To,
The Principal
IIP, Indore

Subject: Regarding approval of SIG course on Good Laboratory Practices & Safety Measures

Respected sir,

IIP is planning to conduct SIG on 30/11/23 for B.Pharm 1st Year, session 2023-24 as SIG schedule. The SIG will commenced from 30-11-2023 to 14-12-2023 on Good Laboratory Practices and Safety Measures.

Kindly allow for the same.

Requirements:-

SIG Certificates- 114

COURSE MODULE

Good Laboratory Practices and Safety Measures

Objective:

1. To understand the GxP in Pharmaceutical Industry.
2. To understand the basic concept and importance of GLP, GDP, GCP, GMP in the Pharmaceutical industry.
3. To understand the importance of GDP with the help of ALCOA principals.
4. To understand the GLP practices to be follow during preparation of standard solution and reagents.
5. To be well versed with GLP during calibration of instruments and equipment and glassware's.
6. To enumerate the fundamental principles involved in GLP
7. To understand the general safety precautions to be taken in a laboratory
8. To learn the basic aspects of different quality control techniques.
9. General understanding of analytical instruments and their working.
10. To learn the basic weighing and volumetric practices.

Outcomes:

1. It enhances student's knowledge on GLP guidelines
2. Understanding the industry specific implementation and conduction of GLP
3. It will help in mitigating the occurrence of risks while working in a laboratory
4. Understand the basic documentation practices of analytical methods.
5. Students will familiar with the industrial culture and working.
6. It will help to clear the basic concept of pharmaceutical analysis.

Execution Plan of the Activity:

(Registration through google link)

Sessions- 10 sessions of 4 hours each (30/11/2023 to 14/12/2023)

SIG REPORT ON GOOD LABORATORY PRACTICES & SAFETY MEASURES SESSION- JULY- DEC 2023

For B. Pharm 1st year students, 40 hours certificate course- Skill Improvement Group on the topic Good Laboratory Practices, & Safety Measures was organized. The SIG consisted of various modules. The SIG was conducted to enhance the basic knowledge of students accordance to GLP. It also helped them understanding the industry specific implementation and conduction of GLP. Understanding the basic documentation of analytical methods was also accomplished.

The SIG was inaugurated on 30.11.23 by Dr. Gurmeet Chhabra. After formal inauguration, Module 1 was started. He gave brief introduction of GxP to students explaining its purpose and importance in pharmaceutical industry.

Module 2 was taken by the Expert Mr. Sachin K. Bathma MD in Axiom Analytical Service. He gave brief introduction on GLP. Then Module 3 was explained by him regarding GLP in pharmaceutical and food industries- its requirements, GLP principles, regulatory requirements and GLP as per ICH.

Then in module 4 was explained regarding handling of chemicals and dealing with hazardous substances. The module consisted of theory as well as practical exposure to students. The expert conducted practical hands on training related to glassware handling, calibration, basic laboratory techniques etc.

This benefitted the students to understand the concepts thoroughly. Module 6 was conducted by another expert Mr. Mukesh Narolia, Director at Shri Jamuna Herbal Indore, who explained different types of balance and weighing machine used in industries. He also gave practical training in weighing, cleaning and verifying of balance.

In module 7, Mr. Mukesh also explained Good Documentation Practices, importance of ALCOA+ and gave brief introduction on flame photometer, Polarimeter, ph meter, and conductivity meter. In module 8, Dr. Ritesh Patel had a session on recrystallization, melting point and boiling point determination, purification of liquids by distillation and had practical experiments on respective topics.

In module 8, Dr. Nimita Mancoha took a session regarding calculations for concentrations in analytical Chemistry.

All the industry-and academic experts explained students about GLP and its implementation in industry and laboratories. All the modules helped students to understand the working in laboratories and industry. Online assessment was taken from students at the end of the programme. Students were benefitted by providing those certificates at the end of the SIG. The SIG was completed on 14.12.2023.

To,

The Group Advisor,
SPARSH, SEWS

Subject: - Regarding approval for SIG at IP (Tableting Technology)

Respected Sir,

With reference to the above-cited subject, this is to inform you that IP is about to initiate SIG on Tableting Technology (40hrs certification program)

The objective of the SIG:

1. Practice all the related and practical aspects of dosage form development
2. Learn techniques used in tablet manufacturing
3. Understand problems in Tablet Manufacturing
4. Evaluate tablets as per Pharmacopoeia
5. Understand all the specifications of instruments used in tableting technology

The outcome of the SIG:

Upon completion of the course, the student shall be able to

1. Explain tablets, formulation (selection of excipients and their role in formulation), and manufacturing of tablets
2. Quality control tests for tablets as per IP.
3. They can correlate theoretical knowledge with the professional and practical needs of the pharmaceutical industry

A total of 111 B. Pharm 2nd Year students are interested in the above-said course

I request you to kindly approve the permission for the SIG course

Submitted for consideration.

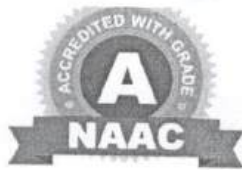

Thanks

REPORT

Department: Pharmaceutics

Program: B.Pharm

Objective:

- Practice all the related and practical aspects of dosage form development
- Learn techniques used in tablet manufacturing.
- Understand problems in Tablet Manufacturing
- Evaluate tablets as per Pharmacopoeia.
- Understand all the specifications of instruments used in tableting technology.

Need:

Pharmaceutical tableting technology encompasses the science and methodology behind the production of tablets, a popular dosage form. This involves the selection of active pharmaceutical ingredients (APIs) and excipients, which include binders, disintegrants, fillers, lubricants, and coatings, each playing a specific role in the tablet's performance. Formulation aims to achieve desired drug release, stability, and patient acceptability. The manufacturing process includes blending, granulation, compression, and sometimes coating, ensuring uniformity and quality. Quality control tests as per the Indian Pharmacopoeia (IP) include weight variation, hardness, and friability, disintegration, and dissolution tests. Mastery of this technology ensures the production of effective, safe, and high-quality pharmaceutical tablets.

Content

Module I (Introduction & Granulation)	Introduction to tablets, Classification of Tablets, Granulation methods, and evaluations of granules.
Module II (Basics of tablet manufacturing)	Tooling and compression, Tablet defects
Module III (Quality check)	IPQC test for tablets, apparatus used
Module IV (Tablet coating)	Tablet Coating
Industrial Visit	Industrial Visit
Module V (Assessment)	Final evaluation (report Submission and Quiz)

Date: From 21st August 2023

Time: 11:30am -12:20pm

**Indore Institute of
Pharmacy**

Venue: S16 Classroom IIP

Event Detail: To provide quality education in this competitive world of technology to the students' Pharmaceutics department, Indore Institute of Pharmacy, Indore has organized 40 hours of SIG on Tableting Technology for B. Pharm II-year students from 21st August 2023.

The main objective of the SIG was the early introduction of the formulation and development of Tablets with industrial exposure. SIG was coordinated by, Ms. Nayany Sharma, and Ms. Parul Vaishnav and Ms. Himani Jaisinghani

The program was focused on giving students a clear view of formulation factors and methods to prepare tablets. Mr. Sachin Bathma M.D. in Axiom Analytical Service and Recruitment Agency, Indore was present as an expert from Industry.

Students were given hands-on training on tablet press and sophisticated instruments related to tablet IPQC. The problems and real-time challenges in Pharma Industry were explained to all the students. Students were exposed to all the critical concepts and tooling required for the formulation of Tablets. The module is consisting of both theory and practical exposure for students. This benefitted the students to understand the concept thoroughly. Industrial Visit has enlightened students with his experience in the Pharmaceutical Industry.

We thank Shri Arun S Bhatnagar Sir, Director General, IIST-IIP-IIMR, and Dr. Nimita Manocha, Principal IIP for continuous support, guidance, and motivation

Benefits of Course

Understanding Tablet: Gain comprehensive knowledge of tablets, including their formulation and the selection of excipients, which play crucial roles in ensuring the desired drug release, stability, and patient acceptability.

Manufacturing Proficiency: Acquire expertise in the manufacturing process of tablets, encompassing various techniques and equipment used to produce high-quality pharmaceutical products efficiently and consistently.

Quality Control Mastery: Learn the essential quality control tests for tablets as per the Indian Pharmacopoeia (IP), ensuring that the tablets meet stringent standards for safety, efficacy, and quality.

Industry Relevance: Develop the ability to correlate theoretical knowledge with the practical and professional needs of the pharmaceutical industry, preparing for real-world applications and problem-solving in a highly regulated field.

