2.3.2.: Teachers use ICT enabled tools for effective teaching-learning process

Along with the conventional teaching and learning approach, our institute is extensively using ICT-based e-learning systems - Content management and Learning management platforms like Google classroom for effective teaching-learning processes. The teachers structure their course contents and upload course material/resources in the form of text, PDF, YouTube videos, and presentations on their respective Google Classrooms. Web-based learning is implemented with the help of online material and content made available by the affiliating universities and subscription of databases like DELNET.

In Information and Communication Technology (ICT) classrooms are revolutionizing the educational landscape by integrating technology into teaching and learning processes. These classrooms are equipped with digital tools such as computers, interactive whiteboards, projectors, tablets, and high-speed internet, enabling teachers to deliver engaging, multimedia-rich content, which allow students and teachers to interact, share resources, and track progress in real time. ERP systems in education streamline administrative and academic operations by integrating various processes into a single platform. These systems manage tasks such as attendance monitoring, timetable scheduling, Lesson and teaching plan creation thus, significantly reducing manual workloads. The LMS module in ERP system manages uploading of syllabus, notes, study material and assignments alongwith their checking and marking.

Our staff members were motivated to participate in the e-Faculty development programs, workshops, conferences, and webinars organized by various institutes, in collaboration with AICTE. Our institute and faculty members had Facebook, linked-in, blogs, Instagram and YouTube pages which indicates the use of social media to connect with students. These contents are also accessible to the institutional students and faculty members. ZOOM platform is used to conduct meetings and organize webinars. The sessions can be recorded for later use. Google Meet is used to host a video session/lecture. Teachers can invite up to 100 participants and record the sessions for later access.

ICT Infrastructure at Indore Institute of Pharmacy (IIP)

Executive Summary

Indore Institute of Pharmacy (IIP) emphasizes the integration of technology within its academic structure.

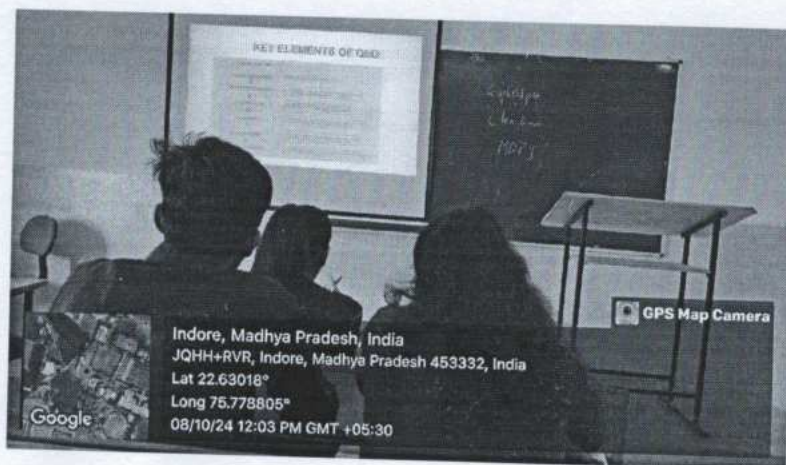

The institute boasts:

- 1. ICT – enabled classrooms:** Qualified with computers, projectors and internet connectivity to enhance teaching and learning experiences.
- 2. ICT – enabled seminar halls:** Equipped with interactive screens, video conferencing systems, for delivering presentations, hosting workshops, and conducting discussions.
- 3. ICT – enabled auditorium:** A large avenue integrated with audio-visual equipment making them ideal for conferences, cultural events, keynote addresses, and educational programs accommodating over 300 attendees.
- 4. ICT – enabled Pharma labs:** Offers cutting- edge technologies to perform hands on practicals including pharmacology and molecular modelling labs.
- 5. ICT – enabled Communication lab:** The institute has well-furnished and equipped language labs with 62 computers, licensed software and a LAN facility.
- 6. ICT enabled various tools are available in the institute.**

In essence, IIP's ICT facilities underscore its commitment to modern, interactive and comprehensive pharmaceutical education.

3D PRINTER

This technology is used to design personalized that are required for patient's therapeutic requirements (Bilayered tablets, drug combinations, dosage forms etc.) and some different physical appearance (e.g. shape, size, texture and design). The 3D printing technology provides vast area for research and benefit on the clinical practice, pharmaceutical industries as well as at academic level.

Assignment 2

Nayany Sharma Sankhla - Jul 8

100 points Due Jul 15

Unit 1

1. Explain the fundamental of TDDS focusing on principles and methods. discuss the role of Piv in designing these system. elaborate on specific technique like magnetically induced drug targeting and ligand mediated targeting
2. Provide insights into challenges and strategies for delivering drugs to specific sites like brain and tumor including barriers and overcoming technique

Unit 2

Describe nanoparticles and liposomes, including their methods of preparation, evaluation parameters, and applications. Provide a detailed explanation of the top-down and bottom-up techniques for nanoparticle preparation

Describe the types, formation, and evaluation parameters of liposomes with a special focus on the thin film hydration method. Explain the concepts of active and passive targeting in drug delivery systems
