2.5.2. Mechanism to deal with internal examination related grievances is transparent, time – bound and efficient

Internal assessment of students is also based on the guidelines issued by affiliating university and Pharmacy Council of India, New Delhi from time to time. The institution has formulated an Examination Policy that incorporates all the guidelines issued by regulatory authorities from time to time.

An examination committee is formed comprising of a Senior Professor, few faculty members and office staff, which ensures the conduct of internal assessment. The assessment involves conduct of periodic sessional examination, both theory and practical semester; assignment/quizzes, practical record evaluations, field-work reports, project reports, practice school reports. These assessments along with attendance of the students constitute the **continuous assessment framework**.

The **examination committee** co-ordinates and allocates responsibility of question paper setting, time-table formation, invigilation duty scheduling, recording of examinations, provision of material for conduct of examination, appointment of valuers, timely valuation, display of results on the notice-boards, answer-book discussion with students and resolution of grievance if any on the spot, by the Subject Teacher. All student are to sign, if satisfied on their answer sheet.

Grievances of students if any for the evaluation are addressed by first provision of model answers for the sessional question papers and then addressing of the issue there and then by the allotted subject expert. The subject expert, if satisfied would make necessary changes in evaluation sheet. In lieu of our transparent system, further to this if the student is not satisfied the grievance is put forward to examination committee and HODs for the resolvment of grievance *which* are dealt with and resolved before submission of marks to the RGPV University Exam department/Portal.

Q.1. Explain the concept of controlled drug delivery system and approaches to design them support with examples.

Ans. Control drug delivery system is which the drug is delivered at the pre-determined rate for a prolonged time either orally or systemically.

In this delivery system the drug is delivered in fixed time intervals at a determined rate.