Outcome:

- Explain tablets, formulation (selection of excipients and their role in formulation), and manufacturing of tablets
- Quality control tests for tablets as per IP.
- They can correlate theoretical knowledge with the professional and practical needs of the pharmaceutical industry

Event Detail:

To impart quality education in the field of technology and advancements, Indore Institute of Pharmacy, has organized a 40 hours SIG on MS Excel and Statistics expertise for B.Pharm II Year students 1st April 2024 to 15th May 2024. SIG was conducted by Mr. Vivek Gupta Assistant Professor, Indore Institute of Pharmacy, Indore as a resource person. 80 students participated in it. He has briefed students about Data Validation, Time and Date Calculation, conditional formatting, data formats, text to columns, pivot tables, using IF function etc. The module is consisting of both theory and practical exposure to students. He discussed the various formulas that can be used to work on the data analysis especially for examination and student data. He also explained the usage of excel in drawing graphs and charts.

The Benefits Of Learning Excel Includes

- Build great charts
- Use conditional formatting
- Help identify trends
- Bring data together

Outcome:

- The students learnt various features of Microsoft Excel and statistics
- They learnt handling data using Excel
- Students learnt using various formulas in excel and Graphs.
- Students became well versed with the excel utility which in turn increased their employability.

To,
The Director General
IIST/IIP/IIMR

Subject: - Regarding SIG on Instrument Handling Expertise (HPLC)
and MS EXCEL in IIP.

Respected Sir,

With reference to above mentioned subject, we are
organizing SIG on Instrument Handling Expertise (HPLC) and MS
EXCEL for B.Pharm VII Semester (July-Dec 2023)

Handling Expertis for HPLC will be under MOU with
AASRA Labs and MS EXCEL expert from IIST Indore.

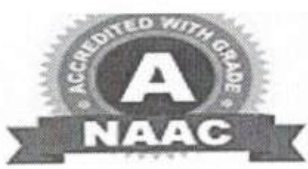

Kindly give approval for persue SIG.

Thank you

SIG on

Analytical Instruments HPLC and other related Practices

1. Background

The Axiom Analytical Services and recruitment agency established its Axiom Analytical Training Program in 2021 at Rajendra Nagar, Indore. Currently, AASRA is running Industrial Vocational Training Courses and Pharmaceutical Analytical Skill Development Courses for M.Pharm, B. Pharma, M.Sc., B.Sc. Students as well as for working Professionals of Academic or Pharmaceutical Industries. AASRA has developed the advance Instrumental facilities to cater the need of Students, working professionals and Industries.

2. About Course

This SIG aims to equip participants with the skills required to handle and operate sophisticated analytical instruments like HPLC, which are imperative in the present industrial environment. The training provides a sound background of the basic principles of HPLC analysis, an understanding of the instrumentation involved and the opportunity to become familiar with practical Volumetric and weighing techniques.

3. Content

Day-1 – Theory and practical

1, Introduction to chromatography Meaning, History, Development and current scenario.

2, Importance of Volumetric Practices during Chromatographic analysis in Pharmaceutical Industries.

3, Units of concentration (PPM and % solutions and their preparation)

4, Understand Dilution to prepare Diluted Solution.

5, Volumetric Measurement with Pipetting and Volume makeup Practical exercise.

Day-2 – Theory and practical

1, Verbal Evaluation of day first session.

2, Introduction of HPLC (Basic component / Parts / and types of HPLC)

3, Importance of weighing Practices during Chromatographic analysis in Pharmaceutical Industries.

4, Do's and Don'ts of Weighing practices.

5, Weighing practices with students and analysis of sample to evaluate the accuracy of weighing.

Day-3 – Theory and practical

1, Verbal Evaluation of day 1 and 2 session.

2, HPLC - Introduction of HPLC

Parts of HPLC instrument

Solvent reservoirs

HPLC Solvent Pumping Systems

Type of pump

Auto samplers

Looping of sample and standard solution

HPLC Column

Types of column

Detectors

Types of Detector

Mode of HPLC analysis

Reverse phase (partition) chromatograph

Normal phase (absorption) chromatography

Elution Mode in HPLC analysis

Isocratic mode

Gradient mode

Day-4 – Theory and practical

1, Verbal Evaluation of day 1,2 and 3 sessions.

2, Use of HPLC in Pharmaceutical Analysis.

- Type of analysis done on HPLC
- Assay
- Related Substances

2, Analysis on HPLC For Purity Test.

- Method Preparation
- Sequence Preparation
- Integration of Chromatogram

Day-5 Practical and evaluation of SIG.

1, Verbal Evaluation of day 1,2,3 and 4 sessions.

2, Combination of Volumetric, Weighing and chromatographic techniques in practical with group of students.

3, Q&A session and evaluation of SIG by Objective type Q&A.

5. Course structure

Duration : 4 hrs. / 10 Days

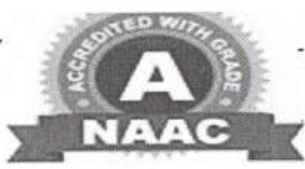

Theory & Practical : 40 Hours

Theory and Practical sessions will be conducted as per predefined schedule.

6. Evaluation: Through different modes like verbal and end course examination.

Certification: Certificate will be awarded at the end for the course, to all students who will attend scheduled activities.

Q. And A.

Q & A DATE 20/06/2023

Pharmaceutical Sophisticated Analytical Techniques

Name of Student: _____

Q1. Which of the following analytical method is used to measure the analyte concentration depending on the quantity of light received by the analyte?

- (a) Spectroscopy
- (b) Decantation
- (c) Potentiometry
- (d) None of the above

Q2. What is the wavelength range of the UV spectrum?

- (a) 100 nm to 500 nm
- (b) 200 nm to 800 nm
- (c) 300 nm to 1000 nm
- (d) 400 nm to 1600 nm

Q3. What are the main components of a UV visible spectrophotometer?

Answer: The main components of a UV visible spectrophotometer are

1. Light Source
2. Monochromator
3. Sample holder
4. Detector
5. Software

Q4. Beer Lambert's law gives the relation between which of the following?

- a) Reflected radiation and concentration
- b) Scattered radiation and concentration
- (c) Energy absorption and concentration.
- d) Energy absorption and reflected radiation

Q5. Which of the following is not a limitation of Beer Lambert's law, which gives the relation between absorption, thickness, and concentration?

- a) Concentration must be lower
- b) Radiation must have higher bandwidth

Principal
Indore Institute of Pharmacy,
INDORE (M.P.)

- c) Radiation source must be monochromatic
- d) Does not consider factors other than thickness and concentration that affect absorbance

Q6. Beer's law states that the intensity of light decreases with respect to _____.

- a) Concentration
- b) Distance
- c) Composition
- d) Volume

Q7. Lambert's law states that the intensity of light decreases with respect to _____.

- a) Concentration
- b) Distance
- c) Composition
- d) Volume

Q8. What is the unit of absorbance which can be derived from Beer Lambert's law?

- a) $Lmol^{-1} cm^{-1}$
- b) $Lgm^{-1} cm^{-1}$
- c) Cm
- d) No unit

Q9. The representation of Beer Lambert's law is given as $A = abc$. If 'b' represents distance, 'c' represents concentration and 'A' represents absorption, what does 'a' represent?

- a) Intensity
- b) Transmittance
- c) Absorptivity
- d) Admittance

Q10. Write Beer's Lambert's Law. (only law)

The decrease in intensity of light is directly proportional to the concentration of medium and path length.

