals, thus promoting a culture of scientific inquiry.

These Skill Improvement Group classes are an integral part of the IIP curriculum, ensuring that students are well-prepared for the challenges and opportunities in the pharmaceutical industry. By blending technical proficiency with practical experience, IIP strives to nurture well-rounded professionals who are ready to contribute to the advancement of industrial pharmacy.

Approved by: BOP/2018/01 Approved by: AICTE New Delhi & PCI New Delhi
Register: Under UOE 221

REPORT

ACADEMIC SESSION: JULY- DEC 2023

Program: SKILL IMPROVEMENT PROGRAM

Resource Person: Mr. Sachin Bathma, MD (Axiom Analytical Service)

Date: 30.11.23- 14.12.23

Mode: Offline

Venue: IIP, S- 16 Classroom

Event Detail: SIG on Basic Good Laboratory Practices and Safety Measures

Objective:

1. To understand the GLP in Pharmaceutical Industry.
2. To understand the basic concept and importance of GLP, GDP, GCP, GMP in the Pharmaceutical industry.
3. To understand the importance of GDP with the help of ALCOA principals.
4. To understand the GLP practices to be follow during preparation of standard solution and reagents.
5. To be well versed with GLP during calibration of instruments and equipment and glassware's.
6. To enumerate the fundamental principles involved in GLP
7. To understand the general safety precautions to be taken in a laboratory
8. To learn the basic aspects of different quality control techniques.
9. General understanding of analytical instruments and their working.
10. To learn the basic weighing and volumetric practices.

Outcome:

1. It enhances student's knowledge on GLP guidelines
2. Understanding the industry specific implementation and conduction of GLP
3. It will help in mitigating the occurrence of risks while working in a laboratory
4. Understand the basic documentation practices of analytical methods.
5. Students will familiar with the industrial culture and working.
6. It will help to clear the basic concept of pharmaceutical analysis.

SIG REPORT ON GOOD LABORATORY PRACTICES & SAFETY MEASURES SESSION- JULY- DEC 2023

For B. Pharm 1st year students, 40 hours certificate course- Skill Improvement Group on the topic Good Laboratory Practices & Safety Measures was organized. The SIG consisted of various modules. The SIG was conducted to enhance the basic knowledge of students accordance to GLP. It also helped them understanding the industry specific implementation and conduction of GLP. Understanding the basic documentation of analytical methods was also accomplished.

The SIG was inaugurated on 30.11.23 by Dr. Gurmeet Chhabra. After formal inauguration, Module 1 was started. He gave brief introduction of GxP to students explaining its purpose and importance in pharmaceutical industry.

Module 2 was taken by the Expert Mr. Sachin K. Bathma MD in Axiom Analytical Service. He gave brief introduction on GLP. Then Module 3 was explained by him regarding GLP in pharmaceutical and food industries- its requirements, GLP principles, regulatory requirements and GLP as per ICH.

Then in module 4 was explained regarding handling of chemicals and dealing with hazardous substances. The module consisted of theory as well as practical exposure to students. The expert conducted practical hands on training related to glassware handling, calibration, basic laboratory techniques etc.

This benefitted the students to understand the concepts thoroughly. Module 6 was conducted by another expert Mr. Mukesh Narolia, Director at Shri Jamuna Herbal Indore, who explained different types of balance and weighing machine used in industries. He also gave practical training in weighing, cleaning and verifying of balance.

In module 7, Mr. Mukesh also explained Good Documentation Practices, importance of ALCOA+ and gave brief introduction on flame photometer, Polarimeter, ph meter, and conductivity meter. In module 8, Dr. Ritesh Patel had a session on recrystallization, melting point and boiling point determination, purification of liquids by distillation and had practical experiments on respective topics.

In module 8, Dr. Nimita Mancoha took a session regarding calculations for concentrations in analytical Chemistry.

