Indore Institute of Pharmacy,
INDORE (M.P.)

7.1.2 ALTERNATE SOURCES OF ENERGY AND ENERGY CONSERVATION MEASURES:

In recent years, there has been a growing global emphasis on sustainable and eco-friendly practices. Educational institutes can play a pivotal role in leading these transitions. Utilization of solar energy, a renewable resource holds immense potential for creating cleaner and sustainable future.

Adopting such sustainable technologies helps students to understand how their activities shall create an impact on the environment. Most of the energy needs of the college are fulfilled by these panels therefore this proves to be one among the effective techniques adopted to protect the nature.

Our Institution has constituted the following facilities to ensure the usage of Alternate sources of energy and energy conservation measures.

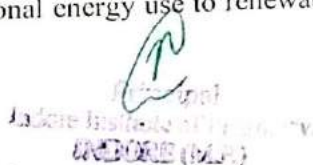

- College installed the **solar energy plant** to generate renewable energy for fulfilling its energy requirements.
- College installed a **solar power water heater** to supply hot water in the college canteen and both the hostel.
- **Sensor based street lights** were installed in the various places of college campus in order for conserving the energy.
- **LED bulbs** are used in various places in the college to reduce the energy consumption and full-fill lighting needs.

The following Alternative sources of energy are available in our campus.

- Solar energy plant & Solar energy water heater
- Sensor based street lights
- LED bulbs to reduce energy consumption

Solar Energy Plant & Water Heater

- A solar panel is actually a collection of solar (or photovoltaic) cells, which can be used to generate electricity through photovoltaic effect. These cells are arranged in a gridlike pattern on the surface of solar panels.
- IIP has partially shifted from conventional energy use to renewable energy for fulfilling its energy requirements.

Indore Institute of Pharmacy

Affiliated to - BOPU (Bhopal) | Approved by - AICTE (New Delhi) & PCI (New Delhi)
Register - Under UGC 2(F)

- IIP has installed a solar rooftop water heater plant of 25 KW each at boy's, Girl's hostel and staff quarters for 24 hours hot water supply.
- 5kW ON Grid solar power plant with inverter is installed on canteen roof in the year 2022, the uninterrupted power supply is being ensured with the help of the above-mentioned renewable source of energy in the canteen and it results in the reduced expenditure of electricity bill.
- Installation of solar panels in homes helps in combating the harmful emissions of greenhouse gases and thus helps reduce global warming. Solar panels do not lead to any form of pollution as they are clean.
 - Type: 5 kW
 - Installed at canteen
 - Month and year of Installation: 20 January 2022

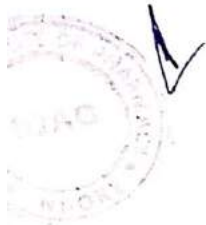

Sensor-based energy conservation

- Our institute uses the equipment's which always save energy. **Sensor based street lights** were installed and are being maintained in the college in order for conserving the energy as the lights turn on and turn off automatically.

Use of LED bulbs/ Power Efficient Equipment

LED bulbs are preferred for lighting as LED bulb consumed around 90 % less power when compared to incandescent light bulbs. They are highly efficient. LED bulbs are used in various places in the college for full-filling lighting needs.

- They are placed in large quantities in seminar halls, faculty cabins and at places wherever necessary. Street lightings are provided along the pathways to illuminate the surroundings.
- The institute has decided for replacement of conventional CFL and tube light with LED bulbs and tubes.

Subject: Purchase Order for LPD Solar water heating.

Dear Sir,

With reference to discussion, we are pleased to inform you that Purchase Order for LPD Solar water heating with following specifications at Shail Campus is being awarded to you on the following rates:-

S.N.	Item Description	Rate
1.	LPD Solar water heating 1000 with OMEGA Collector Model- SL-1000	183000/-

Terms & Condition-

1. Price basic\s: F.O.R. at site Pithampur
2. VAT: Exempted as on date, any variations at the time of supply will be in our account.
3. Freight: included in above cost.
4. Payment terms: 25% advance with PO 60 % against supply of material and 10% after installation.
5. Delivery: within 2 weeks
6. Installation: system installation is in Shail Campus, whereas wherever hard plumbing required shall be in your scope.
7. All documents required for claiming government subsidy will be completed by the stage installation is done.