1. In Thin layer chromatography, the stationary phase is made of _____ and the mobile phase is made of _____
- a) Solid, liquid
 b) Liquid, liquid
 c) Liquid, gas
 d) Solid, gas
2. Chromatography is a physical method that is used to separate and analyse _____
- a) Simple mixtures
 b) Complex mixtures
 c) Viscous mixtures
 d) Metals
3. In Gas-liquid phase chromatography, the stationary phase is composed of _____ and the mobile phase is made of _____
- a) Solid, liquid
 b) Liquid, liquid
 c) Liquid, gas
 d) Solid, gas
4. In Column chromatography, the stationary phase is made of _____ and the mobile phase is made of _____
- a) Solid, liquid
 b) Liquid, liquid
 c) Liquid, gas
 d) Solid, gas
5. In chromatography, the stationary phase can be _____ supported on a solid.
- a) Solid or liquid
 b) Liquid or gas
 c) Solid only
 d) Liquid only
6. Base line resolution is achieved when degree of resolution/separation is _____
- a) 1
 b) 0
 c) 0.5
 d) 1.5
7. The time taken by the analyte after sample injection to reach the detector is called _____
- a) Dead time
 b) Retention time
 c) Adjusted retention time
 d) Solute migration rate
8. The time required for a molecule of the mobile phase to pass through the column is called _____
- a) Dead time
 b) Solute migration rate
 c) Adjusted retention time
 d) Retention time
9. Adjusted retention time is the remaining retention time after subtracting _____ from _____
- a) Solute migration rate and retention time
 b) Retention time and solute migration rate
 c) Dead time and retention time
 d) Retention time and dead time
10. Using Chromatogram as detector in Chromatography, a graph is obtained between _____ and time.
- a) Quantity
 b) Density
 c) Concentration
 d) Specific gravity
11. Adjusted retention volume is the remaining retention volume after subtracting _____ from _____
- a) Solute migration rate and retention volume
 b) Retention volume and solute migration rate
 c) Dead volume and retention volume
 d) Retention volume and dead volume
12. In Automatic amino-acid analyzer, the sample containing _____ of each amino compound is introduced at the top of the ion exchange column.
- a) 1 to 10 μ moles
 b) 1 to 10 moles
 c) 0.05 to 2 moles
 d) 0.05 to 2 μ moles

13. Which of the following is not true about narrow bore column when compared to standard columns?

- a) Internal diameter decreases
b) Volumetric flow decreases
c) Solvent cost is saved
d) Detector response time increases

14. In chromatography, which of the following can the mobile phase be made of?

- a) Solid or liquid
b) Liquid or gas
c) Gas only
d) Liquid only

15. Which of the following cannot be used as an adsorbent in Column adsorption chromatography?

- a) Magnesium oxide
b) Silica gel
c) Activated alumina
d) Potassium permanganate

16. Which of the following types of chromatography involves the separation of substances in a mixture over a 0.2mm thick layer of an adsorbent?

- a) Gas liquid
b) Column
c) Thin layer
d) Paper

17. In which type of chromatography, the stationary phase held in a narrow tube and the mobile phase is forced through it under pressure?

- a) Column chromatography
b) Planar chromatography
c) Liquid chromatography
d) Gas chromatography

18. Which of the following is not true about the guard column used in liquid chromatography?

- a) It filters particles that clog the separation column
b) It extends the lifetime of separation column
c) It allows particles that cause precipitation upon contact with stationary or mobile phase
d) The size of packing varies with the type of protection needed

19. Which of the following columns are not used in liquid or high performance liquid chromatography?

- a) Analytical column
b) Separation column
c) Guard column
d) Capillary column

20. Liquid chromatography can be performed in which of the following ways?

- a) Only in columns
b) Only on plane surfaces
c) Either in columns or on plane surfaces
d) Neither in columns nor on plane surfaces

21. Which of the following is not a property of a good detector used in liquid chromatography?

- a) Good sensitivity
b) Ability to function in the presence of a large background signal
c) Short response time
d) Volume of detector must be large

22. In UV-Visible detectors, the cells are not made of which of the following materials?

- a) Quartz
b) Teflon
c) Silica
d) KFTF

23. Which of the following is not true about High pressure liquid chromatography (HPLC)?

- a) It requires high pressure for the separation of the species
b) There is no need to vaporise the samples
c) It is performed in columns
d) It has high sensitivity

24. In older analytical methods, which of the following methods were used to allow movement of the mobile phase?

- a) Pumps
b) Pressure
c) Gravity
d) Blowing air into the column

25. Which of the following steps takes place after injection of feed in HPLC?

- a) Detection of components
b) Separation in the column
c) Elution from the column
d) Collection of eluted component

26. What happens during the 'elution from the column' phase in HPLC?

- a) Components with greatest affinity elute first
b) Components with least affinity elute first
c) Components elute in a random manner
d) Components elute according to their concentration in the mixture

27. In HPLC, the position of peaks on the time axis can be used to determine which of the following?

- a) Components of the sample
 b) Amount of component in the sample
 c) Column efficiency
 d) Column resolution

28. In chromatogram, the area under the peak can be used to determine which of the following?

- a) Components of the sample
 b) Amount of component in the sample
 c) Column efficiency
 d) Column resolution

29. Components with a strong attraction to the support move more slowly than components with weak attraction.

- a) True
 b) False

30. Retention distance is the distance between point of injection and minimum peak in the recorder or computer generated chart.

- a) True
 b) False

31. The solute, while moving in the column is always in equilibrium with both the stationary phase and the mobile phase.

- a) True
 b) False

32. High pressure liquid chromatography can be performed only in columns.

- a) True
 b) False

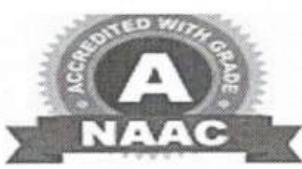

33. Write down the component/ Parts of HPLC.

34. Write down the steps of HPLC operation.

35. Write down the name of all instruments available in your collage laboratory.

SESSION 2022-2023

SIG REPORT

To impart quality education in the field of technology and advancements, Indore Institute of Pharmacy, has organized a 40 hours SIG on Sophisticated Instrument Handling expertise for B. Pharm Final Year (VII semester) students from 19th June 2023 to 30th June 2023. SIG was conducted by Mr. Sachin Bathma M.D. in Axiom Analytical Service and Recruitment Agency, Indore as a resource person. The module comprises of both theory and practical exposure to the students. Mr. Sachin has briefed students about different Spectroscopic and Chromatographic techniques in the theory classes and Hands-On training on HPLC and UV Spectrophotometer was provided to each student in the practical hours so as to get in depth knowledge about the instrument and also help the students to understand the concept thoroughly. Mid-session evaluation test and Final Evaluation Test was taken to evaluate the understanding of the student about the topic of SIG. Expert has also enlightened students with his experience in analytical skills in the Pharmaceutical Industry.

1. In Thin layer chromatography, the stationary phase is made of _____ and the mobile phase is made of _____

- a) Solid, liquid
c) Liquid, gas
b) Liquid, liquid
d) Solid, gas

2. Chromatography is a physical method that is used to separate and analyse _____

- a) Simple mixtures
c) Viscous mixtures
b) Complex mixtures
d) Metals

3. In Gas-liquid phase chromatography, the stationary phase is composed of _____ and the mobile phase is made of _____

- a) Solid, liquid
c) Liquid, gas
b) Liquid, liquid
d) Solid, gas

4. In Column chromatography, the stationary phase is made of _____ and the mobile phase is made of _____

- a) Solid, liquid
c) Liquid, gas
 b) Liquid, liquid
d) Solid, gas

5. In chromatography, the stationary phase can be _____ supported on a solid.

- a) Solid or liquid
c) Solid only
b) Liquid or gas
d) Liquid only

6. Base line resolution is achieved when degree of resolution/separation is _____

- a) 1
c) 0.5
b) 0
 d) 1.5

7. The time taken by the analyte after sample injection to reach the detector is called _____

- a) Dead time
c) Adjusted retention time
b) Solute migration rate
 d) Retention time

8. The time required for a molecule of the mobile phase to pass through the column is called _____

- a) Dead time
c) Adjusted retention time
b) Solute migration rate
d) Retention time

9. Adjusted retention time is the remaining retention time after subtracting _____ from _____

- a) Solute migration rate and retention time
c) Dead time and retention time
b) Retention time and solute migration rate
d) Retention time and dead time

10. Using Chromatogram as detector in Chromatography, a graph is obtained between _____ and time.

- a) Quantity
c) Concentration
b) Density
d) Specific gravity

11. Adjusted retention volume is the remaining retention volume after subtracting _____ from _____

- a) Solute migration rate and retention volume
c) Dead volume and retention volume
b) Retention volume and solute migration rate
d) Retention volume and dead volume

12. In Automatic amino-acid analyzer, the sample containing _____ of each amino compound is introduced at the top of the ion exchange column.