All the industry- and academic experts explained students about GLP and its implementation in industry and laboratories. All the modules helped students to understand the working in laboratories and industry. Online assessment was taken from students at the end of the programme. Students were benefitted by providing those certificates at the end of the SIG. The SIG was completed on 14.12.2023.

REPORT

Department: Pharmacy

Program: Advanced Good laboratory Practices and safety measures

Objective: To understand the Good laboratory Practices, safety measures of hazardous chemicals and Basic knowledge of calculation used in Pharmaceutical industries on routine basis.

Need: Purpose of this program to make student industry familiar.

Content: Refer attached module

Resource Person: Gyanendra Sigh Patel, Lalit Dhaker and Gourav Sarsodiya

No. of student: 115

Date: 29/05/2024

Time: 1:30 PM

Venue: IIP, S- 16 Classroom

Benefits of Course:

This module gives basic idea of pharmaceutical industries working pattern. It helps to fill the gap between industry and academic institution.

It helps to identifying trends and latest technology going on in Pharmaceutical industry

Outcome:

They learnt basic concept for preparing solution such as Molarity, Normality etc

They understand the Good laboratory practices

Exam will be conducted and the students who got 70% above marks will be eligible for certificate.

Tableting Technology

REPORT

Department: Pharmaceutics

Program: B.Pharm

Objective:

- Practice all the related and practical aspects of dosage form development
- Learn techniques used in tablet manufacturing.
- Understand problems in Tablet Manufacturing
- Evaluate tablets as per Pharmacopoeia.
- Understand all the specifications of instruments used in tableting technology.

Need:

Pharmaceutical tableting technology encompasses the science and methodology behind the production of tablets, a popular dosage form. This involves the selection of active pharmaceutical ingredients (APIs) and excipients, which include binders, disintegrants, fillers, lubricants, and coatings, each playing a specific role in the tablet's performance. Formulation aims to achieve desired drug release, stability, and patient acceptability. The manufacturing process includes blending, granulation, compression, and sometimes coating, ensuring uniformity and quality. Quality control tests as per the Indian Pharmacopoeia (IP) include weight variation, hardness, and friability, disintegration, and dissolution tests. Mastery of this technology ensures the production of effective, safe, and high-quality pharmaceutical tablets.

Content

Module I (Introduction & Granulation)	Introduction to tablets, Classification of Tablets, Granulation methods, and evaluations of granules.
Module II (Basics of tablet manufacturing)	Tooling and compression, Tablet defects
Module III (Quality check)	IPQC test for tablets, apparatus used
Module IV (Tablet coating)	Tablet Coating
Industrial Visit	Industrial Visit
Module V (Assessment)	Final evaluation (report Submission and Quiz)

Date: From 21st August 2023

Time: 11:30am -12:20pm

Principal
Indore Institute of Pharmacy

**Indore Institute of
Pharmacy**

Venue: S16 Classroom IIP

Event Detail: To provide quality education in this competitive world of technology to the students' Pharmaceutics department, Indore Institute of Pharmacy, Indore has organized 40 hours of SIG on Tableting Technology for B. Pharm II-year students from 21st August 2023.

The main objective of the SIG was the early introduction of the formulation and development of Tablets with industrial exposure. SIG was coordinated by, Ms. Nayany Sharma, and Ms. Parul Vaishnav and Ms. Himani Jaisinghani

The program was focused on giving students a clear view of formulation factors and methods to prepare tablets. Mr. Sachin Bathma M.D. in Axiom Analytical Service and Recruitment Agency, Indore was present as an expert from Industry.

Students were given hands-on training on tablet press and sophisticated instruments related to tablet IPQC. The problems and real-time challenges in Pharma Industry were explained to all the students. Students were exposed to all the critical concepts and tooling required for the formulation of Tablets. The module is consisting of both theory and practical exposure for students. This benefitted the students to understand the concept thoroughly. Industrial Visit has enlightened students with his experience in the Pharmaceutical Industry.