- a) 1 to 10 μ moles
c) 0.05 to 2 μ moles
b) 1 to 10 moles
 d) 0.05 to 2 μ moles

13. Which of the following is not true about narrow bore column when compared to standard columns?
- a) Internal diameter decreases
 b) Volumetric flow decreases
 c) Solvent cost is saved
 d) Detector response time increases
14. In chromatography, which of the following can the mobile phase be made of?
- a) Solid or liquid
 b) Liquid or gas
 c) Gas only
 d) Liquid only
15. Which of the following cannot be used as an adsorbent in Column adsorption chromatography?
- a) Magnesium oxide
 b) Silica gel
 c) Activated alumina
 d) Potassium permanganate
16. Which of the following types of chromatography involves the separation of substances in a mixture over a 0.2mm thick layer of an adsorbent?
- a) Gas liquid
 b) Column
 c) Thin layer
 d) Paper
17. In which type of chromatography, the stationary phase held in a narrow tube and the mobile phase is forced through it under pressure?
- a) Column chromatography
 b) Planar chromatography
 c) Liquid chromatography
 d) Gas chromatography
18. Which of the following is not true about the guard column used in liquid chromatography?
- a) It filters particles that clog the separation column
 b) It extends the lifetime of separation column
 c) It allows particles that cause precipitation upon contact with stationary or mobile phase
 d) The size of packing varies with the type of protection needed
19. Which of the following columns are not used in liquid or high performance liquid chromatography?
- a) Analytical column
 b) Separation column
 c) Guard column
 d) Capillary column
20. Liquid chromatography can be performed in which of the following ways?
- a) Only in columns
 b) Only on plane surfaces
 c) Either in columns or on plane surfaces
 d) Neither in columns nor on plane surfaces
21. Which of the following is not a property of a good detector used in liquid chromatography?
- a) Good sensitivity
 b) Ability to function in the presence of a large background signal
 c) Short response time
 d) Volume of detector must be large
22. In UV-Visible detectors, the cells are not made of which of the following materials?
- a) Quartz
 b) Teflon
 c) Silica
 d) KFLT
23. Which of the following is not true about High pressure liquid chromatography (HPLC)?
- a) It requires high pressure for the separation of the species
 b) There is no need to vaporise the samples
 c) It is performed in columns
 d) It has high sensitivity
24. In older analytical methods, which of the following methods were used to allow movement of the mobile phase?
- a) Pumps
 b) Pressure
 c) Gravity
 d) Blowing air into the column
25. Which of the following steps takes place after injection of feed in HPLC?
- a) Detection of components
 b) Separation in the column
 c) Elution from the column
 d) Collection of eluted component
26. What happens during the 'elution from the column' phase in HPLC?
- a) Components with greatest affinity elute first
 b) Components with least affinity elute first
 c) Components elute in a random manner
 d) Components elute according to their concentration in the mixture

27. In HPLC, the position of peaks on the time axis can be used to determine which of the following?

- a) Components of the sample
b) Amount of component in the sample
c) Column efficiency
d) Column resolution

28. In chromatogram, the area under the peak can be used to determine which of the following?

- a) Components of the sample
b) Amount of component in the sample
c) Column efficiency
d) Column resolution

29. Components with a strong attraction to the support move more slowly than components with weak attraction.

- a) True
b) False

30. Retention distance is the distance between point of injection and minimum peak in the recorder or computer generated chart.

- a) True
b) False

31. The solute, while moving in the column is always in equilibrium with both the stationary phase and the mobile phase.

- a) True
b) False

32. High pressure liquid chromatography can be performed only in columns.

- a) True
b) False

33. Write down the component/ Parts of HPLC.

- 1] Reservoir
- 2] Pump

- 3] Switch on Pump & detector.
- 4] Click on Purge Button.
- 5] Create Method on Software
- 6] Fill, load & inject
- 7] Peak will come.
- 8] Note the retention time.

35. Write down the name of all instruments available in your collage laboratory.

- 1] HPLC [High Performance liquid Chromatography]
- 2] UV spectrophotometer
- 3] pH meter
- 4] Conductivity meter
- 5] flame photometer
- 6] Sonicator
- 7] Digital weighing Balance
- 8] Desiccator.

1. In Thin layer chromatography, the stationary phase is made of _____ and the mobile phase is made of _____

- a) Solid, liquid
 c) Liquid, gas

- b) Liquid, liquid
d) Solid, gas

2. Chromatography is a physical method that is used to separate and analyse _____

- a) Simple mixtures
 c) Viscous mixtures

- b) Complex mixtures
d) Metals

3. In Gas-liquid phase chromatography, the stationary phase is composed of _____ and the mobile phase is made of _____

- a) Solid, liquid
 c) Liquid, gas

- b) Liquid, liquid
d) Solid, gas

4. In Column chromatography, the stationary phase is made of _____ and the mobile phase is made of _____

- a) Solid, liquid
 c) Liquid, gas

- b) Liquid, liquid
d) Solid, gas

5. In chromatography, the stationary phase can be _____ supported on a solid.

- a) Solid or liquid
 c) Solid only

- b) Liquid or gas
d) Liquid only

6. Base line resolution is achieved when degree of resolution/separation is _____

- a) 1
c) 0.5

- b) 0
 d) 1.5

7. The time taken by the analyte after sample injection to reach the detector is called

- a) Dead time
 c) Adjusted retention time

- b) Solute migration rate
 d) Retention time

8. The time required for a molecule of the mobile phase to pass through the column is called _____

- a) Dead time
 c) Adjusted retention time

- b) Solute migration rate
d) Retention time

9. Adjusted retention time is the remaining retention time after subtracting _____ from _____

- a) Solute migration rate and retention time
 c) Dead time and retention time

- b) Retention time and solute migration rate
d) Retention time and dead time

10. Using Chromatogram as detector in Chromatography, a graph is obtained between _____ and time.

- a) Quantity
 c) Concentration

- b) Density
d) Specific gravity

11. Adjusted retention volume is the remaining retention volume after subtracting _____ from _____

- a) Solute migration rate and retention volume
 c) Dead volume and retention volume

- b) Retention volume and solute migration rate
d) Retention volume and dead volume

12. In Automatic amino-acid analyzer, the sample containing _____ of each amino compound is introduced at the top of the ion exchange column.

29. Components with a strong attraction to the support move more slowly than components with weak attraction.

- a) True ✓
 b) False ✓

30. Retention distance is the distance between point of injection and minimum peak in the recorder or computer generated chart.

- a) True ✓
 b) False ✓

31. The solute, while moving in the column is always in equilibrium with both the stationary phase and the mobile phase.

- a) True ✓
 b) False ✓

32. High pressure liquid chromatography can be performed only in columns.

- a) True ✓
 b) False ✓

33. Write down the component/ Parts of HPLC.

- ans →
- Pump
 - Detector
 - Column
 - Auto Sampler

34. Write down the steps of HPLC operation.

- ans →
- Purging
 - Method file
 - Batch file
 - Data file
 - Sample loading and Injection
 - Starting process and analyse the Data

35. Write down the name of all instruments available in your collage laboratory.

- ans → Sonicator, HPLC machine, 30 printer, Digital photometer, PH meter, UV-Photometer, Flame photometer, Digital sampling

- In Thin layer chromatography, the stationary phase is made of _____ and the mobile phase is made of _____
 a) Solid, liquid
 b) Liquid, liquid
 c) Liquid, gas
 d) Solid, gas
- Chromatography is a physical method that is used to separate and analyse _____
 a) Simple mixtures
 b) Complex mixtures
 c) Viscous mixtures
 d) Metals
- In Gas-liquid phase chromatography, the stationary phase is composed of _____ and the mobile phase is made of _____
 a) Solid, liquid
 b) Liquid, liquid
 c) Liquid, gas
 d) Solid, gas
- In Column chromatography, the stationary phase is made of _____ and the mobile phase is made of _____
 a) Solid, liquid
 b) Liquid, liquid
 c) Liquid, gas
 d) Solid, gas
- In chromatography, the stationary phase can be _____ supported on a solid.
 a) Solid or liquid
 b) Liquid or gas
 c) Solid only
 d) Liquid only
- Base line resolution is achieved when degree of resolution/separation is _____
 a) 1
 b) 0
 c) 0.5
 d) 1.5
- The time taken by the analyte after sample injection to reach the detector is called _____
 a) Dead time
 b) Solute migration rate
 c) Adjusted retention time
 d) Retention time
- The time required for a molecule of the mobile phase to pass through the column is called _____
 a) Dead time
 b) Solute migration rate
 c) Adjusted retention time
 d) Retention time
- Adjusted retention time is the remaining retention time after subtracting _____ from _____
 a) Solute migration rate and retention time
 b) Retention time and solute migration rate
 c) Dead time and retention time
 d) Retention time and dead time
- Using Chromatogram as detector in Chromatography, a graph is obtained between _____ and time.
 a) Quantity
 b) Density
 c) Concentration
 d) Specific gravity
- Adjusted retention volume is the remaining retention volume after subtracting _____ from _____
 a) Solute migration rate and retention volume
 b) Retention volume and solute migration rate
 c) Dead volume and retention volume
 d) Retention volume and dead volume
- In Automatic amino-acid analyzer, the sample containing _____ of each amino compound is introduced at the top of the ion-exchange column.
 a) 0.1% to 2 μmoles
 b) 0.1% to 2 moles

13. Which of the following is not true about narrow bore column when compared to standard columns?

- a) Internal diameter decreases ✓
- b) Volumetric flow decreases
- c) Solvent cost is saved
- d) ~~Detector response time increases~~

14. In chromatography, which of the following can the mobile phase be made of?

- a) Solid or liquid ✓
- b) Liquid or gas
- c) Gas only
- d) ~~Liquid only~~

15. Which of the following cannot be used as an adsorbent in Column adsorption chromatography?

- a) Magnesium oxide ✓
- b) ~~Silica gel~~
- c) Activated alumina
- d) Potassium permanganate

16. Which of the following types of chromatography involves the separation of substances in a mixture over a 0.2mm thick layer of an adsorbent?

- a) Gas liquid ✓
- b) Column
- c) ~~Thin layer~~
- d) Paper

17. In which type of chromatography, the stationary phase held in a narrow tube and the mobile phase is forced through it under pressure?

- a) ~~Column chromatography~~ ✓
- b) Planar chromatography
- c) Liquid chromatography
- d) Gas chromatography

18. Which of the following is not true about the guard column used in liquid chromatography?

- a) It filters particles that clog the separation column ✓
- b) It extends the lifetime of separation column
- c) It allows particles that cause precipitation upon contact with stationary or mobile phase ✓
- d) The size of packing varies with the type of protection needed.

19. Which of the following columns are not used in liquid or high performance liquid chromatography?

- a) Analytical column ✓
- b) ~~Separation column~~
- c) Guard column
- d) Capillary column

20. Liquid chromatography can be performed in which of the following ways?

- a) ~~Only in columns~~ ✓
- b) Only on plane surfaces
- c) Either in columns or on plane surfaces
- d) Neither in columns nor on plane surfaces

21. Which of the following is not a property of a good detector used in liquid chromatography?

- a) Good sensitivity ✓
- b) Ability to function in the presence of a large background signal
- c) Short response time
- d) ~~Volume of detector must be large~~

22. In UV-Visible detectors, the cells are not made of which of the following materials?

- a) Quartz ✓
- b) Teflon
- c) ~~Silica~~
- d) KFI ✓

23. Which of the following is not true about High pressure liquid chromatography (HPLC)?

- a) It requires high pressure for the separation of the species ✓
- b) ~~There is no need to vaporise the samples~~
- c) It is performed in columns
- d) It has high sensitivity

24. In older analytical methods, which of the following methods were used to allow movement of the mobile phase?

- a) Pumps ✓
- b) Pressure
- c) Gravity
- d) ~~Blowing air into the column~~

25. Which of the following steps takes place after injection of feed in HPLC?

- a) ~~Detection of components~~ ✓
- b) Separation in the column
- c) Elution from the column
- d) Collection of eluted component

26. What happens during the 'elution from the column' phase in HPLC?

- a) Components with greatest affinity elute first ✓
- b) Components with least affinity elute first
- c) Components elute according to their concentration in the mixture

27. In HPLC, the position of peaks on the time axis can be used to determine which of the following?
 a) Components of the sample b) Amount of component in the sample
 c) Column efficiency d) Column resolution
28. In chromatogram, the area under the peak can be used to determine which of the following?
 a) Components of the sample b) Amount of component in the sample
 c) Column efficiency d) Column resolution
29. Components with a strong attraction to the support move more slowly than components with weak attraction.
 a) True b) False
30. Retention distance is the distance between point of injection and minimum peak in the recorder or computer generated chart.
 a) True b) False
31. The solute, while moving in the column is always in equilibrium with both the stationary phase and the mobile phase.
 a) True b) False
32. High pressure liquid chromatography can be performed only in columns.
 a) True b) False
33. Write down the component/ Parts of HPLC.

Ans 33
 An HPLC instrument has four basic parts which include a pump, autosampler, a column compartment and detector.

34. Write down the steps of HPLC operation.

- Ans 34
- 1) Switch on the button.
 - 2) Purging
 - 3) Method file
 - 4) Batch file
 - 5) Data file
 - 6) Sample loading and injection
 - 7) Storing process and analysis the data.

35. Write down the name of all instruments available in your collage laboratory.

Ans 35
 HPLC, Apparatus, UV Photometer, Digital Potentiometer, PH detector, melting Point Detector, Solubility apparatus, Visitation apparatus, frame, Photometer

27. In HPLC, the position of peaks on the time axis can be used to determine which of the following?

- a) Components of the sample
b) Amount of component in the sample
c) Column efficiency
d) Column resolution

28. In chromatogram, the area under the peak can be used to determine which of the following?

- a) Components of the sample
b) Amount of component in the sample
c) Column efficiency
d) Column resolution

29. Components with a strong attraction to the support move more slowly than components with weak attraction.

- a) True
b) False

30. Retention distance is the distance between point of injection and minimum peak in the recorder or computer generated chart.

- a) True
b) False

31. The solute, while moving in the column is always in equilibrium with both the stationary phase and the mobile phase.

- a) True
b) False

32. High pressure liquid chromatography can be performed only in columns.

1. In Thin layer chromatography, the stationary phase is made of _____ and the mobile phase is made of _____

- a) Solid, liquid ✓
b) Liquid, liquid
c) Liquid, gas ✓
d) Solid, gas

2. Chromatography is a physical method that is used to separate and analyse _____

- a) Simple mixtures ✓
b) ~~Complex~~ complex mixtures
c) Viscous mixtures ✓
d) Metals

3. In Gas-liquid phase chromatography, the stationary phase is composed of _____ and the mobile phase is made of _____

- a) Solid, liquid ✓
b) Liquid, liquid
c) Liquid, gas ✓
d) Solid, gas

4. In Column chromatography, the stationary phase is made of _____ and the mobile phase is made of _____

- a) Solid, liquid ✓
b) ~~Liquid~~ liquid
c) Liquid, gas ✓
d) Solid, gas

5. In chromatography, the stationary phase can be _____ supported on a solid.

- a) ~~Solid~~ or liquid ✓
b) Liquid or gas
c) Solid only ✓
d) Liquid only

6. Base line resolution is achieved when degree of resolution/separation is _____

- a) 1 ✓
b) 0
c) 0.5 ✓
d) 1.5

7. The time taken by the analyte after sample injection to reach the detector is called

- a) Dead time ✓
b) Solute migration rate
c) Adjusted retention time ✓
d) Retention time

8. The time required for a molecule of the mobile phase to pass through the column is called _____

- a) Dead time ✓
b) Solute migration rate
c) Adjusted retention time ✓
d) Retention time

9. Adjusted retention time is the remaining retention time after subtracting _____ from _____

- a) Solute migration rate and retention time ✓
b) Retention time and solute migration rate
c) Dead time and retention time ✓
d) Retention time and dead time

10. Using Chromatogram as detector in Chromatography, a graph is obtained between _____ and time.

- a) Quantity ✓
b) Density
c) Concentration ✓
d) Specific gravity

11. Adjusted retention volume is the remaining retention volume after subtracting _____ from _____

- a) Solute migration rate and retention volume ✓
b) Retention volume and solute migration rate
c) Dead volume and retention volume ✓
d) Retention volume and dead volume

12. In Automatic amino-acid analyzer, the sample containing _____ of each amino compound is introduced at the top of the ion exchange column.

- a) 1 to 10 moles ✓
b) 1 to 10 moles
c) 0.05 to 2 moles ✓
d) 0.05 to 2 μ moles

13. Which of the following is not true about narrow bore column when compared to standard columns?

- a) Internal diameter decreases
b) Volumetric flow decreases
c) Solvent cost is saved
d) Detector response time increases

14. In chromatography, which of the following can the mobile phase be made of?

- a) Solid or liquid
b) Liquid or gas
c) Gas only
d) Liquid only

15. Which of the following cannot be used as an adsorbent in Column adsorption chromatography?

- a) Magnesium oxide
b) Silica gel
c) Activated alumina
d) Potassium permanganate

16. Which of the following types of chromatography involves the separation of substances in a mixture over a 0.2mm thick layer of an adsorbent?

- a) Gas liquid
b) Column
c) Thin layer
d) Paper

17. In which type of chromatography, the stationary phase held in a narrow tube and the mobile phase is forced through it under pressure?