We thank Shri Arun S Bhatnagar Sir, Director General, IIST-IIP-IIMR, and Dr. Nimita Manocha, Principal IIP for continuous support, guidance, and motivation

Benefits of Course

Understanding Tablet: Gain comprehensive knowledge of tablets, including their formulation and the selection of excipients, which play crucial roles in ensuring the desired drug release, stability, and patient acceptability.

Manufacturing Proficiency: Acquire expertise in the manufacturing process of tablets, encompassing various techniques and equipment used to produce high-quality pharmaceutical products efficiently and consistently.

Quality Control Mastery: Learn the essential quality control tests for tablets as per the Indian Pharmacopoeia (IP), ensuring that the tablets meet stringent standards for safety, efficacy, and quality.

Industry Relevance: Develop the ability to correlate theoretical knowledge with the practical and professional needs of the pharmaceutical industry, preparing for real-world applications and problem-solving in a highly regulated field.

Outcome:

- Explain tablets, formulation (selection of excipients and their role in formulation), and manufacturing of tablets
- Quality control tests for tablets as per IP.
- They can correlate theoretical knowledge with the professional and practical needs of the pharmaceutical industry

Event Detail:

To impart quality education in the field of technology and advancements, Indore Institute of Pharmacy, has organized a 40 hours SIG on MS Excel and Statistics expertise for B.Pharm II Year students 1st April 2024 to 15th May 2024. SIG was conducted by Mr. Vivek Gupta Assistant Professor, Indore Institute of Pharmacy, Indore as a resource person. 80 students participated in it. He has briefed students about Data Validation, Time and Date Calculation, conditional formatting, data formats, text to columns, pivot tables, using IF function etc. The module is consisting of both theory and practical exposure to students. He discussed the various formulas that can be used to work on the data analysis especially for examination and student data. He also explained the usage of excel in drawing graphs and charts.

The Benefits Of Learning Excel Includes

- Build great charts
- Use conditional formatting
- Help identify trends
- Bring data together

Outcome:

- The students learnt various features of Microsoft Excel and statistics
- They learnt handling data using Excel'
- Students learnt using various formulas in excel and Graphs.
- Students became well versed with the excel utility which in turn increased their employability.

SIG ON SOPHISTICATED INSTRUMENT HANDLING EXPERTISE

SESSION 2022-2023

SIG REPORT

To impart quality education in the field of technology and advancements, Indore Institute of Pharmacy, has organized a 40 hours SIG on Sophisticated Instrument Handling expertise for B. Pharm Final Year (VII semester) students from 19th June 2023 to 30th June 2023. SIG was conducted by Mr. Sachin Bathma M.D. in Axiom Analytical Service and Recruitment Agency, Indore as a resource person. The module comprises of both theory and practical exposure to the students. Mr. Sachin has briefed students about different Spectroscopic and Chromatographic techniques in the theory classes and Hands-On training on HPLC and UV Spectrophotometer was provided to each student in the practical hours so as to get in depth knowledge about the instrument and also help the students to understand the concept thoroughly. Mid-session evaluation test and Final Evaluation Test was taken to evaluate the understanding of the student about the topic of SIG. Expert has also enlightened students with his experience in analytical skills in the Pharmaceutical Industry.

Objective:

1. Accurate Documentation for Drug Manufacturing.
2. Effective Communication with Stakeholders.
3. Quality Assurance and Compliance.
4. Risk Mitigation.
5. Clinical Trial Documentation
6. Pharmacovigilance Reporting:
7. Efficient Knowledge Transfer.
8. Standardized Procedures.
9. Career Advancement.

For M. Pharm Fourth year students, a 40 hrs certificate course, SIG, on 'Technical Writing and Project Designing' has been conducted organized from 23-02-2024 to 11-03-2024 SIG consists of various modules. The SIG was conducted to enhance the basic knowledge of student's accordance to 'Technical Writing and Project Designing'. It enhanced student's knowledge on research, understanding of basic work flow of research writing, Identification and implementation of plagiarism tools in an organization, Students get knowledge about reference Manager like Mendeley, Zotero, End note. It helps to identify risk and its management as well as mitigation, it helps to identify criticality/severity related in new research

a. It helps to enhance the novelty of the research area, use authenticated technical writing and project designing for achieving long term as well as short term objectives.