- a) Column chromatography
b) Planar chromatography
c) Liquid chromatography
d) Gas chromatography

18. Which of the following is not true about the guard column used in liquid chromatography?

- a) It filters particles that clog the separation column
b) It extends the lifetime of separation column
c) It allows particles that cause precipitation upon contact with stationary or mobile phase
d) The size of packing varies with the type of protection needed

19. Which of the following columns are not used in liquid or high performance liquid chromatography?

- a) Analytical column
b) Separation column
c) Guard column
d) Capillary column

20. Liquid chromatography can be performed in which of the following ways?

- a) Only in columns
b) Only on plane surfaces
c) Either in columns or on plane surfaces
d) Neither in columns nor on plane surfaces

21. Which of the following is not a property of a good detector used in liquid chromatography?

- a) Good sensitivity
b) Ability to function in the presence of a large background signal
c) Short response time
d) Volume of detector must be large

22. In UV-Visible detectors, the cells are not made of which of the following materials?

- a) Quartz
b) Teflon
c) Silica
d) KFLF

23. Which of the following is not true about High pressure liquid chromatography (HPLC)?

- a) It requires high pressure for the separation of the species
b) There is no need to vaporise the samples
c) It is performed in columns
d) It has high sensitivity

24. In older analytical methods, which of the following methods were used to allow movement of the mobile phase?

- a) Pumps
b) Pressure
c) Gravity
d) Blowing air into the column

25. Which of the following steps takes place after injection of feed in HPLC?

- a) Detection of components
b) Separation in the column
c) Elution from the column
d) Collection of eluted component

26. What happens during the 'elution from the column' phase in HPLC?

- a) Components with greatest affinity elute first
b) Components with least affinity elute first
c) Components elute in a random manner
d) Components elute according to their concentration in the mixture

27. In HPLC, the position of peaks on the time axis can be used to determine which of the following?

- a) Components of the sample
b) Amount of component in the sample
c) Column efficiency
d) Column resolution

28. In chromatogram, the area under the peak can be used to determine which of the following?

Pharmaceutical Sophisticated Analytical Techniques

Name of Student: Am Mahajan

Q1. Which of the following analytical method is used to measure the analyte concentration depending on the quantity of light received by the analyte?

- (a) Spectroscopy
- (b) Decantation
- (c) Potentiometry
- (d) None of the above

Q2. What is the wavelength range of the UV spectrum?

- (a) 100 nm to 500 nm
- (b) 200 nm to 800 nm
- (c) 300 nm to 1000 nm
- (d) 400 nm to 1600 nm

Q3. What are the main components of a UV visible spectrophotometer?

Answer: The main components of a UV visible spectrophotometer are

1. Light Source
2. Monochromator
3. Sample Holder
4. Detector
5. Interpreter

Q4. Beer Lambert's law gives the relation between which of the following?

- a) Reflected radiation and concentration
- b) Scattered radiation and concentration
- c) Energy absorption and concentration.
- d) Energy absorption and reflected radiation

Q5. Which of the following is not a limitation of Beer Lambert's law, which gives the relation between absorption, thickness, and concentration?

- a) Concentration must be lower
- b) Radiation must have higher bandwidth

Principal
Indore Institute of Pharmacy,
INDORE (M.P.)

- c) Radiation source must be monochromatic
d) Does not consider factors other than thickness and concentration that affect absorbance

Q6. Beer's law states that the intensity of light decreases with respect to _____.

- a) Concentration
b) Distance
c) Composition
d) Volume

Q7. Lambert's law states that the intensity of light decreases with respect to _____.

- a) Concentration
b) Distance
c) Composition
d) Volume

Q8. What is the unit of absorbance which can be derived from Beer Lambert's law?

- a) $\text{Lmol}^{-1} \text{cm}^{-1}$
b) $\text{Lgm}^{-1} \text{cm}^{-1}$
c) Cm
d) No unit

Q9. The representation of Beer Lambert's law is given as $A = abc$. If 'b' represents distance, 'c' represents concentration and 'A' represents absorption, what does 'a' represent?

- a) Intensity
b) Transmittance
c) Absorptivity
d) Admittance

Q10. Write Beer's Lambert's Law. (only law)

$$A = \epsilon c l$$

$$A = abc \rightarrow \text{Absorptivity} \times \text{Conc}^c \times \text{Intensity of light} \times \text{Path length}$$

- a) Concentration
b) Distance
c) Composition
d) Volume

Q8. What is the unit of absorbance which can be derived from Beer Lambert's law?

- a) $L \text{ mol}^{-1} \text{ cm}^{-1}$
b) $L \text{ gm}^{-1} \text{ cm}^{-1}$
c) Cm
d) No unit

Q9. The representation of Beer Lambert's law is given as $A = abc$. If 'b' represents distance, 'c' represents concentration and 'A' represents absorption, what does 'a' represent?

- a) Intensity
b) Transmittance
c) Absorptivity
d) Admittance

Q10. Write Beer's Lambert's Law. (only law)

Q & A DATE 20/06/2023

Pharmaceutical Sophisticated Analytical Techniques

Name of Student: Yashika Joshi

Q1. Which of the following analytical method is used to measure the analyte concentration depending on the quantity of light received by the analyte?

- (a) Spectroscopy
- (b) Decantation
- (c) Potentiometry
- (d) None of the above

Q2. What is the wavelength range of the UV spectrum?

- (a) 100 nm to 500 nm
- (b) 200 nm to 800 nm
- (c) 300 nm to 1000 nm
- (d) 400 nm to 1600 nm

Q3. What are the main components of a UV visible spectrophotometer?

Answer: The main components of a UV visible spectrophotometer are

1. light source
2. monochromator
3. Sample holder
4. Detector
5. Interpulter

Q4. Beer Lambert's law gives the relation between which of the following?

- a) Reflected radiation and concentration
- b) Scattered radiation and concentration
- c) Energy absorption and concentration.
- d) Energy absorption and reflected radiation

Q5. Which of the following is not a limitation of Beer Lambert's law, which gives the relation between absorption, thickness, and concentration?

- a) Concentration must be lower
- b) Radiation must have higher bandwidth

Principal
Indore Institute of Pharmacy,
INDORE (M.P.)

- c) Radiation source must be monochromatic
- d) Does not consider factors other than thickness and concentration that affect absorbance

Q6. Beer's law states that the intensity of light decreases with respect to Concentration

- a) Concentration
- b) Distance
- c) Composition
- d) Volume

Q7. Lambert's law states that the intensity of light decreases with respect to Distance

- a) Concentration
- b) Distance
- c) Composition
- d) Volume

Q8. What is the unit of absorbance which can be derived from Beer Lambert's law?

- a) $Lmol^{-1} cm^{-1}$
- b) $Lgm^{-1} cm^{-1}$
- c) Cm
- d) No unit

Q9. The representation of Beer Lambert's law is given as $A = abc$. If 'b' represents distance, 'c' represents concentration and 'A' represents absorption, what does 'a' represent?

- a) Intensity
- b) Transmittance
- c) Absorptivity
- d) Admittance

Q10. Write Beer's Lambert's Law. (only law)

Answer \rightarrow Beer's Lambert's law, it is a relation ship between the absorbance of the concn of path length, Absorptivity.

Objective:

1. Accurate Documentation for Drug Manufacturing.
2. Effective Communication with Stakeholders.
3. Quality Assurance and Compliance.
4. Risk Mitigation.
5. Clinical Trial Documentation
6. Pharmacovigilance Reporting:
7. Efficient Knowledge Transfer.
8. Standardized Procedures.
9. Career Advancement.

For M. Pharm Fourth year students, a 40 hrs certificate course, SIG, on 'Technical Writing and Project Designing' has been conducted organized from 23-02-2024 to 11-03-2024 SIG consists of various modules. The SIG was conducted to enhance the basic knowledge of student's accordance to 'Technical Writing and Project Designing'. It enhanced student's knowledge on research, understanding of basic work flow of research writing, Identification and implementation of plagiarism tools in an organization, Students get knowledge about reference Manager like Mendeley, Zotero, End note. It helps to identify risk and its management as well as mitigation, it helps to identify criticality/severity related in new research

a. It helps to enhance the novelty of the research area, use authenticated technical writing and project designing for achieving long term as well as short term objectives.

The SIG Module 1 and 2 was started on 23rd Feb 2024 by the sessions of Dr. Rupesh K. Gautam. He gave brief introduction on research to students explaining its purpose and importance in research area. Module 3 and 4 were taken by Expert Dr. Nadeem Farooqui, HOD of Department of Pharmaceutics, explaining about Literature review and Reference manager tools used during research project writing. Module 5 and Module 6 were taken by Dr. Rupesh K. Gautam in which he explained about plagiarism checking as well as plagiarism tool such as Urkund etc. as -He also explain about to create ID on orchid, scopus etc. created He also briefed about Python, SPSS, LaTeX Tools etc. for Publication -Lifecycle Stage Goal of PQS Elements, Product Quality monitoring System, Change Management System and Management Review. Then Module 7 were taken by Dr. Gurmeet Chhabra, HOD of Department of Pharmaceutical chemistry.

explained about Project Designing, he also explained how to Set specific, measurable, achievable, relevant, and time-bound (SMART) project goals. He gave some topics on new research area such as AI used in recent trends in Pharmaceutical filed. Practical based discussion and interaction this benefitted the students to understand the concept thoroughly. The module is consisting of both

-theory and practical exposure to students.