The SIG Module 1 and 2 was started on 23rd Feb 2024 by the sessions of Dr. Rupesh K. Gautam. He gave brief introduction on research to students explaining its purpose and importance in research area. Module 3 and 4 were taken by Expert Dr. Nadeem Farooqui, HOD of Department of Pharmaceutics, explaining about Literature review and Reference manager tools used during research project writing. Module 5 and Module 6 were taken by Dr. Rupesh K. Gautam in which he explained about plagiarism checking as well as plagiarism tool such as Urkund etc. as -He also explain about to create ID on orchid, scopus etc. created He also briefed about Python, SPSS, LaTeX Tools etc. for Publication -Lifecycle Stage Goal of PQS Elements, Product Quality monitoring System, Change Management System and Management Review.

Then Module 7 were taken by Dr. Gurmeet Chhabra, HOD of Department of Pharmaceutical chemistry.

Principal
Indore Institute of Pharmacy,
INDORE (M.P.)

explained about Project Designing, he also explained how to Set specific, measurable, achievable, relevant, and time-bound (SMART) project goals. He gave some topics on new research area such as AI used in recent trends in Pharmaceutical field. Practical based discussion and interaction this benefitted the students to understand the concept thoroughly. The module is consisting of both

-theory and practical exposure to students.

All modules helped students to understand the Identification and implementation of 'Technical Writing and Project Designing' in Research area. Online assessment was taken from students. Students were benefitted by providing those certificates at the end of the SIG. Also, feedback was taken by them to know their views and any suggestions from them. The SIG was successfully completed on 11th March 2024.

Benefits of Course:

1. **Efficient Organization:** Courses on research, technical writing, and literature review help you organize and store all your references in one centralized location. This is particularly useful for managing various types of sources, such as journal articles, books, websites, and conference papers.
2. **Time-Saving:** Learning about technical writing and reference management tools can save you time. Manually formatting citations and bibliographies can be labor-intensive and error-prone. Reference managers automate this process, ensuring consistency in citation styles and freeing up your time for other tasks.
3. **Easy Citation Generation:** With knowledge of technical writing and reference management, you can quickly generate citations while working on academic papers, reports, theses, or any other documents. These tools often integrate seamlessly with word processors, making it easy to cite and create bibliographies.
4. **Avoiding Plagiarism:** Properly citing sources is crucial to maintaining academic integrity and avoiding plagiarism. Courses on plagiarism educate you on the importance of accurate attribution, ensuring that you give credit to the ideas and work of others.
5. **Collaboration Facilitation:** When collaborating on group projects or working with others, understanding reference management tools allows for efficient sharing and syncing of references. This streamlines collaboration and ensures consistency across team members.

Principal
Indore Institute of Pharmacy,
INDORE (M.P.)

6. **Import and Export Functionality:** Reference managers enable you to import references from various sources (databases, websites, PDFs) and export them to different formats. This flexibility makes it easy to switch between different tools and platforms.
7. **Metadata Retrieval:** Many reference managers automatically extract and populate citation details (e.g., title, author, publication date) from online databases. This feature saves you the effort of manual data entry.
8. **Annotating and Organizing PDFs:** Reference management tools often allow you to annotate PDFs and attach notes or comments to specific references. This enhances your research organization and comprehension.
9. **Backup and Synchronization:** Most reference managers provide cloud-based storage and synchronization, ensuring that your references are backed up and accessible across different devices.
10. **Enhanced Project Designing:** Understanding the tools and techniques used in publication, including reference management and literature review, contribute to better project design. It helps you build a solid foundation for original research or development work.

Outcome:

1. Research:

Objective Clarity: Clearly define the research problem, objectives, and hypotheses.

Methodology: Choose appropriate research methods (qualitative, quantitative, or mixed) and data collection techniques.

Ethical Considerations: Ensure ethical conduct throughout the research process.

Data Analysis: Analyze data rigorously using suitable statistical or qualitative techniques.

Contribution: Highlight the novelty and significance of your research findings.

2. Technical Writing - Types of Publications:

Research Papers: Present original research in journals or conference proceedings.

Review Articles: Summarize existing literature on a specific topic.

Case Studies: Describe real-world applications or experiences.

Book Chapters: Contribute to edited volumes or textbooks.

Theses/Dissertations: Document in-depth research for academic degrees.

Principal
Indore Institute of Pharmacy,
INDORE (M.P.)

3. Literature Review:

Scope: Define the boundaries of your review (e.g., time period, specific themes).

Synthesis: Summarize and critically evaluate existing research.

Identify Gaps: Highlight areas where further research is needed.

Theoretical Framework: Situate your review within relevant theories or models.

4. Reference Manager Tools:

Organization: Use tools like Mendeley, Zotero, RefWorks, or EndNote to manage citations and references.

Import/Export: Easily import references from databases and export formatted bibliographies.

Collaboration: Facilitate collaborative research by sharing reference libraries.

PDF Integration: Extract citation details directly from PDFs or webpages.

5. Plagiarism:

Awareness: Understand what constitutes plagiarism (verbatim copying, paraphrasing without proper attribution).

Citation Styles: Follow consistent citation styles (APA, MLA, etc.) to avoid unintentional plagiarism.

Plagiarism Detection Tools: Use software to check for potential plagiarism before submission.

6. Tools in Publication:

Graphical Tools: Create figures, charts, and diagrams using software like Adobe Illustrator or Excel.

Statistical Software: Analyze data using tools like R, SPSS, or Python.

LaTeX: Typeset complex documents (e.g., research papers, theses) with precision.

Version Control: Use Git for collaborative writing and tracking changes.

7. Project Designing:

Problem Statement: Clearly define the problem or need your project aims to address.

Objectives: Set specific, measurable, achievable, relevant, and time-bound (SMART) project goals.

Scope and Constraints: Define project boundaries, resources, and limitations.

Risk Assessment: Identify potential risks and mitigation strategies.

Project Plan: Develop a detailed timeline, tasks, and milestones.

The SIG Module 1 and 2 was started on 02 April 2024 by the sessions of Dr. Rupesh K. Gautam. He gave brief introduction on research to students explaining its purpose and importance in research area. Module 3 and 4 were taken by Expert Dr. Nadeem Farooqui, HOD of Department of Pharmaceutics, explaining about Literature review and Reference manager tools used during research project writing. Module 5 and Module 6 were taken by Dr. Rupesh K. Gautam in which he explained about plagiarism checking as well as plagiarism tool such as Urkund etc. He also explain about to create ID on orcid, scopus etc. created He also briefed about Python, SPSS, LaTeX Tools etc. for Publication Lifecycle Stage Goal of PQS Elements, Product Quality monitoring System, Change Management System and Management Review. Then Module 7 were taken by Dr. Gurmeet Chhabra, HOD of Department of Pharmaceutical chemistry, explained about Project Designing, he also explained how to Set specific, measurable, achievable, relevant, and time-bound (SMART) project goals. He gave some topics on new research area such as AI used in recent trends in Pharmaceutical filed. Practical based discussion and interaction this benefitted the students to understand the concept thoroughly. The module is consisting of both theory and practical exposure to students.

Regd. No. 1000/2010

All modules helped students to understand the Identification and implementation of 'Research Paper (Academic Writing)' in Research area. Online assessment was taken from students. Students were benefitted by providing those certificates at the end of the SIG. Also, feedbacks were taken by them to know their views and any suggestions from them. The SIG was successfully completed on 18 th April 2024.