All modules helped students to understand the Identification and implementation of 'Technical Writing and Project Designing' in Research area. Online assessment was taken from students. Students were benefitted by providing those certificates at the end of the SIG. Also, feedback was taken by them to know their views and any suggestions from them. The SIG was successfully completed on 11th March 2024.

Benefits of Course:

1. **Efficient Organization:** Courses on research, technical writing, and literature review help you organize and store all your references in one centralized location. This is particularly useful for managing various types of sources, such as journal articles, books, websites, and conference papers.
2. **Time-Saving:** Learning about technical writing and reference management tools can save you time. Manually formatting citations and bibliographies can be labor-intensive and error-prone. Reference managers automate this process, ensuring consistency in citation styles and freeing up your time for other tasks.
3. **Easy Citation Generation:** With knowledge of technical writing and reference management, you can quickly generate citations while working on academic papers, reports, theses, or any other documents. These tools often integrate seamlessly with word processors, making it easy to cite and create bibliographies.
4. **Avoiding Plagiarism:** Properly citing sources is crucial to maintaining academic integrity and avoiding plagiarism. Courses on plagiarism educate you on the importance of accurate attribution, ensuring that you give credit to the ideas and work of others.
5. **Collaboration Facilitation:** When collaborating on group projects or working with others, understanding reference management tools allows for efficient sharing and syncing of references. This streamlines collaboration and ensures consistency across team members.

6. **Import and Export Functionality:** Reference managers enable you to import references from various sources (databases, websites, PDFs) and export them to different formats. This flexibility makes it easy to switch between different tools and platforms.
7. **Metadata Retrieval:** Many reference managers automatically extract and populate citation details (e.g., title, author, publication date) from online databases. This feature saves you the effort of manual data entry.
8. **Annotating and Organizing PDFs:** Reference management tools often allow you to annotate PDFs and attach notes or comments to specific references. This enhances your research organization and comprehension.
9. **Backup and Synchronization:** Most reference managers provide cloud-based storage and synchronization, ensuring that your references are backed up and accessible across different devices.
10. **Enhanced Project Designing:** Understanding the tools and techniques used in publication, including reference management and literature review, contribute to better project design. It helps you build a solid foundation for original research or development work.

Outcome:

1. Research:

Objective Clarity: Clearly define the research problem, objectives, and hypotheses.

Methodology: Choose appropriate research methods (qualitative, quantitative, or mixed) and data collection techniques.

Ethical Considerations: Ensure ethical conduct throughout the research process.

Data Analysis: Analyze data rigorously using suitable statistical or qualitative techniques.

Contribution: Highlight the novelty and significance of your research findings.

2. Technical Writing - Types of Publications:

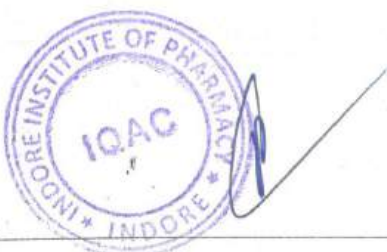

Research Papers: Present original research in journals or conference proceedings.

Review Articles: Summarize existing literature on a specific topic.

Case Studies: Describe real-world applications or experiences.

Book Chapters: Contribute to edited volumes or textbooks.

Theses/Dissertations: Document in-depth research for academic degrees.

Principal
Indore Institute of Pharmacy,
INDORE (M.P.)

3. Literature Review:

Scope: Define the boundaries of your review (e.g., time period, specific themes).

Synthesis: Summarize and critically evaluate existing research.

Identify Gaps: Highlight areas where further research is needed.

Theoretical Framework: Situate your review within relevant theories or models.

4. Reference Manager Tools:

Organization: Use tools like Mendeley, Zotero, RefWorks, or EndNote to manage citations and references.

Import/Export: Easily import references from databases and export formatted bibliographies.

Collaboration: Facilitate collaborative research by sharing reference libraries.

PDF Integration: Extract citation details directly from PDFs or webpages.

5. Plagiarism:

Awareness: Understand what constitutes plagiarism (verbatim copying, paraphrasing without proper attribution).

Citation Styles: Follow consistent citation styles (APA, MLA, etc.) to avoid unintentional plagiarism.

Plagiarism Detection Tools: Use software to check for potential plagiarism before submission.

6. Tools in Publication:

Graphical Tools: Create figures, charts, and diagrams using software like Adobe Illustrator or Excel.

Statistical Software: Analyze data using tools like R, SPSS, or Python.

LaTeX: Typeset complex documents (e.g., research papers, theses) with precision.

Version Control: Use Git for collaborative writing and tracking changes.

7. Project Designing:

Problem Statement: Clearly define the problem or need your project aims to address.

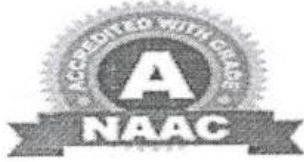

Objectives: Set specific, measurable, achievable, relevant, and time-bound (SMART) project goals.

Scope and Constraints: Define project boundaries, resources, and limitations.

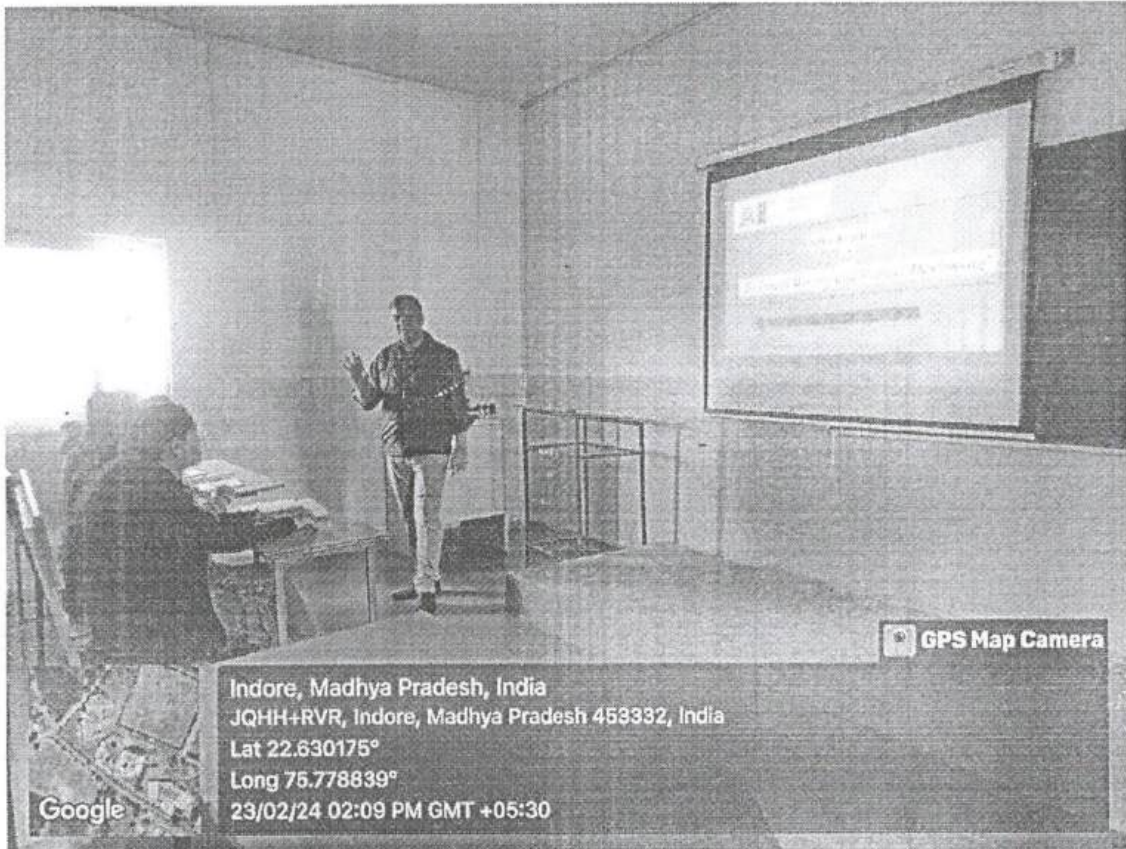

Risk Assessment: Identify potential risks and mitigation strategies.

Project Plan: Develop a detailed timeline, tasks, and milestones.