Benefits of Course:

1. **Efficient Organization:** Courses on research, technical writing, and literature review help you organize and store all your references in one centralized location. This is particularly useful for managing various types of sources, such as journal articles, books, websites, and conference papers.
2. **Time-Saving:** Learning about technical writing and reference management tools can save you time. Manually formatting citations and bibliographies can be labor-intensive and error-prone. Reference managers automate this process, ensuring consistency in citation styles and freeing up your time for other tasks.
3. **Easy Citation Generation:** With knowledge of technical writing and reference management, you can quickly generate citations while working on academic papers, reports, theses, or any other documents. These tools often integrate seamlessly with word processors, making it easy to cite and create bibliographies.
4. **Avoiding Plagiarism:** Properly citing sources is crucial to maintaining academic integrity and avoiding plagiarism. Courses on plagiarism educate you on the importance of accurate attribution, ensuring that you give credit to the ideas and work of others.
5. **Collaboration Facilitation:** When collaborating on group projects or working with others, understanding reference management tools allows for efficient sharing and syncing of references. This streamlines collaboration and ensures consistency across team members.
6. **Import and Export Functionality:** Reference managers enable you to import references from various sources (databases, websites, PDFs) and export them to different formats. This flexibility makes it easy to switch between different tools and platforms.
7. **Metadata Retrieval:** Many reference managers automatically extract and populate citation details (e.g., title, author, publication date) from online databases. This feature saves you the effort of manual data entry.
8. **Annotating and Organizing PDFs:** Reference management tools often allow you to annotate PDFs and attach notes or comments to specific references. This enhances your research organization and comprehension.
9. **Backup and Synchronization:** Most reference managers provide cloud-based storage and synchronization, ensuring that your references are backed up and accessible across different devices.

10. **Enhanced Academic Writing :** Understanding the tools and techniques used in publication, including

reference management and literature review, contribute to better project design. It helps you build a solid foundation for original research or development work.

Outcome:

1. Research:

Objective Clarity: Clearly define the research problem, objectives, and hypotheses.

Methodology: Choose appropriate research methods (qualitative, quantitative, or mixed) and data collection techniques.

Ethical Considerations: Ensure ethical conduct throughout the research process.

Data Analysis: Analyze data rigorously using suitable statistical or qualitative techniques.

Contribution: Highlight the novelty and significance of your research findings.

2. Technical Writing - Types of Publications:

Research Papers: Present original research in journals or conference proceedings.

Review Articles: Summarize existing literature on a specific topic.

Case Studies: Describe real-world applications or experiences.

Book Chapters: Contribute to edited volumes or textbooks.

Theses/Dissertations: Document in-depth research for academic degrees.

3. Literature Review:

Scope: Define the boundaries of your review (e.g., time period, specific themes).

Synthesis: Summarize and critically evaluate existing research.

Identify Gaps: Highlight areas where further research is needed.

Theoretical Framework: Situate your review within relevant theories or models.

4. Reference Manager Tools:

Organization: Use tools like Mendeley, Zotero, RefWorks, or EndNote to manage citations and references.

Import/Export: Easily import references from databases and export formatted bibliographies.

Collaboration: Facilitate collaborative research by sharing reference libraries.

PDF Integration: Extract citation details directly from PDFs or webpages.

5. Plagiarism:

Awareness: Understand what constitutes plagiarism (verbatim copying, paraphrasing without proper attribution).

Citation Styles: Follow consistent citation styles (APA, MLA, etc.) to avoid unintentional plagiarism.

Plagiarism Detection Tools: Use software to check for potential plagiarism before submission.

INDORE (M.P.)

6. Tools in Publication:

Graphical Tools: Create figures, charts, and diagrams using software like Adobe Illustrator or Excel.

Statistical Software: Analyze data using tools like R, SPSS, or Python.

LaTeX: Typeset complex documents (e.g., research papers, theses) with precision.

Version Control: Use Git for collaborative writing and tracking changes.

Final Outcome: Students completed major project mandatory for the fulfillment of B. Pharm. This SIG was useful for thesis writing.