9. Career Advancement.

For B. Pharm Fourth year students, a 40 hrs certificate course, SIG, on 'Research Paper (Academic Writing)' has been conducted organized from 02-04-2024 to 18-04-2024. SIG consists of various modules. The SIG was conducted to enhance the basic knowledge of student's accordance to 'Research Paper (Academic Writing)'. It enhanced student's knowledge on research, understanding of basic work flow of research writing, Identification and implementation of plagiarism tools in an organization, Students get knowledge about reference Manager like Mendeley, Zotero, End note. It helps to identify risk and its management as well as mitigation, It helps to identify criticality/severity related in new research area. It helps to enhance the novelty of the research area, use authenticated technical writing and project designing for achieving long term as well as short term objectives.

The SIG Module 1 and 2 was started on 02 April 2024 by the sessions of Dr. Rupesh K. Gautam. He gave brief introduction on research to students explaining its purpose and importance in research area. Green Initiatives

A. Objectives of the Practice –

At IIP we strongly believe that natural resources should be judiciously used and conserved to its optimum. With this view we conceived the novel project and plan under the dynamic leadership of Shri Arun S Bhatnagar, Director General of the institution to engage the entire group of institutions and to take forward this noble cause of saving the environment by creating **Green Wave club** for implementing various green initiatives.

B.- The Context –

IIP has a lush green campus where variety of trees is planted that includes fruit Plants, ornamental plants which not only add the aesthetic value to the campus but also prevents soil erosion. This has also led to conserve the biodiversity and new species of birds are seen in the campus. Apart from inculcating eco-friendly habits like ban on use of plastics, tree plantation various activities to bring about the awareness towards Nature Mother are conducted.

C. The Practice –

The 50 acres of lush green sprawling campus has well maintained greenery and biodiversity. Varieties of ornamental plants are grown with scientific methods of Horticulture. Organic farming is being practiced and crops & vegetables without chemicals are produced to supply in canteen.

D. The Evidence of Success–

The air quality of the campus is improved after plantation of more than 1750 trees of various varieties. An ecosystem is created in the campus whereby all members (Students, Staff members) have inculcated habits and values like avoiding plastics, not discarding plastic, involved in organic farming purchase of organic plants.

By the use of bioorganic manure (Gir cow urine and Biowaste) the quality of our produce is remarkable and yield is good.

Healthy food and vegetables are supplied in the college canteen and staff members purchase the organic product which is the ultimate goal achievement of practicing organic farming in the campus.

INDORE (M.P.)

E. Problems Encountered & Resources Required-

The main problem of organic farming is less production of food grains and vegetables as compare to chemical farming. So new organic farming techniques are required and training is also required so that high yield can be achieved.

The campus had approx. 1700 trees in previous year and now in this year, institute has planted approx. 50 trees in the campus. Now the total number of trees in campus is approximately 1750 Nos:-

Organic Vegetable garden is formed in open land space in Girl's Hostel area. The entire campus is dotted with trees, plants and lawns which are kept well maintained.

The 50 acres of lush green sprawling campus has well maintained greenery and biodiversity. Varieties of ornamental plants are grown with scientific methods of Horticulture. Organic farming is being practiced and crops & vegetables without chemicals are produced to supply in canteen.

- With 224 varieties of medicinal plants alongwith 16 Red listed Indigenous plants Hence we have biggest Dhanwantary Herbal garden in Madhya Pradesh.
- We are also working on conservation of plants which are at the stage of Extinction from the forest of Madhya Pradesh.
- Institute has also initiated plantation and cleanliness drive at kalakund village to promote greenery and create vibrant environment.
- More than 1750 plants have been planted in the campus.
- The college maintains beautiful garden of decorative & flowering plants.
- Every year Plantation Drives are organized for newly admitted students.
- Kalpvriksha vatika contains trees for biological diversity with Spiritual importance. The trees here are the shelter and food sources of various birds and squirrels.
- Pragyan vatika is shelter of Gir species of Cow and it is specially developed to promote the organic farming in our campus by using Cow urine and their Bio waste to produce Bioorganic manure.
- The Khus plantation resides near channel helps in prevention of soils erosion during rainy season.
- The entire plantaion helps in lowering the temp. of campus during summer season upto 1-2⁰C.

Report on Cleanliness Drive in Village Kalakund and Gunjara

Date: 10th February 2024

Organized by:

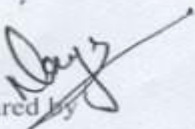

Indore Institute of Pharmacy, Indore

On 10th February 2024, a dedicated cleanliness drive was conducted in the villages of Kalakund and Gunjara by the M.Pharm students, faculty, and staff of Indore Institute of Pharmacy, Indore. The initiative aimed to improve sanitation, spread awareness about cleanliness, and engage the local community in sustainable waste management practices. The objective of the cleanliness drive was to Improve Sanitation: Clean public spaces, streets, and community facilities, Raise Awareness: Educate villagers on the significance of cleanliness and hygiene, Encourage Sustainable Practices: Promote waste segregation and responsible disposal. Students of M.Pharm 2nd year, faculty and staff of Indore Institute of Pharmacy participated in the drive. As outcome it was noted that a noticeable reduction in litter and waste in public areas, increased awareness among villagers about cleanliness and hygiene, and enhanced community involvement in cleanliness efforts. This would lead to establishment of regular waste collection and segregation practices, improved management of organic waste through composting, and better public health due to improved sanitation.

The cleanliness drive in Kalakund and Gunjara on 10th February 2024, organized by the M.Pharm students, faculty, and staff of Indore Institute of Pharmacy, was a resounding success. The drive not only enhanced the sanitary conditions of the villages but also fostered a sense of communal responsibility towards maintaining a clean and healthy environment. The initiative set a precedent for future cleanliness efforts and contributed to the overall well-being of the local community.

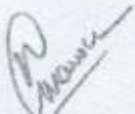

The event came to an end by a lunch in beautiful garden in village Kalakund near the Choral River.

We express our sincere gratitude to the local Panchayat, and the Indore Institute of Pharmacy's students, faculty, and staff for their unwavering support and active participation in this essential endeavor. We would like to than Shri Arun S Bhatnagar Sir, Group Advisor SEWS and SPARSH, and Dr. Nimita Manocha Principal, Indore Institute of Pharmacy to motivate all for conduction of such events.

A Report on “Awareness on Water Conservation by Waterman of India”

The IIST Group of Institutes hosted a transformative dialogue on April 23, 2024, featuring Dr. Rajendra Singh, widely revered as the “Waterman of India.” Dr. Singh’s profound expertise in water conservation and environmental sustainability resonated with attendees, fostering a deeper understanding of the challenges and opportunities in preserving our planet’s most vital resource.

Dr. Rajendra Singh, a distinguished environmentalist and recipient of numerous accolades, including the Ramon Magsaysay Award, Stockholm Water Prize, and Jannalal Bajaj Award, shared his wealth of knowledge and experiences during the session. His pioneering efforts in revitalizing rivers and water bodies across India have inspired a generation of environmental activists and advocates.

The expert session was graciously hosted by Shri Arun S Bhatnagar IRS, the Group Advisor of the IIST Group. Mr. Bhatnagar’s strategic leadership and commitment to promoting sustainable practices within the institute served as a catalyst for meaningful discussions on water conservation and management.

The session delved into various topics, including innovative water conservation techniques, community-based initiatives, and the importance of fostering partnerships across sectors to address water-related challenges effectively. Attendees, comprising students, faculty members, researchers, and professionals, actively engaged in the discussions, reflecting the shared commitment to safeguarding our planet’s natural resources.

The expert session underscored the importance of collective action and collaboration in addressing the urgent challenges posed by water scarcity and pollution. It served as a call to action for individuals and organizations to prioritize environmental conservation and adopt sustainable daily practices.

The expertise and insights of Dr. Singh inspired the IIST Group and the audience to redouble their efforts in promoting sustainable practices and environmental stewardship within the institution and beyond.

Report on Plantation Drive at Dhanwantary Garden

Date: 05h June 2024

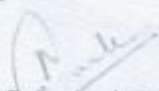

Organized by: Indore Institute of Pharmacy, Indore

On 05h June 2024 (World Environment Day) a very auspicious tree plantation programme was organized in our institute to create awareness regarding climate change and its adverse effect on us. Tree plantation drive was organized to demonstrate the students their commitment towards environmental conservation. Students were divided in the group of 10 students and around 10 trees are planted.

Every year plantation drive is organized, and students are instructed to plant a sapling and take care of that sapling till their tenure in the Institute. He / She can cherish this memory even after leaving the institute. IIP has a lush green campus where a variety of trees are planted like Silver oak, variety of fruit Plants, ornamental plants which not only add aesthetic value to the campus but also prevents soil erosion. This has also led to conserving biodiversity and new species of birds, are seen in the campus. The varieties are chosen meticulously according to the scientific value of a particular plant and then healthy saplings are procured from forests and nurseries.
